Mackintosh Architecture Jackie Cooper, 1978 **Mackintosh Architecture; the complete buildings and selected projects; introduction by Barbara Bernard** J. Cooper, **Mackintosh's Masterwork** Charles Rennie Mackintosh, 2004

Of the many practitioners of art nouveau in Great Britain Charles Rennie Mackintosh 1868 1928 has outlasted them all His work bridged the more ornate style of the later nineteenth century and the forms of international modernism that followed Like Frank Lloyd Wright with whom he is frequently compared he is known for so thoroughly integrating art and decoration that the two became inseparable His work has been honored by a major exhibition at the Metropolitan Museum of Art and his designs have proliferated to such an extent that they can be found reproduced in posters prints jewelry and even new buildings His most important project was the Glasgow School of Art which still functions as a highly prestigious art school This glorious building is visited each year by thousands of tourists from around the world Built over a dozen years beginning in 1897 the Glasgow School of Art is Mackintosh's greatest and most influential legacy This completely redesigned and heavily illustrated edition of Mackintosh's Masterwork has been greatly expanded and contains newly discovered material about both the early life of the architect and the formative years in which his plans for the School of Art were executed **C. R. Mackintosh** David Brett, 2004-04-02 Between 1896 and 1906 Charles Rennie Mackintosh 1868 1928 produced a series of buildings and interiors in and around Glasgow of such startling invention that he immediately established himself as one of the truly great figures in early twentieth century architecture and design David Brett argues that Mackintosh's originality was grounded in a highly subjective poetics of workmanship in which the structure features interiors and furnishings of each individual building became subject to a unifying system of forms metaphors and unconscious associations The system Mackintosh evolved allowing for the formulation of an almost infinite series of ensembles After focusing on the various decorative details and interior spaces of Mackintosh's buildings the author reaches to the heart of Mackintosh's poetic system the suffused eroticism of the sleek feminine and intensely private white interiors A notable feature of this persuasive reappraisal of Mackintosh's work is the wealth of photographs by the author showing rarely featured details of buildings interiors and furnishings *Architect's Drawings A Selection of Sketches by World Famous Architects through History* , 2025-08-31 *Architect's Drawings A Selection of Sketches by Architects Through History* is a fascinating journey into the role of sketches in the design process From the Renaissance to contemporary practice this book explores how architects have used drawings not just as technical tools but as instruments of imagination inspiration and communication **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast

chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *The Oxford Dictionary of Architecture* James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available Computer-Aided Architectural Design. "Hello, Culture" Ji-Hyun Lee, 2019-06-13 This book constitutes selected papers of the 18th International Conference on Computer Aided Architectural Design Futures CAAD Futures 2019 held in Daejeon Republic of Korea in June 2019 The 34 revised full papers presented were carefully reviewed and selected from 194 submissions The papers are organized in topical sections on theory methodology and practice of architectural and interior design support systems for design decisions tools methods and implementation of urban design rethinking space and spatial behavior fabrication and materialization and shape studies

The Environmental Imagination Dean Hawkes, 2019-11-07 The Environmental Imagination explores the relationship between tectonics and poetics in environmental design in architecture Working thematically and chronologically from the eighteenth century to the present day this book redefines the historiography of environmental design by looking beyond conventional histories to argue that the environments within buildings are a collaboration between poetic intentions and technical means In a sequence of essays the book traces a line through works by leading architects of the nineteenth and twentieth centuries that illustrate the impact of new technologies on the conception and realisation of environments in buildings In this a consideration of the qualitative dimension of environment is added to the primarily technological narratives of other accounts In this second edition the book has been substantially rewritten and restructured to include further research conducted in the decade since the first edition A number of important buildings have been revisited in order to extend the descriptions of their environments and studies have been made of a number of newly studied significant buildings A completely new essay offers an environmental interpretation of Luis Barrag n s magical own house in Mexico City and the earlier studies of buildings by Peter Zumthor have been gathered into a single extended essay that includes a body of new research On the fiftieth anniversary of the publication of Reyner Banham s *The Architecture of the Well tempered Environment* the book concludes with a critical tribute to that seminal text The Environmental Imagination will appeal to academics and practitioners with interests in the history theory and technology of architecture *Architects' Drawings* Kendra Schank Smith, 2006-08-11 Sketches from prominent architects drawn from an international selection A unique insight into how architects use sketches to develop and transfer complex concepts into physical form enabling readers to improve the connection between their own ideas and designs Reveals the secrets of the most successful sketching techniques used by architects for today s designers *C.R. Mackintosh, Architectural Drawings* Charles Rennie Mackintosh, 1990
