Krause,Omer Sergi,2025-07-21 Recent studies have demonstrated that ancient Near Eastern societies considered themselves as part of one social fabric divided not by mode of life or place of residence but according to traditional associations of kin Kinship relations appear to maintain their essential integrity over long periods of time even within complex political organizations In the past it was common to view state formation as an

evolutionary process from tribe to state during which former kinship relations and tribal identities dissolve in face of the political identity imposed by the state Today however it seems that there were no evolutionary relations between the tribe and the state as they both represent identities that coexist at the same time It is against this background that a common structural element of ancient Levantine polities emerges their fragmented nature mostly based on an overarching concept of kinship This book presents studies of different polities and societies from the Bronze and Iron Ages Levant and beyond highlighting their kin based social and political structures interactions and ultimate formations as may be gleaned from both material and textual sources **At the Dawn of History: The Late Pre-Islamic Age in South-Eastern Arabia** Paul A.
