Forged in War Thomas A. Bruscino, 2013-05-12 World War II shaped the United States in profound ways and this new book the first in the *Legacies of War* series explores one of the most significant changes it fostered a dramatic increase in ethnic and religious tolerance *A Nation Forged in War* is the first full length study of how large scale mobilization during the Second World War helped to dissolve longstanding differences among White soldiers of widely divergent backgrounds Never before or since have so many Americans served in the armed forces at one time more than 15 million donned uniforms in the period from 1941 to 1945 Thomas Bruscino explores how these soldiers shared experiences enduring basic training living far from home engaging in combat transformed their views of other ethnic groups and religious traditions He further examines how specific military policies and practices worked to counteract old prejudices and he makes a persuasive case that throwing together men of different regions ethnicities religions and classes not only fostered a greater sense of tolerance but also forged a new American identity When soldiers returned home after the war with these new attitudes they helped reorder what it meant to be white in America Using the presidential campaigns of Al Smith in 1928 and John F Kennedy in 1960 as bookend events Bruscino notes a key change in religious bias Smith's defeat came at the end of a campaign rife with anti

Catholic sentiment Kennedy's victory some three decades later proved that such religious bigotry was no longer an insurmountable obstacle. Despite such advances Bruscino notes that the growing broad mindedness produced by the war had limits it did not extend to African Americans whose own struggle for equality would dramatically mark the postwar decades. Extensively documented *A Nation Forged in War* is one of the few books on the social and cultural impact of the World War II years. Scholars and students of military, ethnic, social and religious history will be fascinated by this groundbreaking new volume. *World War II in Europe, Africa, and the Americas, with General Sources* Loyd Lee, 1997-08-21. A broadly interdisciplinary work, this handbook discusses the best and most enduring literature related to the major topics and themes of World War II. Military historiography is treated in essays on the major theaters of military operations and the related themes of logistics and intelligence, while political and diplomatic history is covered in chapters on international relations, resistance movements and collaboration. The volume analyzes themes of domestic history in essays on economic mobilization, the home fronts and women in the military and civilian life. The book also covers the Holocaust. This handbook approaches each topic from a global viewpoint rather than focusing on individual national communities. Except for nonprint material, the literature, research and sources surveyed are primarily those available in English. The volume is aimed at both experts on the war and the general academic community and will also be useful to students and serious laymen interested in the war.

Homeward Bound Richard H. Taylor, 2007-02-28. The story of veterans coming home from wars has not been concisely recorded to highlight the major problems they've faced. Having gone to war and survived, they have expectations, hopes and dreams of a better life. In *Homeward Bound*, Taylor chronicles their struggles to realize all of those expectations by tracing the experiences of American veterans from the Revolutionary War through the current conflicts in Iraq and Afghanistan. In doing so, he connects pieces of a longer, larger story that has traditionally been told only in individual parts. *Homeward Bound* delves into personal memoirs, dusty diaries and teary interviews to link veterans' hopes for the future with the ways in which their dreams were fulfilled or died. It shows how war changed these men and women, how they lived with their experiences despite the odds and how alone they can be. Accompanying photographs relate still other stories, those written on our veterans' gallant faces. *The Atomic Bomb and American Society* Rosemary B. Mariner, G. Kurt Piehler, 2009. Drawing on the latest research on the atomic bomb and its history, the contributors to this provocative collection of eighteen essays set out to answer two key questions. First, how did the atomic bomb, a product of unprecedented technological innovation, rapid industrial scale manufacturing and unparalleled military deployment, shape U.S. foreign policy, the communities of workers who produced it and society as a whole? And second, how has American society's perception that the bomb is a means of military deterrence in the Cold War era evolved under the influence of mass media, scientists, public intellectuals and even the entertainment industry? In answering these questions, *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb, the role of women working at Los Alamos, the transformation of nuclear

physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb and the development of Cold War ideology the image of the bomb that was conveyed in the popular media and the connection of the bomb to the commemoration of World War II As it illuminates the cultural social political environmental and historical effects of the creation of the atomic bomb this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone even if only a few are empowered to manage it Rosemary B Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee Knoxville which hosted the conference that formed the basis of this volume He is the author of *Remembering War the American Way* and *World War II in the American Soldiers Lives Series* as well as the coeditor with John Whiteclay Chambers II of *Major Problems in American Military History* *Endkampf* Stephen G. Fritz, 2004-10-08 At the end of World War II Gen Dwight D Eisenhower fearing that retreating Germans would consolidate large numbers of troops in an Alpine stronghold and from there conduct a protracted guerilla war turned U S forces toward the heart of Franconia ordering them to cut off and destroy German units before they could reach the Alps Opposing this advance was a conglomeration of German forces headed by SS Gruppenführer Max Simon a committed National Socialist who advocated merciless resistance Under the direction of officers schooled in harsh combat in Russia the Germans succeeded in bringing the American advance to a grinding halt Caught in the middle were the people of Franconia Historians have accorded little mention to this period of violence and terror but it provides insight into the chaotic nature of life while the Nazi regime was crumbling Neither German civilians nor foreign refugees acted simply as passive victims caught between two fronts Throughout the region people pressured local authorities to end the senseless resistance and sought revenge for their tribulations in the liberation that followed Stephen G Fritz examines the predicament and outlook of American GI s German soldiers and officials and the civilian population caught in the arduous fighting during the waning days of World War II *Endkampf* is a gripping portrait of the collapse of a society and how it affected those involved whether they were soldiers or civilians victors or vanquished perpetrators or victims **Living with War** Robert Teigrob, 2016-01-01 In *Living with War* Robert Teigrob examines how war is experienced and remembered on both sides of the 49th parallel *The Elusive Eden* Richard B.
