Wolfgang Spyra,Kay Winkelmann,2006-01-04 Prof Dr Ing Wolfgang Spyra Brandenburg University of Technology in Cottbus Germany The demilitarization and conversion of military properties worldwide has been a topic of growing importance since the end of the Cold War The slowing of the arms race brought on by weapons treaties and relaxed tensions between NATO and Warsaw Pact nations caused stockpiles of conventional weapons to become superfluous The need to process and dispose of such weapons began more quickly in NATO countries This demilitarization process began shortly after the reunification of Germany and was largely completed by the mid to late 1990 s The remaining process no small task in itself of converting lands formerly used by the military into safe and environmentally acceptable landscapes may continue for decades to come Due to a lack of resources and technology the process of demilitarization in the former Warsaw Pact countries has launched more slowly In 2002 both Georgia and Moldova finished projects which destroyed their stocks of liquid ballistic missile components Both these projects were carried out through the cooperative support of trans national organizations private contractors and research institutions The Republic of Azerbaijan now finds itself at the beginning of its demilitarization process Stored at the country s military depots are over 2000 tons of missile fuels oxidizer and chemical additives This hazardous waste is kept in tanks intended only for temporary transport and storage

Moving Beyond the Comfort Zone in Psychotherapy Nancy A. Bridges,2005 Making emotional contact and inviting patients to use therapeutic relationships for their relational and developmental aims is a risky and intimate proposition But as the author of this book argues therapists must be willing to engage deeply with patients to work from within the relationship extending the therapeutic relationship to reach the private experience of self and other and offer new relational experience Moving beyond traditional thinking the author presents a relational approach that integrates psychoanalytic thinking with the latest findings from infant research to give therapists the theoretical framework to orient the treatment and maintain psychic equilibrium and safety during times of arousing and destabilizing affect and relational scenarios A therapeutic stance which is fluid and open to intrapsychic and interpersonal influence allows for the experience and elaboration of complex unconscious affects and shifting points of identification Compelling clinical narratives bring the reader into the consulting room and show how the therapist may forge deep emotional connection within a bounded therapeutic relationship that relies upon mutual influence and self revelation and opens up relational space to ultimately rearrange a patient s experience of self and other

Healing from Childhood Abuse John J. Lemoncelli,2012-04-06 Written

directly to individuals who have experienced childhood trauma this book provides essential information that allows victims to begin recovering from their immense pain and suffering and empowers them to examine their specific issues in order to become a true survivor The American Medical Association currently estimates at least one in every five adults suffered abuse as a child While childhood abuse or trauma is certainly not a new issue it has reached epidemic proportion Yet most clinicians have not been sufficiently trained to appreciate or understand the devastating long term impact of abuse on the total person John J Lemoncelli EdD authored this book to enable those who suffer in silence to understand what happened take control and begin and maintain a program of recovery It helps those abused in childhood to grasp how their experience impacted their development and the extent to which it negatively affects their present lives encourages them to let go of the belief that they are damaged dirty or at fault and provides an effective strategy for externalizing the source of their anguish rather than blaming themselves The author outlines several stages and common issues that may need to be addressed but as no one size fits all treatment is possible he provides strategies that empower victims to identify the specific sources of their pain
