Narratives in Early Childhood Education Susanne Garvis,Niklas Pramling,2017-05-08

Over the past few decades a growing body of literature has developed which examines children's perspectives of their own lives viewing them as social actors and experts in their understanding of the world. Focusing specifically on narratives, this unique and timely book provides an analysis of these new directions in contemporary research approaches to explore the lived experiences of children and teachers in early childhood education in addition to presenting original research on children's narratives. The book brings together a variety of well-regarded international researchers in the field to highlight the importance of narrative in young children's development from local and global perspectives. While narrative is clearly understood within different countries, this is one of the first texts to build an international understanding acknowledging the importance of culture and context. It presents up-to-date research on the latest research methods and analysis techniques using a variety of different approaches in order to critically reflect on the future for narrative research and its insights into early childhood education. Narratives in Early Childhood Education will be of interest to postgraduate students, academics and researchers in early childhood education as well as early childhood professionals, government policy makers and early childhood organisations and associations.

Rod and Gun in Canada, 1915 **The School Library Manager** Blanche Woolls, Joyce Kasman Valenza, April M. Dawkins, 2023-06-15

The seventh edition of this comprehensive school library management text expands upon the role of the school librarian especially in the ever-growing digital realm and highlights the importance of school librarian leadership and outreach. In an era of budget cuts, reduced staffing and a global pandemic, it's more important than ever for new LIS professionals and established school librarians and administrators to demonstrate the value of school libraries to decision makers. This revised and updated edition of a classic text adds two well-known authors to help lead readers through the many essential management tasks and skills required to administer the successful school library program. It emphasizes the importance of the school librarian in providing digital access to information for teachers and students, describes how facilities are being modified to accommodate new resources and programming, and offers new ways to use AASL standards to evaluate programs. All chapters are updated and the text addresses such timely subjects as providing information resources when students, teachers and librarians are interacting online. A new chapter highlights the importance of the school librarian's leadership in schools, districts and communities. This invaluable textbook teaches practical skills for school library management and offers inspiration and guidance for growing LIS careers.
