

LOWER LIMB AMPUTATIONS: A GUIDE TO REHABILITATION

GLORIA T. SANDERS

Lower Limb Amputations A Guide To Rehabilitation

Gloria T. Sanders, Bella J. May

Lower Limb Amputations A Guide To Rehabilitation:

Lower Limb Amputations Gloria T. Sanders, Bella J. May, 1986 The primary initial effort in every case of disease or injury should be to save the extremity Amputation is seldom necessary following bone and joint injuries More often it is an admission of defeat in the medical management of the patient with vascular disease In such cases it should be performed only as a last resort The longest possible lever arm consistent with primary healing should be maintained for maximum proprioceptive and kinesthetic feedback and thus rehabilitation potential

Lower Limb Amputation Adrian Cristian M. D., Adrian Cristian, 2010 Limb loss can occur due to trauma infection diabetes vascular disease cancer and other diseases Regardless of the cause it often has a profound impact on a person's life Many amputees experience feelings of loss and grief frustration in learning to walk with an artificial limb and difficulty adjusting to a new and challenging lifestyle This book provides the practical knowledge needed to cope with the many changes caused by lower limb amputation In clear accessible language it covers the medical physical and psychosocial issues and answers crucial questions such as How do I cope emotionally with the loss of a limb What steps can I take to prevent additional amputations How do I treat and care for my post surgery wound What are the best prostheses for my particular needs Can I play sports and exercise with a prosthesis And much more This unique resource aims to educate those with lower limb amputation so that they can better care for themselves and maximize their independence The practical advice tips and extensive references within its pages will help individuals meet the challenges of leading full and fruitful lives

Lower Limb Amputation Dr. Adrian Cristian, MD, 2005-09-01 Limb loss can occur due to trauma infection diabetes vascular disease cancer and other diseases Lower limb amputation is relatively common and has a profound impact on a person's life regardless of the cause Feelings of loss and grief difficulties in learning to walk with an artificial limb and readjustment to an interrupted life all pose considerable challenges Nevertheless there are countless stories of people who have successfully overcome these problems This book provides the practical knowledge needed to cope with the life changes caused by lower limb amputation It demystifies the medical process and technical jargon by using plain easily understandable language And it is the first book to combine medical prosthetic and psychosocial factors in one convenient volume including Causes of lower limb amputation especially diabetes and ways to prevent further amputation Surgical techniques for lower limb amputation Learning to walk with a prosthesis The unique challenges faced by children and elderly people living with an amputation Exercising and sports with a lower limb prosthesis And much more The outlook of this book is ultimately an optimistic one Well informed knowledgeable individuals with amputations are better able to take care of themselves and are more effective self advocates This book gives them the tools they need to forge a productive satisfying and high quality life

Limb Amputation R. Ham, L. T. Cotton, 2013-12-20 The majority of amputations in the western world today are due to vascular disease Despite the advances in surgical treatment of this disease particularly by reconstruction it is a sad fact that the number of amputations performed

in these countries each year for vascular disease is increasing Most of these amputees are elderly and their life expectancy is short so it is important that the treatment and rehabilitation that they receive is informed appropriate efficient and swift to enable them to return successfully to life in the community for their remaining years Management of this group of patients has proved to be successful only if a multidisciplinary team approach is adopted Until recently in the UK this approach sadly has only been implemented by a few centres However with the publication of the McColl report into the prosthetic and wheelchair service in 1986 interest in the care of the amputee is growing throughout the country This book covers all aspects of amputation from disease and diagnosis to rehabilitation and community discharge with emphasis on the management of the largest group the vascular lower limb amputee A team approach is described and emphasized as being essential for good results and subsequent successful return into the community The role of each of the important disciplines is described in relation to the appropriate part of the rehabilitation phase Atlas of Amputations & Limb Deficiencies, 4th edition J. Ivan Krajchich, MD, Michael S. Pinzur, MD, Benjamin K. Potter, MD, Phillip M. Stevens, MD, CPO, 2018-08-31 The leading and definitive reference on the surgical and prosthetic management of acquired and congenital limb loss The fourth edition of the Atlas of Amputations and Limb Deficiencies is written by recognized experts in the fields of amputation surgery rehabilitation and prosthetics Koenig and Schultz's Disaster Medicine Kristi L. Koenig, Carl H. Schultz, 2016-02-16 As societies become more complex and interconnected the global risk for catastrophic disasters is increasing Demand for expertise to mitigate the human suffering and damage these events cause is also high A new field of disaster medicine is emerging offering innovative approaches to optimize disaster management Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources This definitive work brings together a coherent and comprehensive collection of scientific observations and evidence based recommendations with expert contributors from around the globe This book identifies essential subject matter clarifies nomenclature and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises It also describes in depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical biological and radiological agents **Coughlin and Mann's Surgery of the Foot and Ankle - E-Book** Andrew Haskell, Michael J.
