New South Wales Linking Australia To The World:

Linking Australia's Landscapes James Fitzsimons, Ian Pulsford, Geoff Wescott, 2013-06-05 Networks of land managed for conservation across different tenures have rapidly increased in number and popularity in Australia over the past two decades. These include iconic large scale initiatives such as Gondwana Link, the Great Eastern Ranges Initiative, Habitat 141 and the South Australian NatureLinks as well as other landscape scale approaches such as Biosphere Reserves and Conservation Management Networks. Their aims have been multiple: to protect the integrity and resilience of many Australian ecosystems by maintaining and restoring large scale natural landscapes and ecosystem processes to lessen the impacts of fragmentation; to increase the connectivity of habitats to provide for species movement and adaptation as climate changes; and to build community support and involvement in conservation. This book draws out lessons from a variety of established and new connectivity conservation initiatives from around Australia and is complemented by international examples. Chapters are written by leaders in the field of establishing and operating connectivity networks as well as key ecological and social scientists and experts in governance. *Linking Australia's Landscapes* will be an important reference for policy makers, natural resource managers, scientists and academics, and tertiary students dealing with issues in landscape scale conservation, ecology, conservation biology, environmental policy, planning and management, social sciences, regional development, governance and ecosystem services.

Sydney & Australia's New South Wales Holly Smith, 2011-04-15 Following is an excerpt from this extensive little wonder with attractions ranging from famous museums, gardens and zoos to dozens of dazzling beaches. And the activities are endless: Bush hiking and bike tracks, harbor cruises and water excursions and high powered flights above the whole scene. In short, Sydney is the country's showpiece for holiday and adventure. The continent's most active port city, Sydney actually sits inland of the Pacific, around nine miles (15 km) inland from the coast along the Port Jackson waterway, which itself is carved into numerous smaller islands and bays. Surrounding the harbor are great patches of pine and semi-tropical forests which quickly lead up into the bumpy foothills of the Great Dividing Ranges. This is eucalyptus territory where the arid environment of blue gums is colored by a heated haze given off from the leaves; hence the region's name, OCo the Blue Mountains. Also of the more than 70 national parks throughout New South Wales, more than a handful are settled right around Sydney itself: OCo the coastal Royal National Park, the northern Wollemi National Park and the western Blue Mountains National Park among them. With its diverse personalities, multicultural flavors and sophisticated yet down to earth airs, Sydney offers something for every traveler. It's a place where history, culture, activities and adventure are blended into a well-run and engaging metropolis where locals take pride in their heritage and guests are welcomed like friends. Massive transport systems provide a choice of city-wide links that are clean, quick and cheap. Food runs from simple Australian to worldly gourmet, and endless accommodation options spread from ocean to mountains. With 224 million acres (80 million plus hectares), the large state of New South Wales has a continually changing landscape which delves into some of

Australia's best scenes The classic golden sand beaches form a string along the east coast getting more tropical the farther north you travel toward Queensland or becoming more rocky and chilled the farther south you head toward Victoria The mighty Murray River forms the southern border stretching a watery band of blue along the northern edge of Victoria and providing sustenance to some of both states richest farms grazing grounds and wine regions The Darling and Murrumbidgee also feed the dry western plains and offer a string of charming settlements to explore along their edges The Great Dividing Range runs parallel to the continent's edge curving down all the way from the far north tip of Queensland through New South Wales and on down to Melbourne Included within the peaks are the Blue Mountains just outside of Sydney as well as the Snowy Mountains in the far south of the state And the mountains are indeed a dividing factor in the country's atmosphere not only in visual landscape from eastern beaches to western plains and deserts they also form a border between the balmy ocean settings and the scorched western Outback Fertile farmlands and orchards are tucked into the folds of the mountains while the state's famous vineyards spread out through the glistening river valleys
