Extremist Islam Kumar Ramakrishna, 2022 Since the Bali terrorist attacks in 2002 law enforcement agencies have rigorously combatted terrorist networks in Southeast Asia yet groups motivated by violent extremist interpretations of Islam remain resilient and dangerous This book shines a light on specific beliefs behaviors and policies that impact these challenges ultimately offering cutting edge effective tools for response The book begins by challenging misguided and controversial notions that depict Islam as an inherently violent religion arguing that the theological ideological amalgam of what has been called Salafabism is the more useful lens for recognizing closed minded extremist currents The book carefully distinguishes this Salafabist extremist mindset from relatively open minded Salafabist radicalism paying due attention to nonviolent extremists and the ways they can contribute to rather than reduce violent terrorist activity in the region Using poignant case studies from Malaysia Singapore the Philippines and Indonesia the book clarifies a bewildering range of terminology associated with Islamist violence and explains how imprecise and

oversimplified narratives are destructive to progress and worse empowering to terrorist organizations These chapters build up to research informed policies and rhetorical recommendations for improved outcomes With its novel insights into the root causes of extremist terrorism in Southeast Asia the ineffective policies that prohibit progress and promote unrest in this region and the avenues for positive change this book offers a comprehensive strategy for fostering theologically sound yet culturally authentic counterterrorist measures that defend the complex richly textured tapestry of culture in Southeast Asia

Values and Indigenous Psychology in the Age of the Machine and Market Alvin Dueck, Louise Sundararajan, 2024-08-07 This interdisciplinary edited collection addresses issues at the intersection of indigenous psychology market ideology values and technology The aims of this book arise from the recognition that whereas the unfolding of the agricultural revolution over thousands of years allowed for the gradual co evolution of values and technology to blossom the post industrial technological revolution is so accelerated that there has been little time for the co evolution of values To address this the chapters collected here seek to initiate a conversation that will provide the conceptual space for the evolution of values that can keep pace with contemporary developments in the machine and the market In this conversation they argue indigenous psychologies will necessarily play a central role for two reasons firstly as alternative systems of thought they enable a productive interrogation of the rationality of machine and the market and second examples of the impact of technology and the market on traditional societies hold lessons for potential future impacts on the society as a whole This timely work offers fresh insights that will appeal to students and scholars of psychology cultural and religious studies anthropology business and economics and science and technology studies

Death and the Maiden Brigid Burke, 2019-05-01 America was certainly the big winner of World War II being the last major country intact Euphoria hubris and a naive self confidence became hallmarks of the people This hubris was dented a bit in the 1950s when scandals erupted around the TV quiz shows that made everyone feel so smart and the U 2 spy incident of 1960 that revealed Americans were being lied to by the government The book argues that these two events began the credibility gap that engulfed the nation later in the 1960s and continues to haunt us to this day When the War ended the

United States still had its economy infrastructure and industry intact Taking up where the British Empire left off the powerful new America expanded its influence around the globe Suddenly light years ahead of any competitor Americans abandoned themselves to a haze of consumerism and entertainment trusting that they were safe and could not be harmed The contestants on the big money quiz shows turned out to be fakes and the respected TV executives were also revealed to be liars and cheats Far worse was yet to come The United States government was caught in a lie regarding the CIA's U 2 reconnaissance planes overflying the Soviet Union On the eve of a crucial summit meeting in 1960 the USSR knocked Gary Powers out of the sky along with plenty of incriminating hardware and data Moscow delayed revealing what it knew and Washington spent ten days denying it was a spy plane then denying that President Eisenhower was aware of it The world was turning into a very scary place and soon American schoolchildren were being taught to duck under their desks if a bomb should strike Fear began to percolate into the heart of the nation

Libraries in the Age of Mediocrity Earl Lee, 1998-01-01 I only wish I had your paper before me when I wrote *Silicon Snake Oil* Clifford Stoll Ultimately says Earl Lee libraries are involved in the quest for truth but conceptualize it in a way very different from most Library professionals pursue a philosophy of inclusion trying to have as many versions of Truth as possible in the hopes that somewhere in the mass of material something meaningful may be found by some discerning reader But in recent years the mass of data has grown to bury truth and defeat the discerning Librarians have lost sight of what is important The uncontrollable mass of data the transformation of the library to an information center the demise of the card catalog the meretriciousness of publishers offerings the dumbing down of textbooks the decision by the Library of Congress to use the OCLC online system exclusively these are all the subjects of thought provoking and unsweetened opinions welcome reminders of the rich tradition of intellectual freedom in the profession

The Banality of Suicide Terrorism Nancy Hartevelt Kobrin, 2010-03-31 Terrorist organizations have been able to market mass murder under hysteria's banner of alleged martyrdom But when it comes to understanding Islamic suicide terrorism in particular there is much more to it than martyrdom In this groundbreaking book Nancy Kobrin dismantles the psychological dynamics of suicide terrorism to help the reader gain a new perspective on one of the most destructive forces the world has witnessed to date Until now no one has explained why the mother child relationship is central to understanding Islamic suicide terrorism *The Banality of Suicide Terrorism* exposes the very ordinariness of one of the deepest yet most poorly understood causes of the suicide bomber's motivation a profound terror of abandonment that is rooted in the mother child relationship According to Kobrin this terror is so great in the would be suicide terrorist that he or she must commit suicide and mass murder in the process in order to fend off that terror of dependency and abandonment Suicide terrorists seek a return to the bond with the mother of early childhood known as maternal fusion by means of a death fusion with their enemies who subconsciously represent the loved and hated maternal figure The terrorist's political struggle merely serves as cover for this emotionally terrifying inner turmoil which can lead

down the path of ultimate destruction Images of the Modern Vampire Barbara Brodman, James E. Doan, 2013-10-04 In the predecessor to this book *The Universal Vampire Origins and Evolution of a Legend* Brodman and Doan presented discussions of the development of the vampire in the West from the early Norse draugr figure to the medieval European revenant and ultimately to Dracula who first appears as a vampire in Anglo Irish Bram Stoker's novel *Dracula* published in 1897 The essays in that collection also looked at the non Western vampire in Native American and Mesoamerican traditions Asian and Russian vampires in popular culture and the vampire in contemporary novels film and television The essays in this collection continue that multi cultural and multigeneric discussion by tracing the development of the post modern vampire in films ranging from *Shadow of a Doubt* to *Blade* *The Wisdom of Crocodiles* and *Interview with the Vampire* the male and female vampires in the *Twilight* films *Sookie Stackhouse* novels and *True Blood* television series the vampire in African American women's fiction Anne Rice's novels and in the post apocalyptic *I Am Legend* vampires in Japanese anime and finally to bring the volumes full circle the presentation of a new Irish *Dracula* play adapted from the novel and set in 1888 The Genius of the Beast Howard Bloom, 2010-05-01 Is global capitalism on its last legs Is the era of American leadership over Has the West begun a decline into a new Dark Age Does American civilization deserve to survive These are the unnerving questions raised by the Great Crash of 2009 This book presents a radically new answer insisting that global society has only begun to realize its full potential Author Howard Bloom argues that there's a hidden mandate beneath the surface of capitalism It's struggling to whisper and rumble its message to you and me That hidden imperative can lift us from economic crisis can make us a leader in the next generation economy and can dramatically upgrade our ability to empower our fellow human beings Bloom sees crisis as opportunity opportunity for the whole human race In more than eighty short fast chapters insights appear suddenly like the quick bursts of flashbulbs taking the reader on a sweeping tour of human history from the Stone Age to the present Every chapter conveys a radically new way to see the astonishing mechanism we call Western Civilization Bloom marvels at how humans have turned toxic waste into food and fuel trash into treasure and garbage into gold He shows how we've produced material miracles based on immaterial things passion persistence and fantasy He shows that what many regard as the end is just the beginning The beginning of something you've never before imagined The author explains why the secret to capitalism's next great leap does not lie in new financial tricks but in tapping things right under our noses in radically new ways that is tapping our imagination our desire to feel useful our desire to help others and our desire to be recognized for contributing to the welfare of humanity The key to next generation capitalism lies in a big picture view that's utterly unlike anything you've previously perceived A big picture view that will startle you A big picture view with which you can ignite the world get a new handle on your life and help transform society This brilliant inspirational work of daring ideas and breathtaking research offers more than hope It offers unseen levels of understanding Understanding that can literally redefine what it means to be a human being **Dark Aeon** Joe Allen, 2023-08-29 Humanity Is Consumed by Relentless

Transformation Like a thief in the night artificial intelligence has inserted itself into our lives It makes important decisions for us every day Often we barely notice As Joe Allen writes in this groundbreaking book Transhumanism is the great merger of humankind with the Machine At this stage in history it consists of billions using smartphones Going forward we ll be hardwiring our brains to artificial intelligence systems The world famous robot Sophia symbolizes a rising techno religion She takes her name from the goddess or Aeon whose fall from grace is described in the Gnostic Gospels With an academic background in both science and theology Allen confronts the paradox of what he calls good people constructing a digital abomination Dark Aeon is nothing less than a cri de coeur for humanity itself He takes us on a roller coaster ride through history and the emergence of Scientism and from government mandated mRNA vaccines to the weird visions of cyborg billionaires like Elon Musk From Silicon Valley to China these globalists visions of humanity s future exposed and described in Dark Aeon are dire and terrifying But Joe Allen argues that humanity s salvation is within our grasp Only if we refuse to avert our eyes from the impending twilight before us
