Macroeconomic Conflict Social Institutions:

Macroeconomic Conflict and Social Institutions American Economic Association. Meeting, 1985 **The Goals of Macroeconomic Policy** Martin Prachowny, 2012-11-12 Politicians win elections by promising Jobs Jobs Jobs but in practice these promises quickly fall by the wayside The Goals of Macroeconomic Policy asks why It begins with the observation that there is no convincing economic argument that full employment should be the primary objective of economic policy in all circumstances In the light of this it examines why policy has failed so consistently It explains this by a theory of the labour market which shows why most workers are happy to operate in a way which militates against full employment It then proceeds to analyse the rather dire consequences of this for the budget deficit *The Economic Impact of Conflicts and the Refugee Crisis in the Middle East and North Africa* Mr.Bjoern Rother, Ms.Gaelle Pierre, Davide Lombardo, Risto Herrala, Ms.Priscilla Toffano, Mr.Erik Roos, Mr.Allan G Auclair, Ms.Karina Manasseh, 2016-09-16 In recent decades the Middle East and North Africa region MENA has experienced more frequent and severe conflicts than in any other region of the world exacting a devastating human toll The region now faces unprecedented challenges including the emergence of violent non state actors significant destruction and a refugee crisis bigger than any since World War II This paper raises awareness of the economic costs of conflicts on the countries directly involved and on their neighbors It argues that appropriate macroeconomic policies can help mitigate the impact of conflicts in the short term and that fostering higher and more inclusive growth can help address some of the root causes of conflicts over the long term The paper also highlights the crucial role of external partners including the IMF in helping MENA countries tackle these challenges Macroeconomics and the Real World: Volume 2: Keynesian Economics, Unemployment, and Policy Roger E. Backhouse, Andrea Salanti, 2000-11-23 Since the middle of twentieth century economists have invested great resources into using statistical evidence to relate macroeconomic theories to the real world and many new econometric techniques have been employed In these two volumes a distinguished group of economic theorists econometricians and economic methodologists examine how evidence has been used and how it should be used to understand the real world Volume 1 focuses on the contribution of econometric techniques to understanding the macroeconomic world It covers the use of evidence to understand the business cycle the operation of monetary policy and economic growth A further section offers assessments of the overall impact of recent econometric techniques such as cointegration and unit roots Volume 2 focuses on the labour market and economic policy with sections covering the IS LM model the labour market new Keynesian macroeconomics and the use of macroeconomics in official documents in both the USA and EU These volumes will be valuable to advanced undergraduates graduate students and practitioners for their clear presentation of opposing perspectives on macroeconomics and how evidence should be used The chapters are complemented by discussion sections revealing the perspectives of other contributors on the methodological issues raised *"Conflict-Free" Socio-Economic Systems* Elena G. Popkova, 2019-07-04

This book analyses the role of crisis or conflicts within socio economic systems and advocates the concept of a conflict free system as the landmark of global economic development **Evolutionary Macroeconomics** John Foster, 2011 First published in 1987 Evolutionary Macroeconomics offers an evolutionary approach to macroeconomics as an alternative to contemporary new classical and Keynesian macroeconomics In order to develop such an approach an alternative view of the micro foundations of macroeconomics is presented The book begins with a commentary on the state of macroeconomics and an evaluation of attempts to redevelop its underlying vision of economic behaviour Particular attention is paid to the treatment of expectations and anticipations The second part of the book presents a behavioural framework which is compatible with an evolutionary perspective on economic behaviour The third part of the book discusses the implications of adopting an evolutionary approach to macroeconomic theory empirical methods and policy design culminating in a specific policy proposal to cure stagflation

Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control
