**Rhetorics of Nordic Democracy** Jussi Kurunmäki, Johan Strang, 2010-12-07 Democracy is today a concept that is overwhelmingly positively evaluated almost everywhere A lot has been written about socio economic and cultural backgrounds of democratic regimes as well as their institutional settings By contrast not much is known about the political manoeuvres and speech acts by which democracy has been tied to particular regions and cultures in concrete historical situations This book discusses a series of efforts to rhetorically produce a particular Nordic version of democracy It shows that the rhetorical figure Nordic democracy was a product of the age of totalitarianism and the Cold War It explores the ways in which Nordic democracy was used mainly by the social democrats to provide the welfare politics with cultural and historical legitimacy and foundations Thus it also acknowledges the ideological and geopolitical context in which the Nordic welfare state was conceptualised and canonised The contributors of the book are specialists on Nordic politics and history who share a particular interest in political rhetoric and conceptual history Nordic Experiences in

**Macro-Nationalisms** Louis L. Snyder, 1984-09-21 This book is a comparative study of the meaning characteristics and development of pan movements a synonym for macro nationalisms in the last century It seeks to clarify the origins and

developments of all the important pan movements as historical phenomena Beginning with an introductory chapter defining the characteristics of nationalism per se Professor Snyder in this companion volume to his *Global Mini Nationalisms* Autonomy or Independence considers specific pan movements which have sought to combine existing nationalisms into a larger entity Pan Slavism Pan Germanism Pan Europeanism the pan movements of Turkey Pan Islamism Pan Arabism Zionism Pan Asianism Pan Africanism et al Although studies of these pan movements exist individually this is the first comparative study of macronationalisms

*The European Union, the United Nations, and the Revival of Confederal Governance* Frederick Lister, 1996-07-11 Before it became a federation the United States was briefly a confederation a much looser union composed of states rather than of peoples Unions of states to promote economic well being and to prevent war are now being revived Mr Lister analyzes modern confederalism and how it is functioning in the single market of the European Union and how it might function if the collective security system of the United Nations could be carried out as originally planned by a confederal style partnership of the world's independent states Political scientists have traditionally classified voluntary polities as confederations federations or unitary states But they have ignored the first of these classes perhaps because Alexander Hamilton wishing to mobilize support for the new federal constitution discredited not only the United States Confederation but the whole class of confederations as a viable method of governance More than 200 years later confederation as a form of governance is still under a cloud Yet it has been resurfacing largely unrecognized for what it is in the repertory of government In the treaties of Rome and Maastricht and in the collective security system of the Charter the European Union and the United Nations are already involved in forms of governance that are confederal in all but name Lister's book describes confederal governance and how such unions of states differ from intergovernmental organizations on the one hand and federations on the other Meticulously researched and carefully argued it draws upon his five years of study of confederal unions from Ancient Greece through the 19th century Germanic Confederation and the German Zollverein But his book is not a history of confederations Instead it shows how long term alliances sometimes evolve into unions of states and in time into communities of the peoples who live in those states It also shows how the ties of confederal union have been institutionalized in modern times in the EU

and how they might be institutionalized in a global collective security body L L Finally the book stresses the urgency of moving in this direction because we shall face a very serious security problem in the next century With the steady leakage of nuclear materials in Russia the non proliferation approach to controlling weapons of mass destruction appears to be breaking down Lister argues that if and when governments are confronted with this looming problem perhaps in the not too distant future the confederal model may be the one that they will need to have updated and at their disposal

**Language, Religion and National Identity in Europe and the Middle East** John Myhill, 2006-01-01 This book discusses the historical record of the idea that language is associated with national identity demonstrating that different applications of this idea have consistently produced certain types of results Nationalist movements aimed at unification based upon languages which vary greatly at the spoken level e g German Italian Pan Turkish and Arabic have been associated with aggression fascism and genocide while those based upon relatively homogeneous spoken languages e g Czech Norwegian and Ukrainian have resulted in national liberation and international stability It is also shown that religion can be more important to national identity than language but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal e g Jews Armenians Maronites Serbs Dutch and English this is demonstrated with discussions of the Holocaust the Armenian Genocide the civil war in Lebanon and the breakup of Yugoslavia the United Netherlands and the United Kingdom

official cooperation as well as responses to recent challenges such as defence and foreign policy *The Myth of Inevitable Progress* Franco Ferrarotti, 1985-02-19 Franco Ferrarotti examines the ways in which we have come to cope with the problems unforeseen by the early idealists of the industrial age Beginning with a detailed critique of the Enlightenment concept of the individual and how it compares to present day values beliefs and attitudes he proceeds to demonstrate how current technology influences the lives of individuals in the work place and in the community at large The influence of science and industrial progress on our development as human beings is critically analyzed Finally Ferrarotti gives some suggestions as to how we may find a way out of the dilemmas facing modern society and speculates on the fates of those societies currently in transition While many writers have dealt with specific aspects of the modern industrial age Ferrarotti faces squarely the general problem of the social and political impact of technologically based life *Imagined Germany* Hannu Salmi, 1999 Richard Wagner 1813 1883 has often been regarded as a symbol of Germanness Despite this view few studies have been undertaken regarding his nationalistic thinking *Imagined Germany* focuses on Wagner's idea of *Deutschtum* especially during the unification of Germany 1864 1871 Salmi discusses how Wagner defined Germanness what stereotypes ideas and sentiments he attached to it and what kind of state could realize Wagner's national ideals **Papers for the Millions** Joel H. book which detail these rights and obligations will be of interest to French historians as well as to political scientists and sociologists
