Culture: Raise 'low', Rethink 'high.' A Representation of the Academic Potential of So-Called 'Low' Culture Emma Buchanan, 2020-11-15 Despite or more likely due to being the culture which most affects and interacts with the masses the broad and definition evading category of popular culture remains a second class citizen in academia relegated to a position of low below a culture deemed high and worthy of scholarly inquiry This eclectic collection of essays aims to convince that this inequality must be addressed by exploring a variety of supposedly low cultural types and texts through an academic lens proving that so called low culture can be a valuable contribution to academic research That said raising the low does not mean making it high turning it into an elite category to be accessed only by experts Rather the authors are unswerving in their approach that academic writing and fan writing are not mutually exclusive On the contrary it is their knowledge and passion as fans of their subject matter that has inspired their chapters all of which draw upon their considerable experience of engaging as fans in what they discuss All the chapters have been

written by postgraduate students seeking to inspire a new empiricism through which their interests might be fully pursued in their futures as scholars Emma Buchanan is a British postgraduate researcher and television fan who is currently writing up her PhD thesis on the topic of gender and change in AMC's The Walking Dead as understood from the point of view of Jungian depth psychology

Advances in Software Engineering Changhoon Lee, 2009-11-02
As software engineering SE becomes specialized and fragmented it is easy to lose sight that many topics in SE have common threads and because of this advances in one sub discipline may transmit to another The presentation of results between different sub disciplines of SE encourages this interchange for the advancement of SE as a whole Of particular interest is the hybrid approach of combining ideas from one discipline with those of another to achieve a result that is more significant than the sum of the individual parts Through this hybrid philosophy a new or common principle can be discovered which has the propensity to propagate throughout this multifaceted discipline This volume comprises the selection of extended versions of papers that were presented in their shortened form at the 2008 International Conference on Advanced Software Engineering and Its Applications <http://www.sersc.org> ASEA2008 and 2009 Advanced Science and Technology <http://www.sersc.org> AST2009 We would like to acknowledge the great effort of all in the ASEA 2008 and AST 2009 International Advisory Board and members of the International Program Committee as well as all the organizations and individuals who supported the idea of publishing these advances in software engineering including SERSC <http://www.sersc.org> and Springer We would like to give special thanks to Rosslin John Robles Maricel O Balitanas Farkhod Alisherov Alisherovish Feruza Sattarova Yusfovna These graduate school students of Hannam University attended to the editing process of this volume with great passion
