Wilson, 2006-07-15 This wide ranging original account of the politics and economics of the giant military supply project in the North reconstructs an important but little known part of Civil War history Drawing on new and extensive research in army and business archives Mark R Wilson offers a fresh view of the wartime North and the ways in which its economy worked when the Lincoln administration with unprecedented military effort moved to suppress the rebellion This task of equipping and sustaining Union forces fell to career army procurement officers Largely free from political partisanship or any formal free market ideology they created a mixed military economy with a complex contracting system that they pieced together to meet the experience of civil war Wilson argues that the North owed its victory to these professional military men and their finely tuned relationships with contractors public officials and war workers Wilson also examines the obstacles military bureaucrats faced many of which illuminated basic problems of modern political economy the balance between efficiency and equity the promotion of competition and the protection of workers welfare The struggle over these problems determined the flow of hundreds of millions of dollars it also redirected American political and economic development by forcing citizens to grapple with difficult questions about the proper

Memory and Utopian Agency in Utopian/Dystopian Literature Carter F. Human Nature and

Politics in Utopian and Anti-Utopian Fiction Nivedita Bagchi, 2018-10-15 While the interest in anti utopias has exploded over the years issues of human nature rarely make it into the discussion of these works of literature Yet conceptions of human nature play a key role in both the utopian belief that the perfect political system can be achieved and in the anti utopian conviction that an ideal state is neither possible nor desirable and would simply lead to a repressive state This book examines two well known utopias and two anti utopias to draw out their conceptions of human nature and show that these conceptions are directly related to their views on politics It shows that utopians emphasize that human nature is knowable predictable and therefore open to manipulation and or suppression Anti utopians on the other hand make the claim that human nature is not entirely knowable or predictable While they worry about the power of the state to manipulate human nature they also make the case that the natural recalcitrance and unpredictability of human beings would lead inevitably to a search for freedom and individuality and therefore to a clash between the state and the individual in the supposedly ideal state Ultimately therefore these anti utopians suggest a new conception of human beings as people who value the power to choose their own ends and are unable to entirely suppress their desire for freedom These two conceptions of human nature lead to two dramatically different conceptions of politics Utopians see the possibility of manipulating human nature to create an ideal political system which synthesizes all political values and issues while anti utopians reject both the possibility and desirability of an ideal political system and make the case for providing freedom of choice for all people

The Struggle for America's Promise Claire Goldstene, 2014-04-17 In *The Struggle for America's Promise* Claire Goldstene seeks to untangle one of the enduring ideals in American history that of economic opportunity She explores the varied discourses about its meaning during the upheavals and corporate consolidations of the Gilded Age Some proponents of equal opportunity seek to promote upward financial mobility by permitting more people to participate in the economic sphere thereby rewarding merit over inherited wealth Others use opportunity as a mechanism to maintain economic inequality This tension embedded with the idea of equal opportunity itself and continually reaffirmed by immigrant populations animated social dissent among urban workers while simultaneously serving efforts by business elites to counter such dissent Goldstene uses a biographical approach to focus on key figures along a spectrum of political belief as they struggled to reconcile the inherent contradictions of equal opportunity She considers the efforts of Booker T Washington in a post Civil War South to ground opportunity in landownership as an attempt to confront the intersection of race and class She also explores the determination of the Knights of Labor to define opportunity in terms of controlling one's own labor She looks at the attempts by Samuel Gompers through the American Federation of Labor as well as by business elites through the National Association of Manufacturers and the National Civic Federation to shift the focus of opportunity to leisure and consumption *The Struggle for America's Promise* also includes such radical figures as Edward Bellamy and Emma Goldman who were more willing to step beyond the boundaries of the discourse about opportunity and question economic competition itself
