Long-term Care for Older Persons Nancy N. Eustis, Jay N. Greenberg, Sharon K. Patten, 1984 **The Graying of the World** Laura Katz Olson, 1994 This unique book studies America's frail older population relative to the elderly in ten other nations. It contains a cross national assessment of approaches to long term care for the elderly and explains the nature and extent of current and future problems related to caring for the functionally impaired elderly. By studying and analyzing the ongoing struggles of other nations in their attempts to cope with growing populations of frail elderly readers in the U.S. can expand the parameters of their own national debate on the subject. *The Graying of the World* shows the political, economic and social context in which decisions on elder care are based and evaluates how successful various countries' programs have been. Chapters outline alternative approaches taken by disparate types of national systems highlighting unique and creative solutions to provide useful information on new and alternative ways to respond to personal and public issues related to elder care. The elderly and their care in Finland, France, Germany, Great Britain, Israel, Japan, People's Republic of China, Sweden, and Yugoslavia are discussed, as are the elderly in Canada and the United States. Chapters cover the following topics for each country: the increasing number of frail elderly and their costly health needs; the current and future role of the state in elder care; the current and future role of the family in elder care; types of support services offered for the elderly including in-home care, community based care, and institutional care; the relationship of a nation's political economy to its attitude and policy on long term care; innovative approaches to elder care. Practitioners, decision makers, and the concerned general public will all find *The Graying of the World* an interesting and informative book that expands the discussion of health care options available for the elderly. As such, the book is also a helpful text for undergraduate and beginning graduate students of gerontology, public policy, and comparative politics, as well as for social service practitioners. It provokes much needed conversation on developing a healthcare plan for the future that meets the needs of a large elderly population.

Effective Management of Long Term Care Facilities Douglas Singh, 2010-02-18 *Effective Management of Long Term Care Facilities* explores the complex operations of the long term care facility and offers critical skills to current and future nursing home administrators for delivering quality, cost-effective services. The Second Edition has been thoroughly revised and reorganized to offer a more cohesive presentation of the material. New chapters that have been added cover the long term care industry, long term care policy, and supportive case studies that incorporate management and patient care issues.
