

of *Visualizing Anthropology*, this is a very serious problem. As Grimshaw and Ravetz point out: 'To propose the visualization of anthropology, linked to collaborative experimentation, is something of a risky enterprise. It involves a willingness to surrender to the confusion and conflict that follows from the erosion of conventional hierarchies of knowledge.' It is indeed a challenge to read Elspeth Owen's 'Give Me a Call' in which the text is hardly readable against the background of a greyscale photograph, eventually turning into handwritten words that gradually fade away and disappear towards the end of the essay. Is this an intellectual challenge or a vision test? Who cares?

Robert V. Kemper and Anya Peterson Royce (eds). 2002. *Chronicling Cultures: Long-Term Field Research in Anthropology*. Walnut Creek, CA: Alta Mira Press. pp. xxxviii + 353. ISBN (pbk) 0 7591 0194 9. Price: £22.95.

Anthropologists use ethnographic fieldwork to describe different cultures. Even after many refinements and with the inclusion of complementary methods, doing fieldwork basically means making sense of other people's lives by living with and talking with them over an extended period of time. While the actual duration of fieldwork depends on many factors including the availability of funding, it is very common (and expected) that a researcher covers a 'typical year' or complete seasonal cycle of agricultural, ritual or whatever activities. In most cases, research is an individual endeavor and very often, responding to the short-livedness and the demands of flexibility of today's academic business, researchers will then turn their interest toward other topics in other social settings.

Chronicling Cultures, to the contrary, documents the work of anthropologists who continued to visit 'the same communities over a long period of time' (p. vii). This minimal definition of what 'long-term' means in the context of this book is an umbrella for a fascinating variety of testimonies and reflections on the rewards and problems pertaining to the long-term engagement with particular social and geographic settings. In the transition from first-fieldwork to long-term research, as Royce and Kemper state in the introduction, researchers live across shifts in the political landscapes, better appreciate events and responses, and gain insight into patterns of growth and migration. They become active partners in issues of local development, contribute to the sedimentation of historical memory, stimulate self-esteem and pride among their interlocutors, and, increasingly, facilitate the appropriation of ethnographic knowledge by local people themselves in processes of social mobilization. At the same time, researchers become aware of the provisional nature of their knowledge, develop an attitude of 'work in progress', and continue to ask the same key questions again and again while simultaneously developing new approaches. In sum, anthropologists doing long-term research

Some field sites have hosted anthropologists for as long as half a century. *Chronicling Cultures* collects articles from principals of many of the longest and best known anthropology projects from four continents: the Kung, Harvard Chiapas Project, Gwembe Valley, Tzintzuntzan, and Navajo, among others. These projects have brought a new understanding of change and persistence in communities over time. They have forced researchers to develop methods of involving local communities in research of using data over generations of scholars and of resolving ethical issues of research versus advocacy. The projects range from individual scholars who return home year after year to large scale institutionalized projects involving many researchers and numerous studies. This volume will be an important addition to the literature on fieldwork on the history of ethnology and on ethnographers' role in their host cultures.

The SAGE Handbook of Social Research Methods Pertti Alasuutari, Leonard Bickman, Julia Brannen, 2008-02-25

The SAGE Handbook of Social Research Methods is a must for every social science researcher. It charts the new and evolving terrain of social research methodology covering qualitative, quantitative, and mixed methods in one volume. The Handbook includes chapters on each phase of the research process: research design, methods of data collection, and the processes of analyzing and interpreting data. The volume maintains that there is much more to research than learning skills and techniques; methodology involves the fit between theory, research questions, research design, and analysis. The book also includes several chapters that describe historical and current directions in social research, debating crucial subjects such as qualitative versus quantitative paradigms, how to judge the credibility of types of research, and the increasingly topical issue of research ethics. The Handbook serves as an invaluable resource for approaching research with an open mind. This volume maps the field of social research methods using an approach that will prove valuable for both students and researchers.

Time and the Field Steffen Dalsgaard,Morten Nielsen,2015-11-01 In recent years ethnographic fieldwork has been subjected to analytical scrutiny in anthropology Ethnography remains anchored in tropes of spatiality with the association between field and fieldworker characterized by distances in space With updates on the discussion of contemporary requirements to ethnographic research practice Time and the Field rethinks the notion of the field in terms of time rather than space Such an approach not only

implies a particular attention to the methodology of studying local social and ontological imaginaries of time but furthermore destabilizes the relationship between fieldworker and fieldsite allowing it to emerge as a dynamic and ever shifting constellation
