A History of the World in 12 Maps Jerry Brotton, 2013-11-14. A New York Times Bestseller. Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause. Rich and beautiful. Wall Street Journal. Throughout history, maps have been fundamental in shaping our view of the world and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world; they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again. A fascinating and panoramic new history of the cartographer's art. The Guardian. The intellectual background to these images is conveyed with beguiling erudition. There is nothing more subversive than a map. The Spectator. A mesmerizing and beautifully illustrated book. The Telegraph.

Navigations Malyn Newitt, 2023-07-14. A critical reassessment of world-shaping Portuguese voyages of discovery that places these quests in historical context. The lasting impact of historic Portuguese voyages of discovery is unquestionable. The slave trade, the diaspora of the Sephardic Jews and the intercontinental spread of plants and animals all make clear these voyages' long-term global significance. Navigations reexamines these Portuguese quests by placing them in their medieval and Renaissance settings. It shows how these voyages grew out of a crusading ethos as well as long-distance trade with Asia and

Africa and developments in map making and ship design Malyn Newitt also narrates these voyages of discovery in the framework of Portuguese politics describing the role of the Portuguese ruling dynasty including its female members in the flowering of the Portuguese Renaissance the creation of the Renaissance state with its distinctive ideology and in the cultural changes that took place within a wider European context *Captain Cook and the Pacific* John McAleer, Nigel

Rigby, 2017-01-01 British Royal Navy Captain James Cook's voyages of exploration across and around the Pacific Ocean were a marvel of maritime achievement and provided the first accurate map of the Pacific The expeditions answered key scientific economic and geographic questions and inspired some of the most influential images of the Pacific made by Europeans Now readers can immerse themselves in the adventure through the collections of London's National Maritime Museum which illuminate every aspect of the voyages oil paintings of lush landscapes scientific and navigational instruments ship plans globes charts and maps rare books and manuscripts coins and medals ethnographic material and personal effects Each artifact holds a story that sheds light on Captain Cook the crews he commanded and the effort's impact on world history Showcasing one of the richest resources of Cook related material in the world this publication invites readers to engage with the extraordinary voyages manifested in material culture and their continuing significance today Hollis Frampton

Michael Zryd, 2023-05-09 Hollis Frampton was an American filmmaker photographer and theorist who bridged the experimental film and contemporary art worlds in the 1960s and 1970s Best known for avant garde films including *Zorns Lemma* 1970 and *nostalgia* 1971 Frampton spent his later years working on the unfinished epic *Magellan* a monumental cycle that used the metaphor of Ferdinand Magellan's circumnavigation of the world to rethink the natures and meanings of history modernity and cinema Frampton's career was cut short by cancer at age 48 with his vast ambitions for the project left incomplete This book is a groundbreaking and comprehensive account of this remarkable figure's work in its totality from Frampton's earliest films through *Magellan* Michael Zryd explores the connections linking Frampton's art and thought to other media forms histories and cultural frameworks He foregrounds Frampton's notion of the infinite cinema which redefined the parameters of the medium to encompass all forms of moving image and sound media across the past and future of cinematic possibility Zryd analyzes Frampton's ambivalent relationship with modernism and the Enlightenment showing how the artist navigated between attraction to radical artistic investigation and awareness of this tradition's implication in colonialism and other oppressive power structures Shedding new light on Frampton's project of exploring and critiquing how cinema attempts to capture and understand the world this book also considers his significance for contemporary art **The**
