Low Achieving Children The First Seven Years:

Low Achieving Children Sarah H. Broman, Ellen Bien, Peter Shaughnessy, 1985 Investigating and measuring risk factors and markers for low achievement in children this unique volume studies children from gestation to age seven This monograph evaluates the social biological and cognitive characteristics that served effectively as predictors and correlates of learning disabilities in normally intelligent children **Helping Low Birth Weight, Premature Babies** Ruth T.

Gross, Donna Spiker, Christine W. Haynes, 1997 Each year in the United States 250 000 infants are born too soon weighing too little For these low birth weight premature infants the future is uncertain since they are at risk for a variety of serious medical and developmental problems including behavioral and learning disorders that may have damaging effects for the rest of their lives The extent to which a comprehensive early intervention program could improve or prevent these adverse outcomes was examined in the Infant Health and Development Program a randomized controlled trial involving almost 1 000 infants in eight cities in the United States This book describes in detail the program its research methodology the progress of the program and the results of the clinical trial The program was administered by an interdisciplinary team composed of physicians biostatisticians child development specialists and researchers from several disciplines It was instituted upon the discharge of the infants from the neonatal nursery and was maintained for three years One third of the infants were randomly assigned to an intervention group the remainder to a follow up group Infants in both groups received pediatric care and community referral services but only those in the intervention group participated in a program that included extensive home visits attendance at a child development center and group meetings for parents The results of the program proved to be clinically important at age three the children in the intervention group had significantly higher IQ scores greater cognitive development and fewer behavioral problems The implications of the findings for public policy are equally important for there is increasing interest in the prevention early detection and management of developmental disabilities in children as evidenced by such legislation as the Education for All Children Act Strategies to minimize the problems of low birth weight children with their potential for long term savings through the prevention of disabilities and their attendant costs could have significant repercussions in such governmental areas as medical care education and social welfare Microorganisms and Mental Health Jonathan Savitz, Robert H. Yolken, 2023-02-21 This volume contains up to date contributions written by leading experts in the role played by various microorganisms in psychiatric and neurological illness The initial chapters present an evolutionary framework for the impact of microorganisms on behavior This is followed by historical and epidemiological perspectives of the role of viruses in psychiatric illness Subsequent chapters focus on different classes of microorganisms and psychiatric illnesses and emphasize diverse research approaches ranging from preclinical models to therapeutic interventions *Annual Progress in Child Psychiatry and Child Development, 1987* Stella Chess, Alexander Thomas, Margaret E. Hertzog, 1987-12 A selection of the year's outstanding contributions to the understanding and treatment

of the normal and disturbed child **Early Intervention** United States. General Accounting Office,1992 Develops a framework to estimate potential savings in providing early intervention services to children Using a case study it estimates the savings to Medicaid and other federal programs from providing WIC services to pregnant women in 1990 Contains recommendations to the Congress and the Secretaries of Agriculture Education and Health and Human Services

Handbook of Early Childhood Intervention Jack P. Shonkoff,Samuel J. Meisels,2000-05-22 Eighteen new chapters have been added to the 2000 edition of this valuable Handbook which serves as a core text for students and experienced professionals who are interested in the health and well being of young children It serves as a comprehensive reference for graduate students advanced trainees service providers and policy makers in such diverse fields as child care early childhood education child health and early intervention programs for children with developmental disabilities and children in high risk environments This book will be of interest to a broad range of disciplines including psychology child development early childhood education social work pediatrics nursing child psychiatry physical and occupational therapy speech and language pathology and social policy A scholarly overview of the underlying knowledge base and practice of early childhood intervention it is unique in its balance between breadth and depth and its integration of the multiple dimensions of the field

Congress. House. Committee on Appropriations. Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies,1999 **Subtypes of Learning**

Disabilities Lynne V. Feagans, Elizabeth J. Short, 2012-11-12 Although experts agree that various types of learning disabilities do exist few attempts have been made to classify learning disabled children into subtypes The editors of this collection feel that the lack of subcategorization has frustrated previous research efforts to obtain a generalizable body of knowledge in the field To meet this critical need for definitive information this book presents basic reviews and theoretical approaches used to subtype learning disabled children ranging from a behavior genetics approach to a dimensional approach It also demonstrates actual research methods utilizing theoretical approaches

Developmental Psychology and Social Change David B. Pillemer, Sheldon H. White, 2005-03-14 What is the unique mission of developmental psychology How has it evolved historically What are its current challenges The chapters in this collection present the view that research history and policy are essential and interlocking components of a mature developmental psychology Patterns of human development differ markedly across historical epochs cultures and social circumstances Major societal changes examined by contributing authors the advent of universal compulsory schooling the adoption of a one child policy in China US policy shifts in healthcare welfare and childcare present natural experiments in social design Authors challenge the idea of a clear distinction between basic and applied developmental research In sharp contrast with the view that science is value neutral developmental psychologists have from the outset pursued the betterment of children and families through educational childcare and health initiatives An historical perspective reveals the beneficial if sometimes contentious interplay between empirical research and social programs and policies

Self-regulation of Learning and Performance Dale H. Schunk, Barry J. Zimmerman, 2023-01-06 In recent years educators have become increasingly concerned with students attempts to manage their own learning and achievement efforts through activities that influence the instigation direction and persistence of those efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a range of perspectives on how students self regulate their academic functioning One purpose of that volume was to provide

theoretical direction to ongoing as well as nascent efforts to explore academic self regulatory processes Since that date there has been an exponential surge in research This second volume on academic self regulation offers the fruits of the first generation of research It also addresses a number of key issues that have arisen since then such as how self regulation differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks

Retardation in Young Children Sarah H. Broman,Paul L. Nichols,Peter Shaughnessy,Wallace Kennedy,2013-01-11 Results of the Collaborative Perinatal Project report disclose the risk factors for mental retardation found in children examined from the prenatal period to age seven Both biological and social risk factors are analyzed for both severe and mild cognitive deficits The authors of this volume investigated the etiologies of the neurological subgroups of the retarded and reveal through comparisons with non retarded groups important population factors related to normal cognitive development
