determining human behavior Del Thiessen presents this material against the broad background of everyday life allowing the reader to see the theory of evolution as it has shaped his or her own behavior However he points out that when evolutionary theory is aimed at human behavior the critics object and controversy results Thiessen argues that nothing in our lives makes sense unless we look at it through a biological lens We can thereby understand our origin our affiliation with all animals and plants and our cultural destination However we can also discover a dark side to our destiny our favoritism to those who share our own genes our ability to deceive and our capacity for abuse rape and murder Good bad and indifferent we serve the replication of our DNA Critics extrapolate evolutionary theory to a wide range of animal species and even human morphology and physiology but when the same perspective is applied to human behavior there is strong dissent What these critics fear according to Thiessen is that accepting evolutionary notions about human behavior strikes at the heart of free will self determination and social equality Bittersweet Destiny describes the heroic efforts of naturalists Charles Darwin and Alfred Wallace to unlock the secrets of evolution It continues with a vivid description of our fossil history and our chance beginnings From there the story implicates disease processes in evolution highlights our rational and irrational nature focuses on those characteristics of brain evolution and language that make us distinctive and illustrates our most basic survival and reproductive mechanisms Thiessen warns the reader that things are as they are no matter what we might wish we ignore facts and controversy at our own risk This book will be significant to anthropologists psychologists biologists and sociologists

The Implications of Evolution for Metaphysics David H. Gordon,2023-08-22 After the nineteenth century turn from idealism when idealist philosophies were largely abandoned for materialist ones many analytic philosophers have adhered to scientific naturalism as the new orthodoxy largely due to the success of scientific advancements The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind first world view In The Implications of Evolution for Metaphysics Theism Idealism and Naturalism David H Gordon explores questions such as Is it true that evolution is incompatible with theism and necessarily results in naturalism Is it possible as naturalism maintains that everything can be reduced to physical processes Or are there too many recalcitrant phenomena that defy reduction Can the epistemological conditions for metaphysical knowledge be met If the underdetermination of theory allows for multiple metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power **Pan's Travail** Johnson Donald Hughes,1994 Many people express surprise writes J Donald Hughes when they are told that environmental problems existed in the ancient world they are used to thinking of the environment as an exclusively modern concern But an examination of the evidence shows that the Greeks and Romans not only suffered from some of the same predicaments that plague the present scene but in

many cases they were aware of them and commented on them In Pan s Travail Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from exploitation of the natural world Focusing on Greece and Rome as well as on areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin He explores the complex relationships of human culture and the environment with topics that include deforestation and overgrazing soil erosion depletion of wildlife and natural resources pollution and urban problems such as water supply and sewage disposal He also compares the ancient world s environmental problems to those of other eras and discusses attitudes toward nature expressed in Greek and Latin literature
