Magic And Perception The Art And Science Of Fooling The Senses:

Magic and Perception Bob Friedhoffer, 2019-06-05 An excerpt from CHAPTER ONE WHAT IS PERCEPTION When I first started doing magic tricks I thought it was awesome that I could fool people I could do things they couldn't do Not only couldn't they do them they couldn't figure out how to do them Being the nosy kind of guy I am I wanted to know how and why people get fooled If I knew that I thought maybe I'd become a better magician So I started studying different things both in school and out things such as acting stagecraft and the history of magic and science It dawned on me after a while that there are many scientific reasons for why magic fools people Some of them have to do with laws of physics which I've discussed at length in some of my other books Others are based on principles of chemistry and biology which I've touched on in other books But quite a few of the reasons have to do with the science of the mind better known as psychology and the science of the brain neurology These are the areas this book concentrates on

Magic and Perception Robert Friedhoffer, 1996 Presents step by step instructions for a variety of magic tricks explaining how the tricks work by affecting people's perceptions

Stone journalist and part time conjurer is here to amaze you But first he had to amaze his fellow magicians Fooling Houdini is his fascinating revealing and nailbiting account of his attempt to win the 23rd World Championships of Magic the Magic Olympics the largest and most prestigious competition of its kind Alex Stone managed to qualify for entry and began preparing to astonish people who astonish others for a living It didn't help his nerves that he was placed on the bill straight after Canadian magician Shawn Farquhar winner of more magic competitions than anyone in history Stone's preparations and participation provide his readers with in depth exploration of the world of magic and magic's meaning He spills many professional secrets arguing that what is important is to ask questions about what lies behind the tricks how the mind perceives the world and parses everyday experience about how the mind works and why sometimes it doesn't about why people need to believe As we become more attuned to the limits of our own perception we become better at distinguishing reality from illusion at reading the angles and decoding the fine print he says We gain intuition and understanding into how people behave We even learn ways to influence this behavior This makes us less susceptible to all manner of deception It is to gain and maintain this sixth sense that Alex Stone a schoolboy prestidigitator has continued performing magic well into adulthood In Fooling Houdini he takes us into that other world populated by truly astounding characters and leaves us with a heightened sense of awareness about the supposedly real world **Books in Print** ,1991 *Coaching mit Magie*
