Longman's Magazine Charles James Longman, 1905 **Longman's Magazine**, 1901 **The New Work of Educational Leaders** Peter Gronn, 2003-02-20 If there is one word to describe the issues addressed by Peter Gronn in *The New Work of Educational Leaders* it is timely. And if there is one book that education policy makers, system CEOs and education ministers should find the time to read, this is it: *Educare News*. This book is essential reading for those involved in educational leadership and policy development. This work is also valuable for those interested in the locally organized and interactionally achieved context of institutional work. *Discourse Studies in the Cultural Politics of Education* Though based in Australia, Peter Gronn shows familiarity with the British education system and this book is relevant to those in the compulsory and post-compulsory sectors interested in the themes of education leadership. *Learning and Skills Research In The New Work of Educational Leaders* Peter Gronn provides a new framework for understanding leadership practice. The work of leaders will increasingly be shaped by three overriding but contradictory themes: design, distribution and disengagement. These are the architecture of school and educational leadership. Designer leadership is the use of mandatory standards of assessment and accreditation for school leaders such as the National Qualification for Headship (NPQH) in the United Kingdom and the Interstate School Leaders Licensure Consortium (ISLLC) standards in the United States. Distributed patterns of leadership have developed in response to the intensification of school leaders' work under policy regimes of site-based and school self-management. Disengagement describes a culture of abstention in which school systems anticipate leadership succession problems such as projected shortages and recurring recruitment difficulties. *Voices Past and Present - Studies of Involved, Speech-related and Spoken Texts* Ewa Jonsson, Tove Larsson, 2020-10-15 This volume provides a diachronic and synchronic overview of linguistic variability and change in involved speech-related and spoken texts in English. While previous works on the topic have focused on more limited time periods, this book covers data from the 16th century up to the present day. The studies offer new insights into historical and present-day corpus pragmatics by identifying and exploring features of orality in a variety of registers. For readers who are new to the field, the range of approaches will provide a helpful overview; for readers who are already familiar with the field, the volume will shed light on the complexity of factors such as register, sociolinguistic variability and language attitude, thus making it a useful resource and stepping stone for further exploration. The volume celebrates the groundbreaking contributions of Professor Merja Kyt in making accessible speech-related corpus material and leading the way in its exploration. *City, Citizen, Citizenship, 400-1500* Els Rose, Robert Flierman, Merel de Bruin-van de Beek, 2024-04-26 This open access book explores how medieval societies conversed about the city and citizen in texts, visual imagery and material culture. It adopts a long-term interdisciplinary and cross-cultural perspective, bringing together contributions on the early high and later Middle Ages, covering both the medieval East and West and representing a wide variety of disciplinary angles and sources. The volume is first and foremost about medieval

perceptions and their articulation in text image and material form The principal focus is not on cities or citizenship per se but on those who used such concepts wrote about them and visualized and depicted them At the same time the book seeks to address why the city remained such a salient concept also in non urban contexts the periphery the desert the monastery and how medieval thinking on the ideal city and civic community could involve denunciation of the earthly city and its institutional trappings It thus pushes scholarly boundaries but also seeks to escape deeply entrenched notions of citizenship as either a form of political participation or legal status

Discourse Ability and Brain Damage Yves Joanne, Hiram Brownell, 2012-12-06 Nonspecialists are often surprised by the issues studied and the perspectives assumed by basic scientific researchers Nowhere has the surprise traditionally been greater than in the field of psychology College students anticipate that their psychology courses will illuminate their personal problems and their friends personalities they are nonplussed to discover that the perception of geometric forms and the running of T mazes dominates the textbooks The situation is comparable in the domain of linguistics Nonprofessional observers assume that linguists study exotic languages that when they choose to focus on their own language they will examine the meanings of utterances and the uses to which language is put Such onlookers are taken aback to learn that the learning of remote languages is a marginal activity for most linguists they are equally amazed to discover that the lion's share of work in the discipline focuses on issues of syntax and phonology which are virtually invisible to the speaker of a language Science moves in its own often mysterious ways and there are perfectly good reasons why experimental psychologists prefer to look at mazes rather than at madness and why linguists study syntax rather than Sanskrit Nonetheless it is a happy event for all concerned when the interests of professionals and non specialists begin to move toward one another and a field of study comes to address the big questions as well as the experimentally most tractable ones

Discourse Ability and Brain Damage reflects this trend in scientific research
