Locke, Shaftesbury, and Hutcheson Daniel Carey, 2006-02-02 Daniel Carey examines afresh the fundamental debate within the Enlightenment about human diversity Three central figures Locke Shaftesbury and Hutcheson questioned whether human nature was fragmented by diverse and incommensurable customs and beliefs or unified by shared moral and religious principles Locke s critique of innate ideas initiated the argument claiming that no consensus existed in the world about morality or God s existence Testimony of human difference established this point His position was disputed by the third Earl of Shaftesbury who reinstated a Stoic account of mankind as inspired by common ethical convictions and an impulse toward the divine Hutcheson attempted a difficult synthesis of these two opposing figures respecting Locke s critique while articulating a moral sense that structured human nature Daniel Carey concludes with an investigation of the relationship between these arguments and contemporary theories and shows that current conflicting positions reflect long standing differences that first emerged during the Enlightenment

Shaftesbury and Hutcheson Robert Cecil Gaissert, 1973

The Emergence of Modern Aesthetic Theory Simon Grote, 2017-10-26 Broad in its geographic scope and yet grounded in original archival research this book situates the inception of modern aesthetic theory the philosophical analysis of art and beauty in theological contexts that are crucial to explaining why it arose Simon Grote presents seminal aesthetic theories of the German and Scottish Enlightenments as outgrowths of a quintessentially Enlightenment project the search for a natural foundation of morality and a means of helping naturally self interested human beings transcend their own self interest This conclusion represents an important alternative to the standard history of aesthetics as a series of preludes to the achievements of Immanuel Kant as well as a reinterpretation of several canonical figures in the German and Scottish Enlightenments It also offers a foundation for a transnational history of the Enlightenment without the French philosophes at its centre while solidly endorsing historians growing reluctance to call the Enlightenment a secularising movement

Scepticism in the Eighteenth Century: Enlightenment, Lumières, Aufklärung Sébastien Charles, Plínio J. Smith, 2014-07-08

The Age of Enlightenment has often been portrayed as a dogmatic period on account of the veritable worship of reason and progress that characterized Eighteenth Century thinkers Even today the philosophes are considered to have been completely dominated in their thinking by an optimism that leads to dogmatism and ultimately rationalism However on closer inspection such a conception seems untenable not only after careful study of the impact of scepticism on numerous intellectual domains in the period but also as a result of a better understanding of the character of the Enlightenment As Giorgio Tonelli has rightly observed the Enlightenment was indeed the Age of Reason but one of the main tasks assigned to reason in that age was to set its own boundaries Thus given the growing number of works devoted to the scepticism of Enlightenment thinkers

historians of philosophy have become increasingly aware of the role played by scepticism in the Eighteenth Century even in those places once thought to be most given to dogmatism especially Germany Nevertheless the deficiencies of current studies of Enlightenment scepticism are undeniable In taking up this question in particular the present volume which is entirely devoted to the scepticism of the Enlightenment in both its historical and geographical dimensions seeks to provide readers with a revaluation of the alleged decline of scepticism At the same time it attempts to resituate the Pyrrhonian heritage within its larger context and to recapture the fundamental issues at stake The aim is to construct an alternative conception of Enlightenment philosophy by means of philosophical modernity itself whose initial stages can be found herein

Locke, Shaftesbury, and Hutcheson Daniel Carey, 2006-02-02 Are human beings linked by a common nature one that makes them see the world in the same moral way Or are they fragmented by different cultural practices and values These fundamental questions of our existence were debated in the Enlightenment by Locke Shaftesbury and Hutcheson Daniel Carey provides an important new historical perspective on their discussion At the same time he explores the relationship between these founding arguments and contemporary disputes over cultural diversity and multiculturalism Our own conflicting positions today reflect long standing differences that emerged during the Enlightenment *Happiness and Utility* Georgios Varouxakis, Mark Philp, 2019-07-29 Happiness and Utility brings together experts on utilitarianism to explore the concept of happiness within the utilitarian tradition situating it in earlier eighteenth century thinkers and working through some of its developments at the end of the nineteenth and beginning of the twentieth centuries Drawing on a range of philosophical and historical approaches to the study of the central idea of utilitarianism the chapters provide a rich set of insights into a founding component of ethics and modern political and economic thought as well as political and economic practice In doing so the chapters examine the multiple dimensions of utilitarianism and the contested interpretations of this standard for judgement in morality and public policy **Taste and Experience in Eighteenth-Century British**

Aesthetics Dabney Townsend, 2022-06-02 Taste and Experience in Eighteenth Century Aesthetics acknowledges theories of taste beauty the fine arts genius expression the sublime and the picturesque in their own right distinct from later theories of an exclusively aesthetic kind of experience By drawing on a wealth of thinkers including several marginalised philosophers Dabney Townsend presents a novel reading of the century to challenge our understanding of art and move towards a unique way of thinking about aesthetics Speaking of a proto aesthetic Townsend surveys theories of taste and beauty arising from the empiricist shift in philosophy A proto aesthetic was shaped by the philosophers who followed Locke and accepted that theories of taste and beauty must be products of experience alone Francis Hutcheson David Hume Alexander Gerard and Thomas Reid were among the most important advocates joined by others who re thought traditional topics Featuring chapters tracing its philosophical principles issues raised by the subjectivity of the empiricist approach and the more academic proto aesthetic formed toward the end of the century Townsend argues that Lockean empiricism laid the

foundations for what we now call aesthetics **Shaftesbury and Hutcheson** Thomas FOWLER (President of Corpus Christi College, Oxford.),1882 **Unintended Consequences and the Social Sciences** Lorenzo Infantino,2023-08-14 Illustrating the knowledge and ideas of thinkers such as Mandeville Hume Montesquieu and Smith this book fully investigates the entire panorama of social sciences as well as providing a clear and concise analysis of the history of the social sciences from the point at which evolutionary theory entered the field Fanaticism and the History of Philosophy Paul Katsafanas,2023-11-07 Voltaire called fanaticism the monster that pretends to be the child of religion Philosophers politicians and cultural critics have decried fanaticism and attempted to define the distinctive qualities of the fanatic whom Winston Churchill described as someone who can't change his mind and won't change the subject Yet despite fanaticism's role in the long history of social discord human conflict and political violence it remains a relatively neglected topic in the history of philosophy In this outstanding inquiry into the philosophical history of fanaticism a team of international contributors examine the topic from antiquity to the present day Organized into four sections topics covered include Fanaticism in ancient Greek Indian and Chinese philosophy Fanaticism and superstition from Hobbes to Hume including chapters on Locke and Montesquieu Shaftesbury and Hutcheson Kant Germaine de Stael Hegel Nietzsche William James and Jorge Portilla on fanaticism Fanaticism and terrorism and extremism and gender including the philosophy and morality of the manosphere Closed mindedness and political and epistemological fanaticism Spanning themes from superstition enthusiasm and misanthropy to the emotions purity and the need for certainty Fanaticism and the History of Philosophy is a landmark volume for anyone researching and teaching the history of philosophy particularly ethics and moral philosophy It is also a valuable resource for those studying fanaticism in related fields such as religion the history of political thought sociology and the history of ideas

politics literature history and religious studies **The Surplus of Culture** Ewa Borkowska, Tomasz Burzyński, 2011-07-12

This multifaceted volume presents the elusive surplus of culture in the spotlight of theory and academic practice Despite its overtly economic implications the concept alludes to the added value of sense common sense and nonsense which is represented as languages of irony irrationality and absurdity potentially subverting traditional and mainstream regimes of culture Consequently the moment of surplus is inherent in critical interpretation in which supposedly well entrenched notions suddenly reveal their implicitly shattering and subversive nature The surplus of culture dwells at the risky intersection of untamed interpretation and tradition It is the space of the third in which literary canons are re visited language reveals its hidden political agendas the Orient reclaims its own cognitive perspective and established structures of cognition are questioned in the tragic comic gesture of insight The volume is a must for scholars and researchers in the fields of cultural studies literature and arts as well as literary theory *Moral Philosophy from Montaigne to Kant* J. B. Schneewind, 2003 This anthology contains excerpts from some thirty two important 17th and 18th century moral philosophers Including a substantial introduction and extensive bibliographies the anthology facilitates the study and teaching of early modern moral philosophy in its crucial formative period As well as well known thinkers such as Hobbes Hume and Kant there are excerpts from a wide range of philosophers never previously assembled in one text such as Grotius Pufendorf Nicole Clarke Leibniz Malebranche Holbach and Paley *The Formation of College English* Thomas P. Miller, 1997 In the middle of the eighteenth century English literature composition and rhetoric were introduced almost simultaneously into colleges throughout the British cultural provinces Professorships of rhetoric and belles lettres were established just as print was reaching a growing reading public and efforts were being made to standardize educated taste and usage The provinces saw English studies as a means to upward social mobility through cultural assimilation In the educational centers of England however the introduction of English represented a literacy crisis brought on by provincial institutions that had failed to maintain classical texts and learned languages Today as rhetoric and composition have become reestablished in the humanities in American colleges English studies are being broadly transformed by cultural studies community literacies and political controversies Once again English departments that are primarily departments of literature see these basic writing courses as a sign of a literacy crisis that is undermining the classics of literature The Formation of College English reexamines the civic concerns of rhetoric and the politics that have shaped and continue to shape college English
