Loo Keng Hua Selected Papers:

Selected Papers Luogeng Hua, 1983 From the Preface by H Halberstam The unexpected arrival of Loo Keng Hua in Europe in the fall of 1978 was for many of us a romantic event a legend come to life What had long been and had seemed destined to remain merely a revered name in the mathematical annals of our times assumed suddenly the handsome presence of the man himself dignified yet jovial youthful yet wise serene yet ever questing for new achievements and we realized how very much we had missed by his thirty years absence from the international scene While the publication of theses Selecta from his writings needs no justification beyond what is in them it will I hope serve also as a way of saying a most cordial welcome back It has been an honor for me to play a small role in producing the Selecta To select only parts from the imposing whole is automatically to be wrong and it may well seem in the long run to quote loosely from a poem of Hua himself that I have repaid gifts in jade with artifacts of wood

Hua Loo-Keng Yuan Wang,1999 The distinguished mathematician Hua Loo Keng led an eventful and interesting life through a particularly difficult period in China This biography originally published in Chinese in 1995 looks in detail at the transformation of Hua from a self taught individual into a world renown mathematician Hua held a prominent position in the contemporary mathematics circle in China and thus this account of his life can be read as in invaluable historical evaluation of the development of mathematics in China especially during tumultuous events such as the Cultural Revolution and the Great Leap Forward Besides giving a vivid illustration of Hua s research work in number theory and of his attitude towards and philosophy behind the learning and teaching of mathematics the author a student and close friend of Hua s delves into the latter s tireless efforts in popularizing mathematics in China until his death in 1985 **Selected Papers Of Wang Yuan** Yuan Wang,2005-06-07 This volume presents a comprehensive collection of Wang Yuan s original important papers which are not available elsewhere since the majority of the papers were published in China Covering both pure number theory and applied mathematics this book is important for understanding Wang Yuan s academic career and also the development of Chinese mathematics in recent years since Wang Yuan s work has a wide ranging influence in China Wang Yuan is a professor and academician of the Chinese Academy of Sciences He received his honorable Doctorship from Hong Kong Baptist University He has published 70 papers and ten books Popularizing Mathematical Methods in the People's Republic of China L.K. Hua,Wang,2012-12-06 Professor Hua Loo Keng is the first person to have undertaken the task of popularizing mathematical methods in China As early as 1958 he proposed that the application of operations research methods be initiated in industrial production With his students Yu Ming I Wan Zhe Xian and Wang Yuan Professor Hua visited various transportation departments to promote mathematical methods for dealing with transportation problems and a mass campaign was organized by them and other mathematicians to advance and apply linear programming methods to industrial production in Beijing and in Shandong province However due to the fact that these methods have limited applications and their computation is rather complex their popularization and utilization in China have so far been restricted to a small number of sectors such as the above mentioned transportation departments In 1958 Hua Loo Keng proposed the use of Input Output methods in the formulation of national economic plans Apart from publicizing this method he carried out in depth research on the subject He also gave lectures on related non negative matrix theory pointing out the economic

significance of various theoretical results *My Mathematical Life* Yuan Wang, 2024-03-21 This book is an autobiographical interview with Chinese Academician Yuan Wang on his experience in mathematical research The book looks back on Wang's collaboration with his teacher Hua Loo Keng and younger scholars offering insights into fruitful cooperation in mathematical research In this book Yuan Wang's path of studying Goldbach conjecture is revealed in detail from motivation to method Then his work on algebraic number theory is traced back in a separate chapter The book ends with two chapters which introduce Wang's interest in history of mathematics and his hobbies outside of mathematical research Wang shows how a mathematician can in the same time be a historical and popular science writer and in particular a well received calligrapher The book is intended for undergraduate and graduate students studying number theory Researchers who are willing to learn from the experience of an established mathematician as well as math amateurs and general audience who are interested in Yuan Wang's life story might also find this book appealing

Mathematician And His Mathematical Work, A: Selected Papers Of S S Chern Shiu-yuen Cheng, Shiing-shen Chern, P Li, Gang Tian, 1996-09-07 This volume is about the life and work of Shiing Shen Chern 1911 one of the leading mathematicians of this century The book contains personal accounts by some friends together with a summary of the mathematical works by Chern himself Besides a selection of the mathematical papers the book also contains all his papers published after 1988

Acta Scientiarum Mathematicarum, 1983 *Guide to Information Sources in Mathematics and Statistics* Martha A. Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free

Lectures on Gaussian Integral Operators and Classical Groups Yu. A. Neretin, 2011 This book is an elementary self contained introduction to some constructions of representation theory and related topics of differential geometry and analysis Topics covered include the theory of various Fourier like integral operators such as Segal Bargmann transforms Gaussian integral operators in L^2 and in the Fock space integral operators with theta kernels the geometry of real and p -adic classical groups and symmetric spaces The heart of the book is the Weil representation of the symplectic group real and complex realizations relations with theta functions and modular forms p -adic and adelic constructions and representations in Hilbert spaces of holomorphic functions of several

complex variables This book is addressed to graduate students and researchers in representation theory differential geometry and operator theory Prerequisites are standard university courses in linear algebra functional analysis and complex analysis New Technical Books New York Public Library,1983 Number Theory and Its Applications in China Yuan Wang,1988 Emphasizes the accomplishments of Chinese number theorists during 1949 1979 a period when correspondence between China and other countries was discouraged This work presents a survey of the significant contributions of Chinese mathematicians It also reflects the developments and state of research in number theory in China **Revue Roumaine de Mathématiques Pures Et Appliquées** ,1985 **Variant Construction from Theoretical Foundation to Applications** Jeffrey Zheng,2018-12-17 This open access book presents theoretical framework and sample applications of variant construction The first part includes the components variant logic variant measurements and variant maps while the second part covers sample applications such as variation with functions variant stream ciphers quantum interference classical quantum random sequences whole DNA sequences and multiple valued pulse sequences Addressing topics ranging from logic and measuring foundation to typical applications and including various illustrated maps it is a valuable guide for theoretical researchers in discrete mathematics computing quantum and communication scientists big data engineers as well as graduate and upper undergraduate students **International mathematical news** ,1984 **Historical Dictionary of Science and Technology in Modern China** Lawrence R. Sullivan,Nancy Liu-Sullivan,2015-03-19 The Historical Dictionary of Science and Technology in Modern China provides the most up to date information on science and technology in China from the late nineteenth century to the present Special attention is given to the historical factors scientists and historical figures behind each scientific development In particular this book pays attention to the scientists who were persecuted to death or tortured during the Cultural Revolution 1966 1976 and whose scientific research was therefore tragically cut short The historical dictionary provides information on science and technology in China from the late nineteenth century to the present including a chronology introduction extensive bibliography over 700 cross referenced dictionary entries on major scientific and technological fields and sub fields entries on western scholars and educators who also impacted scientific achievements in China This book is an excellent access point for students researchers and anyone wanting to know more about the science and technology in China Twelve papers in algebra B.
