N. Rothon, 2002 This is an overview of particulate filler production and use Each filler type has different properties and these in turn are influenced by the particle size shape and surface chemistry Filler characteristics are discussed from costs to particle morphology Practical aspects of filler grading are described and the principal filler types are outlined Filler surface modification is an important topic The main types of modifying agent and their uses are described from fatty acids to functionalised polymers An additional indexed section containing several hundred abstracts from the Rapra Polymer Library database gives useful references for further reading

**Rubber Nanocomposites** Sabu Thomas, Ranimol Stephen, 2010-04-09 Rubber Nanocomposites Preparation Properties

and Applications focuses on the preparation characterization and properties of natural and synthetic rubber nanocomposites. The book carefully debates the preparation of unmodified and modified nanofillers, various manufacturing techniques of rubber nanocomposites, structure morphology and properties of nanocomposites. The text reviews the processing characterization and properties of 0D and 2D nanofiller reinforced rubber nanocomposites. It examines the polymer filler interaction i.e. the compatibility between matrix and filler using unmodified and modified nanofillers. The book also examines the applications of rubber nanocomposites in various engineering fields which include tyre engineering. The book also examines the current state of the art, challenges and applications in the field of rubber nanocomposites. The handpicked selection of topics and expert contributions make this survey of rubber nanocomposites an outstanding resource for anyone involved in the field of polymer materials design. A handy one stop reference resource for important research accomplishments in the area of rubber nanocomposites. Covers the various aspects of preparation, characterization, morphology, properties and applications of rubber nanocomposites. Summarizes many of the recent technical research accomplishments in the area of nanocomposites in a comprehensive manner. It covers an up to date record on the major findings and observations in the field.
