organisms *Extreme Stress and Communities: Impact and Intervention* S.E. Hobfoll, Marten W. de Vries, 2013-06-29
Extreme Stress and Communities Impact and Intervention is the first volume to address traumatic stress from a community perspective The authors drawn from among the world s leaders in psychology psychiatry and anthropology examine how extreme stress such as war disasters and political upheaval interact in their effects on individuals families and communities The book is rich in both theoretical insight and practical experience It informs readers about how to adopt a community perspective and how to apply this perspective to policy research and intervention **Purpose for Living** Elizabeth Iyadi

Abaye, 2016-04-27 Elizabeth I Abaye has yet brought to us the undiluted Word of God The book PURPOSE FOR LIVING exposes Gods original master plan for the human race it brings to mind Gods purpose and mans duty to them Everyone created has a purpose God has put a gift or talent in everyone that will impact the world Through this gift one is able to walk in purpose and fulfill his or her mission on earth One can only find real fulfillment in purpose by exercising this great potential deposited in them It is expected of us all to live a purpose motivated life thereby bringing glory to the father who designed us with such a great purpose A purpose motivated life will achieve all that is deposited in him or her Your life can never be the same when you discover Gods purpose for your existence *Red Holocaust* Steven Rosefielde, 2009-12-16

Twentieth and twenty first century communism is a failed experiment in social engineering that needlessly killed approximately 60 million people and perhaps tens of millions more These high crimes against humanity constitute a Red Holocaust that exceeds the combined carnage of the French Reign of Terror Ha Shoah Showa Japan s Asian holocaust and all combat deaths in World War I and II This fascinating book investigates high crimes against humanity in the Soviet Union eastern and central Europe North Korea China Vietnam Laos and Cambodia 1929 2009 and compares the results with Ha Shoah and the Japanese Asian Holocaust As in other studies blame is ascribed to political ideological and personal causes but special emphasis is given to internal contradictions in Marx s utopian model as well as Stalinist and post Stalinist transition systems concocted to realize communist ends This faulty economic engineering forms a bridge to the larger issue of communism s historical failure The book includes a comprehensive study of the transcommunist holocaust a judicial assessment of holocaust culpability and special pleadings an obituary for Stalinism everywhere except North Korea and a death watch for contemporary communism in China Vietnam Laos Cambodia North Korea Cuba and Nepal a comparative assessment of totalitarian high crimes against humanity a call for memory as a defense against recurrent economic racial and ethnic holocausts The book will be useful to undergraduate and higher level students interested in Russian history Stalism communism North and South Korean economic performance and international affairs Steven Rosefielde is a Professor of Economics at the University of North Carolina Chapel Hill and a member of the Russian Academy of Natural Sciences

Behavioral Epidemiology and Disease Prevention Robert M. Kaplan, Michael H. Criqui, 2012-12-06 In the l nited States and in Europe there has been an increasing interest in the relationship between individual behavior and disease The

American National Academy of Sciences Hamberg Elliott and Parron 1982 through its Institutes of Medicine has estimated that as many as 50 percent of chronic disease cases can be traced to individual behaviors such as smoking diet exercise etc Similar conclusions have been reached by a variety of European investigators and institutes The World Health Organization has also expressed considerable interest in individual behavior in relation to the development of chronic disease Thus throughout the NATO countries there has been increased awareness of the relationship between behavior and disease However communication among investigators in different countries has been rather limited Further many different scientific disciplines including psychology sociology medicine microbiology statistics and epidemiology have all developed new and different literatures in this field One purpose of this book is to bring together contributions from scientists in each of these fields Much of the variance in individual health behavior occurs across countries rather than within countries Thus we can learn much from comparing behavior disease relationships across countries To date there have been few studies which have had an adequate international basis for these comparisons Interest in behavioral epidemiology is a relatively recent phenomena Thus many scientists are entering the field without uniform background experience or training This book discusses approaches common in a variety of NATO countries *A Quantitative Analysis of Regional Well-Being* Vani Kant Borooah,2020-10-14 Using data from the World Values Survey this book sheds light on the link between happiness and the social group to which one belongs The work is based on a rigorous statistical analysis of differences in the probability of happiness and life satisfaction between the predominant social group and subordinate groups The cases of India and South Africa receive deep attention in dedicated chapters on cast and race with other chapters considering issues such as cultural bias religion patriarchy and gender An additional chapter offers a global perspective On top of this the longitudinal nature of the data facilitates an examination of how world happiness has evolved between 1994 and 2014 This book will be a valuable reference for advanced students scholars and policymakers involved in development economics well being development geography and sociology **Government at a Glance 2021** OECD,2021-07-09 The 2021 edition includes input indicators on public finance and employment process indicators include data on institutions budgeting practices human resources management regulatory governance public procurement governance of infrastructure public sector integrity open government and digital government Outcome indicators cover core government results e g trust political efficacy inequality reduction and indicators on access responsiveness quality and satisfaction for the education health and justice sectors
