Macroeconomic Planning Studies In Economics:

Economic Planning Studies R. Frisch, 2012-12-06 It is probably true as the editor of these essays and studies by Ragnar Frisch points out that the majority of economists are not well aware of the contributions made to their discipline by Frisch This certainly does not apply however to econometricians In fact Frisch was one of the founding fathers of the Econometric Society and for the first decade of its existence its recognized leader in Europe The annual European meetings were inspired by his enthusiasm his unprecedented didactic talents and his amazingly diversified contributions It is also clear that those members of the Swedish Academy of Sciences who selected candidates for the Nobel Memorial Prize in Economic Science were fully aware of Ragnar Frisch's pathbreaking work when they decided to award him that famous Prize While much of Frisch's earlier work has been published in his later years of activity he hardly took the time to shape the results of his work in an optimal way for wider circulation Although an impressively lucid writer he evidently gave priority to solutions of some of the planning problems he was involved in rather than to formulating them in the characteristically crystal clear and well structured expositions of earlier years I very much welcome therefore Dr Long's initiative to make available to a wider public within the profession some of the few texts Frisch himself produced probably under pressure from his immediate friends and colleagues

Comprehensive Planning Studies: Economic analysis, 1964 Economic Factors in Urban Planning Studies Robert C. Colwell, 1966 Macroeconomic Planning Roger Bowles, David Whynes, 2015-09-25 This volume originally published in 1979 examines systematically the nature of control in both capitalist and socialist economies develops a theoretical and applied framework which can embrace both macroeconomics and planning and demonstrates the essential unity of all forms of macroeconomic planning by the consistent application of basic economic principles Firstly the authors establish why societies feel a need for government control and examine the mechanisms by which such social decisions are reached Next they examine the nature of economic data the modelling of economic systems and a review of practical policy goals and instruments The book then reviews the basic theory of optimisation and elaborates it in the context of planning for growth for stabilisation and under uncertainty It closes with an analysis of practical planning based on French and Soviet experience

Arriaga,1975 **Tools for Spatial Economic Planning** Gulelat Kebede,Paterson Gauntner,2025-09-30 Urbanization is a transformative force reshaping the economies and societies of developing countries today It has the potential to bring about powerful development dividends but the rapid expansion of cities in countries where resources are limited is a pressing policy challenge Guiding the evolving spatial and economic structure and getting policy right is an urgent and high stakes task This book bridges spatial and economic planning offering practical tools for both analysis and policymaking It explores seven national and subnational policy instruments such as National Development Plans city master plans and special economic zones detailing their purpose formulation key components and effectiveness Additionally it provides hands on guidance on a wide variety of analytical tools such as mapped overlays location quotients input output analysis multipliers metrics of inequality and segregation gravity models and scenario planning These tools can help identify spatial trends assess linkages and inform policy decisions With 26 case studies demonstrating real world applications this book serves as a resource for policymakers development practitioners and academics seeking to learn develop the field of knowledge and shape more effective spatial economic policies

Planning Theory Franco Archibugi,2008-01-29 Planning Theory expresses a sound unease about the direction taken by the current analysis and criticism of planning experiences both in the field of economics and in urban and regional planning Instead of seriously revising the technical and scientific shortcomings marking the various problems encountered in the planning experience in both fields academic debates and reflection have instead led to a kind of political interpretation On the basis of the hopelessness of improving the governance of managerial and political planning initiatives planning theory has been reduced to a generic sociological debate on planning itself a debate that freezes planning as a permanently declining engagement To oppose this the present book aims to identify the essential guidelines of a re launch of planning processes and techniques configuring a kind of neo discipline called planology by the author which builds upon a multi disciplinary integration never seen and experimented with until now of economic environmental and sociological approaches a crucial element missing in previous unsuccessful planning attempts **Regional Economic Development in the United States** United States. Office of Policy Coordination,1967 Review of Regional Economic Research and Planning on New England New England Economic Research Foundation,1967 **Economic Planning and Industrial Policy in the Globalizing Economy** Murat

Yülek,2014-09-04 This book discusses national development planning in the context of a globalized world economy National economic development planning the process of defining strategic economic objectives for a country and designing policies and institutional frameworks to attain them was popular in many countries in the 1960s and 1970s Over time it lost its appeal More recently with globalization accelerating and economic competition increasing it is making a comeback in different countries under different forms National planning in this new era is different than the earlier quantitative planning approaches It employs different tools such as strategic visions and action plans revived forms of physical infrastructure planning industrial policy and cluster policy Built on the research of international scholars with firsthand knowledge of the countries in question this volume presents and evaluates current national planning strategies and policy worldwide It will be of interest to both academicians who study and teach globalization and development as well as policy makers who may use it as a reference as they contemplate their own strategies *Regional Economic Planning* R. C. Jensen,T. D. Mandeville,N. D.

Karunaratne,2017-09-05 Originally published in 1979 Decision makers at all levels need sufficiently detailed information on regional economic structure in order to undertake consistent and comprehensive regional planning A means is put forward here elevating the impracticable regional input output method to that of an operational planning technique This development represents a system which facilitates the examination both of the economic structure of individual regions in reasonable detail and of the regional structure of the state economy The technique termed the Generation of Regional Input Output Tables GRIT is designed for general use in the production of regional input output tables and other data sources contributing towards the holistic accuracy of the table thereby providing accurate maximisation of input output tables within a given budget constraint *Tool Kit Guide for Rapid Economic Assessment, Planning, and Development of Cities in Asia* Brian H.

Roberts,2015-07-01 This tool kit provides a framework and tools for conducting rapid assessments to prepare city economic development plans in Asian cities An analytical framework guides the reader through a series of steps for three analytical and assessment processes These are designed to prepare economic profiles evaluate future economic development options and pathways and prepare strategies action plans and prioritize investment activities in support of city economic development The steps in each process are linked to tools that assist the user in collecting and analyzing data and information for a range of studies and they are also linked to assessment techniques used to prepare city economic development plans **Economic Planning and Organization in Mainland China** Kuo-chün Chao,2020-10-26 Volume 2 of

Dyker,2013-09-27 On its publication in 1985 this book offered a fresh analysis of the problems faced by the Soviet economy by focussing on the key issues in the economic planning system David Dyker considers the available options for reform during the 1980s and the most likely developments Discussing the origins of the Soviet economic planning system and the theories which founded it previous attempts to reform the organisational structure and the particular problem of

agriculture Dyker presents a picture of an increasingly bleak future for the Soviet economy This is a comprehensive title written by a renowned expert on the Soviet economy which will be of particular value to students and academics researching the political and economic development and history of the Soviet Union

Conference on Economic Analyses in Comprehensive River Basin Planning, 1968 Swedish Economists in the 1930s Debate on Economic Planning Benny Carlson, 2018-12-06 The 1930s characterised by repercussions from World War I and the Great Depression was an era of populism nationalism protectionism government intervention and attempts to create planned economies The perceived need for economic planning emerged in Sweden in part due to the increasing political strength of the Social Democrats and their evolution from a party hampered by Marxist fatalism to a pragmatic mass movement The Swedish debate continued beyond World War II and is still relevant to today's economic crises which have resulted in a demand for action coming from below populism and above elitism Carlson surveys the arguments for and against economic planning as they were put forward by leading Swedish economists in the 1930s with a focus on the thoughts of Gustav Cassel Eli Heckscher Gsta Bagge Gunnar Myrdal and Bertil Ohlin among others In so doing he provides a timely exploration of the debate on the necessary and desirable extent of state intervention in market economies

Progress Report of the Economic Development Administration United States. Economic Development Administration, 1965 Employment Location in Regional Economic Planning G. M. Lomas, P. A. Wood, 2017-09-05 Originally published in 1970 During the times of planned population movements and new towns with a growing interest in specifically regional policies by government this book considers the problems of development within regions It presents research on the facts and trends of employment generated by the regional economy and its relationship with the size and socio economic character of local workforce using the example of the West Midlands as testing ground for policy The authors come from the viewpoint of needing to develop understanding of population housing employment and communications the way our regional economy and society worked before organised de centralisation could be planned appropriately Within the field of economic planning they ask what analysis of the information available tell us about development possibilities within a region The book looks at trends in employment growth the character and distribution of manufacturing industries and service industries and the locational consequences to build a picture of the regional economic system It then considers supply and demand and measures the ways towns vary in detailed case studies
