For mostly political reasons there is no formal process for cataloging or registering new varieties or cultivars of these important plants which sell in the billions per year. In 2013 the Open Registration Of Cultivars OROC aka Oh rock program was created to provide a worldwide guide to new hardy herbaceous plants. This Fall 2018 edition provides 77 pages of plant descriptions, images and links to buy to study the new plants in the public interest. It is 100% free. Container Plants Ray Rogers, 2010-09-15 Container gardening is ideally suited to today's lifestyles; it provides the excitement, versatility and variety of in-the-ground gardening to those with limited space, time and resources. But in order to make the most of container gardening, aspiring gardeners, whether rank beginners or seasoned veterans, need to know precisely which plants perform best in containers, just as importantly they need to know how to grow them well. Author Ray Rogers is the ideal guide to this world of colorful possibilities. An award-winning container gardener and horticulturist, he profiles more than 500 outstanding plants in 180 genera. Along with Rogers's engaging descriptions, the entries include each plant's height and spread, light, moisture, temperature and soil requirements, ease and rate of growth, principal interest and design attributes, potential problems and best method of propagation. To this abundance of useful information, Rob Cardillo's stunning photographs add a wealth of visual inspiration. Success with container gardening isn't always instantly achieved; it's easy to be seduced by brightly flowering plants at a nursery or garden center that turn out to be unsuited to the growing conditions provided for them or that make poor companions for their pot mates. Even a brief dip into this authoritative reference

however is sure to yield a host of plants that will show just how spectacular a well grown and carefully chosen container garden can be
