A History of America in 100 Maps Susan Schulten, 2018-09-21 Throughout its history America has been defined through maps Whether made for military strategy or urban reform to encourage settlement or to investigate disease maps invest information with meaning by translating it into visual form They capture what people knew what they thought they knew what they hoped for and what they feared As such they offer unrivaled windows onto the past In this book Susan Schulten uses maps to explore five centuries of American history from the voyages of European discovery to the digital age With stunning visual clarity *A History of America in 100 Maps* showcases the power of cartography to illuminate and complicate our understanding of the past Gathered primarily from the British Library's incomparable archives and compiled into nine chronological chapters these one hundred full color maps range from the iconic to the unfamiliar Each is discussed in terms of its specific features as well as its larger historical significance in a way that conveys a fresh perspective on the past Some of these maps were made by established cartographers while others were made by unknown individuals such as Cherokee tribal leaders soldiers on the front and the first generation of girls to be formally educated Some were tools of statecraft and diplomacy and others were instruments of social reform or even advertising and entertainment But when considered together they demonstrate the many ways that maps both reflect and influence historical change Audacious in scope and charming in execution this collection of one hundred full color maps offers an imaginative and visually engaging tour of American history that will show readers a new way of navigating their own worlds

Breaking the Bronze Ceiling Valentina Rozas-Krause, Andrew M. Shanken, 2024-05-07 Breaking the Bronze Ceiling uncovers a glaring omission in our global memorial landscape the conspicuous absence of women Exploring this neglected narrative the book

emerges as the foremost guide to women's memorialization across diverse cultures and ages. As global memorials come under intense examination with metropolises vying for a more inclusive recognition of female contributions, this book stands at the forefront of contemporary discussion. The book's thought-provoking essays artfully traverse the complex terrains of gender portrayal, urban tales, ancestral practices, and grassroots activism, all anchored in the bedrock of cultural remembrance. Rich in the range of cases discussed, the book sifts through multifaceted representations of women from Marians to Liberties to handmaidens to particular historical women. *Breaking the Bronze Ceiling* offers a panoramic view of worldwide memorials, critically analyzing grandiose tributes while also honoring subtle gestures, be it evocative plaques, inspiring namesakes, or dynamic demonstrations. The book will be of interest to historians of art and architecture as well as to activists, governmental bodies, urban planners, and NGOs committed to regional history and memory. More than a mere compilation, *Breaking the Bronze Ceiling* epitomizes a movement. The book comprehensively assesses the portrayal of women in public art and offers a fervent plea to address the severe underrepresentation of women in memorials.
