Arquitectura II Marco Vitruvio Polión, 2022-05-06 El tratado del arquitecto ingeniero y tratadista Marco Vitruvio Polión es el texto de referencia para conocer de primera mano la teoría y las obras arquitectónicas grecolatinas. Con el *De Architectura* Vitruvio siglo I a C deseaba ofrecer un corpus que condensara todos los conocimientos alcanzados por la teoría arquitectónica griega, cosa que no se había hecho hasta entonces, a decir del propio autor. Además de cuestiones específicamente arquitectónicas: ordenes materiales, técnicas de construcción, tipos de edificios, el libro informa también sobre pintura y escultura griegas y romanas como artes auxiliares. El abundante contenido unido a las innegables cualidades formales otorga a esta obra una gran trascendencia y la convierte en fuente inestimable para el conocimiento de esta materia. En el Renacimiento fue un texto de primer orden para el acceso a la teoría y a las obras arquitectónicas grecolatinas. El presente volumen completa la actualizada versión castellana preparada minuciosamente por Francisco Manzanero Cano con los últimos cinco libros de los diez que tenía el original.

El jardín en la arquitectura del siglo XX Darío Álvarez, 2019-02-15 Este libro plantea una visión completa del jardín del siglo XX y sugiere los caminos de relación entre la arquitectura y el jardín en el futuro a partir de la experiencia de la cultura moderna. Esta visión general incluye análisis compositivos y espaciales de los jardines y de su relación con la arquitectura. De esta manera se ofrece con carácter exhaustivo una lectura crítica del desarrollo del jardín a lo largo de todo el siglo XX desde los proyectos del movimiento Arts and Crafts hasta las obras de Rem Koolhaas, Bernard Tschumi, Peter Eisenman, Peter Walker, West 8, etc.tera en sus diferentes escalas desde el edificio al paisaje pasando por el espacio urbano. Los ejemplos analizados se han escogido fundamentalmente por constituir aportaciones innovadoras por haber abierto caminos formales por haberse consolidado como modelos originales y por ser ejemplos muy didácticos.

Conceptos básicos de estructuras resistentes Alicia C. Cisternas, Beatriz H. Pedro, 2021-05-19 Este trabajo resume la experiencia y reflexión de muchos años. Ya desde estudiantes y luego como profesionales y docentes buscamos respuestas a cuáles son los problemas que deben resolver las estructuras resistentes vistas desde el diseño arquitectónico y como integrar esos conocimientos en el proceso de enseñanza aprendizaje de nuestra carrera. He aquí volcado nuestro aporte. Han pasado ocho años desde la primera edición de este libro y nuestro compromiso en la enseñanza de esta disciplina es ir acompañando al alumno en el constante proceso de actualización. Es por ello que sin alterar su estructura original esta nueva presentación introduce cambios que son necesarios para brindar a los estudiantes el manejo de herramientas de conocimiento teórico y acorde con el desarrollo tecnológico actual.

Chilean Modern Architecture since 1950 Fernando Pérez Oyarzun, Rodrigo Pérez de Arce, Horacio Torrent, 2010-03-15 Chilean architecture along with that of São Paulo and Mexico City sets a benchmark for the intersection of modernism with vernacular influences in Latin America Culture landscape and the geology of this earthquake prone region have all served as important filters for the practice of post 1950s design in Chile This volume introduces the modern architecture of Chile to readers in the United States Looking primarily at domestic architecture as a lens for studying the larger movement Fernando Pérez Oyarzun considers the relationship between theory and practice in Chile As he shows in his chapter during the early 1950s the School of Valparaíso offered the possibility of developing experimental projects accompanied by theoretical statements There visual artists considered poetry the starting point of modern architecture and contributed their radically modern views to the design process of the project Next Rodrigo Pérez de Arce examines the material context of architecture in Chile the availability of materials and technologies the frequency of violent earthquakes and related seismic activity and the nation's craft based labor intensive building practices He applies these considerations to a series of case studies to demonstrate how they interact with cultural historical economic and even political influences In the book's final chapter Horacio Torrent reviews the interplay between the architectonic culture and modern shapes that came into sharp focus in the 1950s in Chile In another series of case studies he highlights the formation of a system of concepts thought processes instruments and values that have given Chilean architecture a certain singularity during the last fifty years *Valparaíso School* Raúl Ríspa, Rodrigo Pérez de Arce, Fernando Pérez Oyarzún, 2003-09-02 The Valparaíso School as it became known acquired an international reputation for its radical stance and its commitment to dialogue between architects and other disciplines Since 1970 the Valparaíso School has focused much of its research and design activity on the Open City Ciudad Abierta project created by a group of architects artists poets and engineers with a vision of a city with no master plan no imposed ordering devices and no hierarchical networks of infrastructure Originally set up as a laboratory type environment this alternative community has since become the place of residence and work for many people Valparaíso School Open City Group provides insight into this radical experiment in urban development through a series of essays and photographs **Carlos Ferrater** Joan Guibernau, Carlos Ferrater, William J.
