Introduction

There are several other basic concepts in political science in addition to the major ones: state and power. These other concepts are very essential to the understanding and operation of state and power in politics and political science. Hence, sovereignty is designed to assert the character of “public power to make and enforce laws for the purpose of maintaining law and order in the society”[CITATION Gam631 \l 2057]. In line with the definition of Gamble (1963), is Alan’s (1986) submission that sovereignty is best defined as “constitutional independence of a state”. Similarly, whereas Robertson (1993) defined sovereignty as “independent rule by a country or institution over a certain territory or set of political concerns”; Rourke and Boyer (2002) describes it as “political independence from any higher authority”; while Karen (1999) explained it as “the authority of the state, based on recognition by
