Rationality And Relativism In Search Of A Philosophy And History Of Anthropology:

Rationality and Relativism I.C. Jarvie, 2015-07-03 Anthropology revolves round answers to problems about the nature development and unity of mankind problems that are both philosophical and scientific In this book first published in 1984 Professor Jarvie applies Popper's philosophy of science to understanding the history and theory of anthropology Jarvie describes how the ancient view that the aim of science and philosophy was to get at the truth is challenged in anthropology by the doctrine of cultural relativism that is that truth varies with the cultural framework He shows how philosophers as various as Peter Winch W V O Quine W T Jones Nelson Goodman and Richard Rorty were influenced by this doctrine Yet these philosophers also accept the value of rational argument Jarvie believes that there is a contradiction between relativism and any notion of human rationality that centres around argument Forced by the contradiction to choose between rationality and relativism he argues strongly that logical scientific and moral considerations favour rationality and urge repudiation of relativism The central argument of the book is that relativism is intellectually disastrous and has fostered intellectual attitudes from which anthropology still suffers

Postcolonial Theory and the Making of Hindu Nationalism Meera Nanda, 2025-06-06 This book tells the story of two strange bedfellows the Postcolonial Left and the Hindu Right It argues that the Postcolonial Left's relentless attacks on the epistemic violence of Western norms of rationality and modernity are providing the conceptual vocabulary for the Hindu Right's project of decolonizing the Hindu mind The postcolonial project of provincializing Europe is widely shared by the Hindu Right and harks back to the Hindu revivalist movements of the nineteenth century This book argues that postcolonial thought in India bears a strong family resemblance in context and content with the conservative revolution that brought down the Weimar Republic in Germany before the Nazi takeover Both an intellectual history of India through the last half century and a critical engagement with postcolonial theory this book will be of interest to scholars of South Asia and the humanities and social sciences at large

The Church and Cultures Louis J. Luzbetak, 2015-03-31 Why should the church be concerned about cultures Louis J Luzbetak began to answer this question twenty five years ago with the publication of *The Church and Cultures An Applied Anthropology for the Religious Worker* Reprinted six times and translated into five languages it became an undisputed classic in the field Now by popular demand Luzbetak has thoroughly rewritten his work completely updating it in light of contemporary anthropological and missiological thought and in face of current world conditions Serving as a handbook for a culturally sensitive ministry and witness *The Church and Cultures* introduces the non anthropologist to a wealth of scientific knowledge directly relevant to pastoral work religious education social action and liturgy in fact to all forms of missionary activity in the church It focuses on a burning theological issue that of contextualization the process by which a local church integrates its understanding of the Gospel text with the local culture context

The Missiological Implications of Epistemological Shifts Paul G. Hiebert, 1999-01-01 This book explores the question of epistemology or theory of knowledge and its impact upon how we view and do missions in

today's world What must a new convert know or believe How do they know How can we translate and communicate Christian teachings interculturally without distorting the message How should we do missions in an anti colonial postmodern era characterized by religious relativism and accusations of Christian imperialism In struggling with these questions Paul Hiebert focuses on the epistemological foundations that underlay them He examines three specific theories of knowledge positivism instrumentalism idealism and critical realism In the end he sides with the latter because it avoids the arrogance and colonialism implicit in positivism and the relativism of instrumentalism idealism Critical realism Hiebert argues strikes a kind of middle ground between the emphasis upon objective truth and the subjective nature of human knowledge It allows for a real world that exists independently from human perceptions and opinions of it restores emotions and moral judgments as essential parts of knowing and creates the conditions for knowing persons intimately and as fully human all of the which have important implications for Christian mission in the modern world

The Critical Margolis Joseph Margolis, 2021-06-01 Pragmatism's revival since 1980 can be credited to several thinkers among them the longtime professor of philosophy at Temple University Joseph Margolis The Critical Margolis collects within one volume more than a dozen of his essential writings allowing readers to become familiar with his important contributions to core areas of philosophy where he has controversially challenged scientific analytic and continental traditions During a period when sharp divides animate intellectual debates realism or idealism matter or mind causality or freedom machines or persons facts or values cognition or emotion and the like Margolis dissolves false dichotomies and reconstructs philosophy itself Prominent philosophers of the second half of the twentieth century from Quine Danto and Putnam to Derrida Rorty and Brandom along with a host of similarly significant thinkers are targets of Margolis's critiques If there could be a comprehensive volume of pragmatism for today and tomorrow The Critical Margolis shall serve

Nearly Out of Heart and Hope Miles Fairburn, 1995 Based on the 800 000 word diary of James Cox an itinerant labourer living in New Zealand between 1880 and 1925 a rare record of the daily life of a permanent member of the colonial working class Back cover

Prehistories of the Future Elazar Barkan, Ronald Bush, 1995 Examining the emergence of modernism from the fin de siècle primitivist project this volume shows how ethnographic materials shaped a variety of high and low discourses ethnology social theory gender construction classical scholarship as well as travel photography at the turn of the century Illustrated with 98 photographs and drawings

The Territories of Human Reason Alister E. McGrath, 2019-01-03 Our understanding of human rationality has changed significantly since the beginning of the century with growing emphasis being placed on multiple rationalities each adapted to the specific tasks of communities of practice We may think of the world as an ontological unity but we use a plurality of methods to investigate and represent this world This development has called into question both the appeal to a universal rationality characteristic of the Enlightenment and also the simple modern postmodern binary The Territories of Human Reason is the first major study to explore the emergence of multiple situated rationalities It focuses on the relation of the

natural sciences and Christian theology but its approach can easily be extended to other disciplines It provides a robust intellectual framework for discussion of transdisciplinarity which has become a major theme in many parts of the academic world Alister E McGrath offers a major reappraisal of what it means to be rational which will have significant impact on older discussions of this theme He sets out to explore the consequences of the seemingly inexorable move away from the notion of a single universal rationality towards a plurality of cultural and domain specific methodologies and rationalities What does this mean for the natural sciences For the philosophy of science For Christian theology And for the interdisciplinary field of science and religion How can a single individual hold together scientific and religious ideas when these arise from quite different rational approaches This groundbreaking volume sets out to engage these questions and will provoke intense discussion and debate

Strategies of Sanity and Survival Jussi Hanska,2002-06-17 It is an unusual book in many respects It is a specific study based on original and in most cases unedited sources but it can also be read as a general introduction It crosses boundaries between different fields of learning and traditionally accepted time periods of history Even if it is essentially a book on medieval man it stretches far beyond the middle ages as conventionally understood The final chapter traces the slow disappearance of the medieval mentality until the early nineteenth century

Moral Passages Kathryn Pyne Addelson,2020-07-20 Originally published in 1994 asks how moral theories whether traditional or feminist are made a reality Using detailed examples to bring moral norms to light the book addresses historical cases and contemporary social problems such as teen pregnancy contraception abortion and gay rights Her in depth study of Margaret Sanger s early work on birth control shows how the knowledge of birth control as well as the action of abortion was and still is declared deviant and reveals the collective nature of both morality and knowledge

Rereading Cultural Anthropology George E. Marcus,1992 During its first six years 1986 1991 the journal Cultural Anthropology provided a unique forum for registering the lively traffic between anthropology and the emergent arena of cultural studies The nineteen essays collected in *Rereading Cultural Anthropology* all of which originally appeared in the journal capture the range of approaches internal critiques and new questions that have characterized the study of anthropology in the 1980s and which set the agenda for the present Drawing together work by both younger and well established scholars this volume reveals various influences in the remaking of traditions of ethnographic work in anthropology feminist studies poststructuralism cultural critiques and disciplinary challenges to established boundaries between the social sciences and humanities Moving from critiques of anthropological representation and practices to modes of political awareness and experiments in writing this collection offers systematic access to what is now understood to be a fundamental shift still ongoing in anthropology toward engagement with the broader interdisciplinary stream of cultural studies Contributors Arjun Appadurai Keith H Basso David B Coplan Vincent Crapanzano Faye Ginsburg George E Marcus Enrique Mayer Fred Meyers Alcida R Ramos John Russell Orin Starn Kathleen Stewart Melford E Spiro Ted Swedenburg Michael Taussig Julie Taylor Robert Thornton Stephen A Tyler Geoffrey M White

Catholic Pentecostalism and the Paradoxes of Africanization Ludovic Lado, 2009 Through an ethnographic study of a Charismatic movement in Cameroon and Paris the book explores the dialectics between a Pentecostalization TM and a Africanization TM within contemporary African Catholicism It appears that both processes pursue although for different purposes the missionary policy of dismantling local cultures

Reconstructing Prehistory James A. Bell, 1994 A bold new method of theorizing about the prehistoric past

Irony of Theology and the Nature of Religious Thought Donald Wiebe, 1991 Donald Wiebe critically examines the pervasive assumption that theology is a form of religious thought that is both compatible with and supportive of religious faith The irony he argues is that theology is in fact detrimental to religion and the religious way of life

Islams and Modernities Aziz Al-Azmeh, 2020-05-05 Islam has become the new spectre haunting Europe All too often even well meaning liberals portray the modern resurgence of Islam as the new Green Menace intolerant medieval and barbaric which has replaced Communism as the main threat to Western civilization and values For Aziz Al Azmeh this Orientalist and racist view of Islam is nothing but the mirror image of the myths propagated by Islamic fundamentalists and radicals Both views share an erroneous and ahistorical conception of Islam as an unchanging and monolithic entity Surveying both its social origins and its intellectual genealogy Al Azmeh rethinks the relationship between Islam and the West uncovering a rich actual history of interaction In this expanded new edition the author examines the discourse surrounding Islamism and irrationalism after 9 11

Popper and His Popular Critics Joseph Agassi, 2014-05-14 This volume examines Popper s philosophy by analyzing the criticism of his most popular critics Thomas Kuhn Paul Feyerabend and Imre Lakatos They all followed his rejection of the traditional view of science as inductive Starting from the assumption that Hume s criticism of induction is valid the book explores the central criticism and objections that these three critics have raised Their objections have met with great success are significant and deserve paraphrase One also may consider them reasonable protests against Popper s high standards rather than fundamental criticisms of his philosophy The book starts out with a preliminary discussion of some central background material and essentials of Popper s philosophy It ends with nutshell representations of the philosophies of Popper Kuhn Feyerabend and Lakatos The middle section of the book presents the connection between these philosophers and explains what their central ideas consists of what the critical arguments are how they presented them and how valid they are In the process the author claims that Popper s popular critics used against him arguments that he had invented and answered without saying so They differ from him mainly in that they demanded of all criticism that it should be constructive do not stop believing a refuted theory unless there is a better alternative to it Popper hardly ever discussed belief delegating its study to psychology proper he usually discussed only objective knowledge knowledge that is public and thus open to public scrutiny

Reflections on Europe Hans-Åke Persson, 2007 When Dutch and subsequently French voters rejected the Draft Treaty for a Constitution for Europe in Spring 2005 many voices called for a pause for reflection This book is in part a result of that moment of reflection We wanted to

contribute to the debate about Europe but crucially we sought to do so by taking a step back from the problem formation and agenda setting of Brussels For the authors of this volume one key to establishing critical distance has been the reappraisal of the historical perspective Another has been the problematisation of Europe as a space as opposed to looking for a definition of borders The authors also seek critical distance through a focus on the tension between Europe as a culture as a polity and as an economy These tensions have often been neglected or even ignored and the relationships have been seen as more or less synonymous and harmonious The aim of this volume then is two fold It wants developing a critical distance to the present Europe to contribute to the vivid academic research and debate on Europe which too often either develops distance without commenting on the present state of affairs or comments on the present without critical distance

Coping With the Gods Henk Versnel,2011-05-10 Inspired by a critical reconsideration of current monolithic approaches to the study of Greek religion this book argues that ancient Greeks displayed a disquieting capacity to validate two or more dissonant if not contradictory representations of the divine world in a complementary rather than mutually exclusive manner From this perspective the six chapters explore problems inherent in order vs variety chaos in polytheism arbitrariness vs justice in theodicy the peaceful co existence of mono and polytheistic theologies human traits in divine imagery divine omnipotence vs limitation of power and ruler cult Based on an intimate knowledge of ancient realia and literary testimonia the book stands out for its extensive application of relevant perceptions drawn from cultural anthropology theology cognitive science psychology and linguistics

The Evolution of Human Sociability Ron Vannelli,2015-09-25 How do desires and fears motivate human sociability What effect do these motivators have on reproductive social and political behaviour And crucially how might we understand them separate from preconceived notions of design or higher morality Taking these questions as a focus this book examines human evolution with the emphasis on sexual selection and the evolution of a number of human psychological processes Exploring evolutionary sexual and maturational processes along with primate fossil and geological evidence Vannelli argues that human nature can be conceptualised as species typical desires and fears derived from sexual selection during human evolution and that these are major motivators of behaviour Presenting additional evidence from the anthropology of band societies along with material from group behaviour Vannelli highlights the importance of pair bonding friendship alliance behaviour vengeance seeking and interpersonal politics in social behaviour providing a unique interdisciplinary framework for understanding human nature and the evolution of human sociability

Evolutionary Theory and Human Nature Ron Vannelli,2001-08-31 Evolutionary Theory and Human Nature is an original highly theoretical work dealing with the transition from genes to behavior using general principles of evolution especially those of sexual selection It seeks to develop a seamless transition from genes to human motivations as bio electric brain processes emotional cognitive processes to human nature propensities various constellations of emotional cognitive forces desires and fears to species typical patterns of behavior This work covers two often antagonistic fields biology and the social sciences It

should be of strong interest to anthropologists sociologists sociobiologists psychobiologists and psychologists who are interested in the question of human nature influences on social behavior
