Loving A Psychological Approach:

Loving: a Psychological Approach Howard Lee Miller, Paul S. Siegel, 1972 **The Psychology of Love** Robert J. Sternberg, Michael L. Barnes, 1988-01-01 Psychologische studie over het verschijnsel liefde **Psychology of Love 101** Karin Sternberg, 2014 Print CourseSmart *Handbook of the Sociology of Emotions* Jan E. Stets, Jonathan H. Turner, 2007-10-10 Since the 1970s the study of emotions moved to the forefront of sociological analysis This book brings the reader up to date on the theory and research that have proliferated in the analysis of human emotions The first section of the book addresses the classification the neurological underpinnings and the effect of gender on emotions The second reviews sociological theories of emotion Section three covers theory and research on specific emotions love envy empathy anger grief etc The final section shows how the study of emotions adds new insight into other subfields of sociology the workplace health and more The Science and Theology of Godly Love Matthew T. Lee, Amos Yong, 2012-06-15 Arguing that there are ways to move beyond the limitations of methodological atheism without compromising scientific objectivity the essays gathered in *The Science and Theology of Godly Love* explore the potential for collaboration between social science and theology They do so within the context of the interdisciplinary study of Godly Love which examines the perceived experience of loving God being loved by God and thereby being motivated to engage in selfless service to others This volume serves as an introduction to and a call for further research in this new field of study offering ten methodological perspectives on the study of Godly Love written by leading social scientists and theologians Drawing on the work of Douglas Porpora and others the contributors contend that agnosticism is the appropriate methodological stance when religious experience is under the microscope Godly Love does not force a theistic explanation on data instead these essays show that it sensitizes researchers so that they can take seriously the faith and beliefs of those they study without the assumption that these theologies represent an incontestable truth *The New Psychology of Love* Robert J. Sternberg, Karin Sternberg, 2019 This is a much needed update on the latest theory and research on love supplied by leading scientific experts It is suitable for psychologists neuroscientists anthropologists sociologists and anyone with an interest in love and what has been learned from scientific studies of it **The Right To Be Loved** S. Matthew Liao, 2015-10-29 S Matthew Liao argues here that children have a right to be loved To do so he investigates questions such as whether children are rightholders what grounds a child's right to beloved whether love is an appropriate object of a right and other philosophical and practical issues His proposal is that all human beings have rights to the fundamental conditions for pursuing a good life therefore as human beings children have human rights to the fundamental conditions for pursuing a good life Since being loved is one of those fundamental conditions children thus have a right to be loved Liao shows that this claim need not be merely empty rhetoric and that the arguments for this right can hang together as a coherent whole This is the first book to make a sustained philosophical case for the right of children to be loved It makes a unique contribution to the fast growing literature on family ethics in particular on children

s rights and parental rights and responsibilities and to the emerging field of the philosophy of human rights

Thiago de Almeida, David L. Rodrigues,2025-01-16 The topic of loving relationships is one of the most important and often problematic areas of people s lives Unfortunately such importance is best perceived when relationships are unsatisfactory and or threatened by the possibility of an imminent breakup When that happens our mood our ability to concentrate our energy our work and our health among other dimensions of our lives can be profoundly affected Although contemporary love life appears to be markedly different from that of predecessor generations given the wide range of current relationships as the hook up living together separate cohabitation virtual love or even betrayal among many other forms of loving interaction we live in a time when relationships between two or more people it seems need more understanding and more accurate research However studying love scientifically is a hard task because of methodological difficulties and conceptual improprieties intrinsically related to this type of investigation Because it can be considered such a familiar concept many researchers should agree on what love is and how it can be measured But this is not what occurs After all what is love Is it as a psychological phenomenon capable of being scientifically studied by psychology The goal of this Research Topic is to Promote and disseminate publications related to what is conceived scientifically as the Psychology of Love differing from conceptions related to self help and common sense Conceptualize love through psychological science Systematize knowledge about the nature of love and related phenomena such as jealousy shyness inhibition infidelity and

other related topics Understand conceptualizations of love and relationship dynamics of people in monogamous and consensually non monogamous relationships Research the establishment and maintenance of romantic relationships and try to understand scientifically the role of love in marital satisfaction

The Psychology of Love Michele A. Paludi, 2012-03-09 From arranged marriages to online dating, this four volume work presents everything from personal accounts to empirical evidence to document what creates love in our culture as well as around the world. The field of biology views love as a hard wired mammalian drive akin to thirst and hunger. In contrast, psychology views love from a social and cultural perspective where our drive to find love and our responses to it are highly dependent on societal norms. In *The Psychology of Love*, esteemed author and educator Michele A. Paludi examines love through all lenses, thereby providing readers a deeper understanding of the ways we can express caring, sensitivity, empathy, and respect toward one another. Each chapter in this comprehensive four volume work includes a scholarly overview of empirical research and theories about the psychology of love. In addition, individuals' own definitions of love are included. Special attention is paid to accepted standards of love across a variety of cultures, the ways individuals express liking and love across the lifecycle, and patterns in dissolutions of friendships and romantic relationships, making note of gender and race differences.

Better Together: A Joined-Up Psychological Approach to Health, Well-Being, and Rehabilitation Dónal G. Fortune, Elaine L. Kinsella, Orla M. Muldoon, 2016-09-07 Health and well being is best understood in terms of a combination of biological, psychological, and social factors. But how social is the biopsychosocial model when applied to mental health and rehabilitation? Psychology has traditionally viewed health as being determined by individual behavior. An integrative psychological approach is required to draw understanding from sociology, social psychology, and politics to consider how wider systemic, structural, and contextual factors impact on health, behavior, and outcomes. This e-book is dedicated to examining collective and community approaches to well being and rehabilitation. In particular, the articles contained within this e-book are seeking to understand how social integration, social groups, social identity, and social capital influence health, well being, and rehabilitation outcomes.

The Psychology of Love and Hate in Intimate Relationships Katherine Aumer, 2016-06-23 Social psychology has made great advancements in understanding how our romantic relationships function and to some extent dissolve. The goal of this volume is to explore and illuminate some of these underrepresented aspects, such as non monogamy.
