Mad Travelers:

Mad Travelers Ian Hacking, 1998 It all began one morning last July when we noticed a young man of twenty six crying in his bed in Dr Pitre s ward He had just come from a long journey on foot and was exhausted but that was not the cause of his tears He wept because he could not prevent himself from departing on a trip when the need took him he deserted family work and daily life to walk as fast as he could straight ahead sometimes doing 70 kilometers a day on foot until in the end he would be arrested for vagrancy and thrown in prison Dr Philippe Tissie July 1886 Thus begins the recorded case history of Albert Dadas a native of France s Bordeaux region and the first diagnosed mad traveler or fuguer An occasional employee of a local gas company Dadas suffered from a strange compulsion that led him to travel obsessively often without identification not knowing who he was or why he traveled He became notorious for his extraordinary expeditions to such far reaching spots as Algeria Moscow and Constantinople Medical reports of Dadas set off at the time of a small epidemic of compulsive mad voyagers the epicenter of which was Bordeaux but which soon spread throughout France to Italy Germany and Russia Today we are similarly besieged by mental illnesses of the moment such as chronic fatigue syndrome and attention deficit hyperactivity disorder The debate rages about which of these conditions are affectations or cultural artifacts and which are real In *Mad Travelers* Ian Hacking uses the Dadas case to weigh the legitimacy of cultural influences versus physical symptoms in the diagnosis of psychiatric disorders He argues that psychological symptoms find stable homes at a given place and time in ecological niches where transient illnesses flourish Using the records of Dadas s physician Philippe Tissie Hacking attempts to make sense of this strange epidemic While telling his fascinating tale he raises probing questions about the nature of mental disorders the cultural repercussions of their diagnosis and the relevance of this century old case study for today s overanalyzed society

Reconsidering Historical Epistemology Matteo Vagelli, 2024-06-27 This book explores the key conceptual stakes underpinning historical epistemology The strong Anglophone interest in historical epistemology since at least the 1990s is typically attributed to its simultaneously philosophical and historical synthetic approach to the study of science Yet this account considered by critics to be an unreflective assumption has prevented historical epistemology from developing a clear understanding and definition especially regarding how precisely historical and philosophical reflections on the sciences should be combined Thus this book uniquely analyses how the problems and tensions inherent to the contemporary phase of historical epistemology can be clarified by reference to the classical French phase The archaeological method of Michel Foucault which draws on and transforms fundamental insights by Gaston Bachelard and Georges Canguilhem is used to exert an enduring influence on the field especially through the work of Ian Hacking and his philosophical cum historical analyses of styles of scientific reasoning Though this book is of great value to academic specialists and graduate students the fact it addresses questions broad in scope ensures it is also relevant to a range of scholars in many disciplines and will provoke discussion among those interested in foundational issues in history and philosophy of science Vagelli's book provides a both unique and uniquely important window into historical epistemology and its relation to contemporary philosophy of science Unique because nowhere else can one find a single work that treats the range of topics that he covers Uniquely important because Vagelli's clear concise and comprehensive survey details key interrelationships among a range of American British and European views currently in play regarding historical epistemology and philosophy of science as well as the institutional and intellectual vectors driving their associated epistemological positions Paul Roth UC Santa Cruz USA Uneasily the history and philosophy of science have bolstered and undermined each other for all too long Would history offer nothing but potted episodes to confirm or contradict transhistorical claims about science Would philosophy dismantle uncritical historicist accounts of scientific discoveries Historical epistemology offers a more integrated path at once a history of the present and a philosophy of the past Matteo Vagelli draws together the insights of the Francophone Anglophone and Germanophone traditions to give us a sparkling lucid account of seeing our standards of scientific understanding as developing across time always asking how did we come to our standards of demonstration and argument Peter Galison Harvard University USA

Travel and Artisans in the Ottoman Empire Suraiya Faroqhi, 2014-01-30 It has often been assumed that the subjects of the Ottoman sultans were unable to travel beyond their localities since peasants needed the permission of their local administrators before they could legitimately leave their villages However Suraiya Faroqhi's extensive archival research shows that this was not the case Pious men from all walks of life went on pilgrimage to Mecca slaves fled from their masters

and craftspeople travelled in search of work Faroghi shows that even those craftsmen who did not travel extensively had some level of mobility Challenging existing historiography and providing an important new perspective this book will be essential reading for students and scholars of Ottoman history Culture and Cooperation in Europe's Borderland

Jobs,2017-05-23 Even today in an era of cheap travel and constant connection the image of young people backpacking across Europe remains seductively romantic In Backpack Ambassadors Richard Ivan Jobs tells the story of backpacking in Europe in its heyday the decades after World War II revealing that these footloose young people were doing more than just exploring for themselves Rather with each step each border crossing each friendship they were quietly helping knit the continent together From the Berlin Wall to the beaches of Spain the Spanish Steps in Rome to the Pudding Shop in Istanbul Jobs tells the stories of backpackers whose personal desire for freedom of movement brought the people and places of Europe into ever closer contact As greater and greater numbers of young people trekked around the continent and a truly international youth culture began to emerge the result was a Europe that even in the midst of Cold War tensions found its people more and more connected their lives more and more integrated Drawing on archival work in eight countries and five languages and featuring trenchant commentary on the relevance of this period for contemporary concerns about borders and migration Backpack Ambassadors brilliantly recreates a movement that was far more influential and important than its footsore travelers could ever have realized **Madness in Seventeenth-Century Autobiography** K.
