*Mediterranean Connections* A. Knapp,Stella Demesticha,2016-08-25 Mediterranean Connections focuses on the origin and development of maritime transport containers from the Early Bronze through early Iron Age periods ca 3200 700 BC Analysis of this category of objects broadens our understanding of ancient Mediterranean interregional connections including the role that shipwrecks seafaring and coastal communities played in interaction and exchange These containers have often been the subject of specific and detailed pottery studies but have seldom been examined in the context of connectivity and trade in the Aegean and eastern Mediterranean This broad study considers the likely origins of these types of vessels traces their development and spread throughout the Aegean and eastern Mediterranean as archetypal organic bulk cargo containers discusses the wider impact on Mediterranean connections transport and trade over a period of 2 500 years covering the Bronze and early Iron Ages Classical and Near Eastern archaeologists and historians as well as maritime archaeologists will find this extensively researched volume an important addition to their library      **Forest and Stream**

,1908      **Making One's Way in the World** Martin Bell,2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces

created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life

The Drowning of a Cornish Prehistoric Landscape Andy M. Jones, Michael J.

Allen, 2023-06-01 Between 2018 and 2019 Cornwall Archaeological Unit undertook two projects at Mount s Bay Penwith The first involved the excavation of a Bronze Age barrow and the second environmental augur core sampling in Marazion Marsh Both sites lie within an area of coastal hinterland which has been subject to incursions by rising sea levels Since the Mesolithic an area of approximately 1 kilometer in extent between the current shoreline and St Michael s Mount has been lost to gradually rising sea levels With current climate change this process is likely to occur at an increasing rate Given their proximity the opportunity was taken to draw the results from the two projects together along with all available existing environmental data from the area For the first time the results from all previous palaeoenvironmental projects in the Mount s

Bay area have been brought together Evidence for coastal change and sea level rise is discussed and a model for the drowning landscape presented In addition to modeling the loss of land and describing the environment over time social responses including the wider context of the Bronze Age barrow and later Bronze Age metalwork deposition in the Mount s Bay environs are considered The effects of the gradual loss of land are discussed in terms of how change is perceived its effects on community resilience and the construction of social memory and narratives of place The volume presents the potential for nationally significant environmental data to survive which demonstrates the long term effects of climate change and rising sea levels and peoples responses to these over time

*Landscapes of Warfare* Tiffany Earley-Spadoni,2025-04-15 *Landscapes of Warfare* offers an in depth exploration of the Urartian empire which occupied the

highlands of present day Turkey Armenia and Iran in the early first millennium BCE Lesser known than its rival the Neo Assyrian empire Urartu presents a unique case of imperial power distributed among mountain fortresses rather than centralized in cities Through spatial analysis the book demonstrates how systematic warfare driven by imperial ambitions shaped Urartian and Assyrian territories creating symbolically and materially powerful landscapes Tiffany Earley Spadoni challenges traditional views by emphasizing warfare s role in organizing ancient landscapes suggesting that Urartu s strength lay in its strategic optimization of terrain through fortified regional networks Using an interdisciplinary approach that includes GIS enabled studies and integrates archaeological historical and art historical evidence she illustrates how warfare was a generative force in structuring space and society in the ancient Middle East Landscapes of Warfare situates Urartu s developments within the broader context of regional empires providing insights into the mechanisms of warfare governance and cultural identity formation

**The Oxford Handbook of the European Iron Age** Colin

Haselgrove, Katharina Rebay-Salisbury, Peter S. Wells, 2023-09-22 The Oxford Handbook of the European Iron Age presents a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods exploiting the large quantities of new evidence yielded by the upsurge in archaeological research and excavation on this period over the last thirty years Three introductory chapters situate the reader in the times and the environments of Iron Age Europe Fourteen regional chapters provide accessible syntheses of developments in different parts of the continent from Ireland and Spain in the west to the borders with Asia in the east from Scandinavia in the north to the Mediterranean shores in the south Twenty six thematic chapters examine different aspects of Iron Age archaeology in greater depth from lifeways economy and complexity to identity ritual and expression Among the many topics explored are agricultural systems settlements landscape monuments iron smelting and forging production of textiles politics demography gender migration funerary practices social and religious rituals coinage and literacy and art and design

History of the Caucasus Christoph Baumer, 2023-10-05 In the Shadow of Great Powers is the second volume of Christoph Baumer s History of the Caucasus It covers the period from the Seljuk domination of the Southern Caucasus around 1050 CE to the present day After the Kingdom of Georgia s golden age of independent power and cultural blossoming in the 12th and early 13th centuries the Caucasus was overrun by the Mongols and soon disintegrated into innumerable smaller kingdoms principalities and khanates At the same time an Armenian kingdom in exile maintained a precarious independence in Cilicia today s southern Turkey by applying a three way diplomatic policy balanced between the Mongol Il Khanate the Crusader states and to a lesser degree the Mameluke Empire Then followed four centuries during which the highly fragmented polities of the North and South Caucasus became political pawns of the regional great powers above all the Ottomans Iran and Russia In the wake of World War I the South Caucasus enjoyed a short lived independence whereas its northern neighbours were engulfed by the Russian civil wars But by 1921 the Soviet Union had re established Russian dominance over the whole region and from a Western

perspective the region disappeared behind the Iron Curtain Nevertheless the Caucasian nations kept their pronounced identities even under Soviet rule giving rise at the dissolution of the Soviet Union to a number of internecine conflicts Whereas the Russian Federation managed to maintain its supremacy over the North Caucasus albeit at the cost of bloody wars and insurrections Armenia Azerbaijan and Georgia succeeded in more or less gaining control over their destiny Of these three republics only Azerbaijan secured a wide ranging independence thanks to its fossil fuel resources Following Russian interference Georgia lost control over two of its provinces while Armenia remains dependent on Russian support in the face of its notoriously antagonistic relations with neighbouring Azerbaijan and Turkey over the unresolved issue of Karabakh In the Shadow of Great Powers includes some 200 full colour images and maps which further bring the turbulent history of this region to light
