Lower Palaeozoic Of The Middle East Eastern And Southern Africa And Antarctica:

Lower Palaeozoic of the Middle East, Eastern and Southern Africa, and Antarctica Charles Hepworth Holland, 1981
Geological Evolution of Antarctica Michael Robert Alexander Thomson, J. Alistair Crame, Janet W. Thomson, 1991-05-16
Surveys the tectonic evolution of the Antarctic crust and the palaeoenvironmental evolution of Antarctica since the Late Mesozoic
Geological Exploration in Murzuq Basin D. Worsley, 2000-12-19
The Murzuq Basin is a large intracratonic sag basin located in southwestern Libya. Exploration efforts started in this vast and remote Saharan region already in 1957 and 60 exploratory wells have been drilled to date resulting in over 20 discoveries with around 4 000 million barrels of oil in place. Most discoveries have been made in Ordovician sandstone reservoirs sourced by hot shales of the Lower Silurian Taneezuft Formation. Oil is already being produced and exported from the area but the basin's total hydrocarbon potential is still poorly understood. Recent exploration, especially the major discovery and initial development of the Giant Elephant Field, has greatly increased interest for the area's potential. Many petroleum geologists and companies now believe that the basin may well develop into a new major hydrocarbon province which will significantly contribute to Europe's energy needs in the next decades. This book presents papers from a conference held at Sebha University on the eastern margins of the Murzuq Basin in September 1998. The book continues an ongoing series of presentations of the geology of Libya but the 25 contributions herein mostly centre on the Murzuq Basin itself and on nearby areas. There are still many unresolved questions in terms of geological and hydrocarbon exploration in these difficult desert areas but the papers herein will hopefully present a first comprehensive overview of an exciting frontier exploration region. About half of the papers are directly related to hydrocarbon exploration and to source rock and reservoir development but a wide variety of other features are also described ranging from palaeontology and biostratigraphy to ore geology and water resources covering the entire geological column from the Precambrian to the Holocene. The book concludes with a bibliography covering all geological aspects of this challenging but very promising frontier area.
Antarctic Marine Geology J. B. Anderson, 1999-09-28
A comprehensive single authored book to introduce students and researchers to the marine geology of the Antarctic
Geological Atlas of Africa Thomas Schlüter, 2008-04-19
This atlas is intended primarily for anybody who is in some background for the arrangement of how the terrestrial basic geology of Africa. Its originality lies in that the atlas was done. The second chapter is devoted to the fact that the regional geology of each African country is reviewed country wise by maps for a fuller appreciation of why this work in Africa is and text a view normally not presented in textbooks worth doing. Chapter 3 provides an executive summary of regional geology. It is my belief that there has long been a need in universities and geological surveys to have a whole in the context of no political boundaries both in Africa and in the developed world for summary. The main part of the atlas lies in Chapter 4 where in summarizing geological maps and an accompanying basic alphabetical order each African country or

territory text utilising the enormous fund of knowledge that is presented by a digitized geological overview map has been accumulated since the beginning of geology and an accompanying text on its respective stratigraphical research in Africa in the mid 19 century I hope tectonics economic geology geohazards and that in part the present atlas may satisfy this need

The Ross Orogen of the Transantarctic Mountains Edmund Stump,1995-03-31 The Ross Orogen of the Transantarctic Mountains is the part of the orogenic system that formed at the Pacific continental margin of present day Antarctica According to a recent hypothesis this continental margin was created by the rifting and subsequent drift of Laurentia from Gondwana With an unparalleled breadth and depth of information this book provides a detailed synthesis of the history of the Ross orogen In doing so it incorporates classical studies with discussions of the most recent and controversial research from the international community The book also includes a comprehensive bibliography and a historical chronology of all expeditions that have worked on the Ross orogen in the Transantarctic Mountains from the first sightings by Ross in 1840 right up to the present day This review of the Ross orogen of the Transantarctic Mountains will be valuable to all geologists interested in these episodes in the Earth's history and to researchers of the geology of Antarctica

Jago,1983 The fourth international symposium on Antarctic Earth Sciences took place in Adelaide South Australia during the week 16-20 August 1982 This volume contains a record of the centenary activities celebrating Sir Douglas Mawson and the one hundred and seventy four papers that were presented by delegates for discussion over the five days Sir Douglas Mawson was part of the first team to reach the magnetic South Pole a leading geologist and scientific figure during the heroic age of Antarctic exploration The papers presented during the symposium were divided into fifteen categories covering east and west Antarctica marine land and glacial geology plate tectonics islands peninsulas climatic change and Precambrian and Cenozoic era activity The two hundred persons from sixteen countries who attended the symposium brought together a wide range of the most current expertise and research to share of which this volume provides a record

Antarctica N. Bonner,David Walton,2013-10-22 Antarctica a vast land remote from the other continents and still the least known of them all provides a unique international laboratory for science Despite the costs a growing number of countries are supporting basic scientific research on the continent and in its surrounding seas Our knowledge of life in this extreme environment although limited suggests that it is a key environment for many areas of science Potential economic developments for food and minerals as well as increasing political complications might jeopardise the present scientific accord in the future Now is the time to take stock what do we know about Antarctic ecology What are the threats and how can they be met In this volume Antarctic scientists from six countries write about the Antarctic ecosystem

Global Neoproterozoic Petroleum Systems Jonathan Craig,2009 Worldwide Neoproterozoic successions are

major hydrocarbon producers In North Africa large basins with significant surface outcrops and thick sedimentary fills are widespread These basins are now emerging as potential sources of hydrocarbons and are attracting interest both from geological researchers and the oil and gas industry This volume focuses on recent developments in the understanding and correlation of North African basin fills and explores novel approaches to prospecting for source and reservoir rocks The papers cover aspects of petroleum prospectivity and age equivalent global petroleum systems Neoproterozoic tectonics and palaeogeography sequence stratigraphy glacial events and global climatic models faunal and floral evolution and the deposition of early source rocks The broader aim is to compare with and learn from well studied Neoproterozoic successions globally including major environmental change the emergence of life the global carbon cycle and implications for hydrocarbon exploration
