Technical Automation in Classical Antiquity Maria Gerolemou, 2022-12-15 Technical automation the ability of man made or god made objects to move and act autonomously is not just the province of engineering or science fiction In this book Maria Gerolemou by taking as her starting point the close semantic and linguistic relevance of technical automation to natural automatism demonstrates how ancient literature performance and engineering were often concerned with the way nature and artifice interacted Moving across epic didactic tragedy comedy philosophy and ancient science this is a brilliant assembly of evidence for the power of automatic theatre in ancient literature Gerolemou starts with the earliest Greek literature of Homer and Hesiod where Hephaestus' self-moving artefacts in the *Iliad* reflect natural forces of motion and the manufactured Pandora becomes an autonomous woman Her second chapter looks at Greek drama where technical automation is used to augment and undermine nature not only through staging and costume but also in plot devices where statues come to life and humans behave as automatic devices In the third chapter Gerolemou considers how the philosophers of the 4th century BCE and the engineers of the Hellenistic period with their mechanical devices contributed to a growing dialogue around technical automation and how it could help its audience glance and marvel at the hidden mechanisms of self-motion Finally the book explores the ways technical automation is employed as an ekphrastic technique in late antiquity and early Byzantium

Architectures of Violence Kate Ferguson, 2022-05-01 Paramilitary or irregular units have been involved in practically every case of identity-based mass violence in the modern world but detailed analysis of these dynamics is rare Exploring the case of former Yugoslavia the genocides in Rwanda and Darfur and the ongoing violence in Syria Kate Ferguson exposes the relationships between paramilitaries state commands local communities and organized crime She presents these architectures of violence as a way of comprehending how the various structures of command and

control fit together into domestic and international webs of support enabling and encouraging irregular and paramilitary violence. Visible paramilitary participation in modern mass atrocities has succeeded in masking the continued dominance of the state in a number of violent crises. Irregular combatants have participated so significantly in committing atrocity crimes because political elites benefit from using unconventional forces to fulfil ambitions that violate international law and international policy responses are hindered when responsibility for violence is ambiguous. Ferguson's inquiry into these overlooked dynamics of mass violence unveils substantial loopholes in current atrocity prevention architecture. Until these are addressed, state authorities will likely continue to use irregular combatants as perpetrators of atrocity.
