Cosmic Impact Andrew May, 2019-02-07 As end of the world scenarios go an apocalyptic collision with an asteroid or comet is the new kid on the block gaining respectability only in the last decade of the 20th century with the realisation that the dinosaurs had been wiped out by just such an impact Now the science community is making up for lost time with worldwide efforts to track the thousands of potentially hazardous near Earth objects and plans for high tech hardware that could deflect an incoming object from a collision course a procedure depicted with little regard for scientific accuracy in several Hollywood movies Astrophysicist and science writer Andrew May disentangles fact from fiction in this fast moving and entertaining account covering the nature and history of comets and asteroids the reason why some orbits are

more hazardous than others the devastating local and global effects that an impact event would produce and more optimistically the way future space missions could avert a catastrophe *Beginning Database Design* Gavin Powell,2006 From the 1 source for computing information trusted by more than six million readers worldwide **Database Modeling Step by Step** Gavin Powell,2020-01-06 With the aim of simplifying relational database modeling Database Modeling Step by Step presents the standard approach to database normalization and then adds its own approach which is a more simplistic intuitive way to building relational database models Going from basics to contemporary topics the book opens with relational data modeling and ends with BigData database modeling following a road map of the evolution in relational modeling and including brief introductions to data warehousing and BigData modeling A break down of the elements of a model explains what makes up a relational data model This is followed by a comparison between standard normalization and a more simplistic intuitive approach to data modeling that a beginner can follow and understand A brief chapter explains how to use the database programming language SQL Structured Query Language which reads from and writes to a relational database SQL is fundamental to data modeling because it helps in understanding how the model is used In addition to the relational model the last three chapters cover important modern world topics including denormalization that leads into data warehouses and BigData database modeling The book explains how there is not much to logical data modeling in BigData databases because as they are often schema less which means that BigData databases do not have schemas embedded into the database itself they have no metadata and thus not much of a logical data model Online bonus chapters include a case study that covers relational data modeling and are available at the author s web site www.oracletroubleshooter.com/datamodeling.html **Comics Shop** Maggie Thompson,2010-09-27 ESSENTIAL COMICS VALUES ALL IN COLOR COMICS SHOP is the reliable reference for collectors dealers and everyone passionate about comic books THIS FULL COLOR INDISPENSABLE GUIDE FEATURES Alphabetical organization by comic book title More than 3 000 color photos Hundreds of introductory essays Analysis of multi million dollar comics sales How covers and splash pages have evolved An exclusive photo to grading guide to help you determine your comics conditions accurately Current values for more than 150 000 comics From the authoritative staff at Comics Buyer s Guide the world s longest running magazine about comics Comics Shop is the only guide on the market to give you extensive coverage of more than 150 000 comics from the Golden Age of the 1930s to current releases and all in color In addition to the thousands of comic books from such publishers as Marvel DC Dark Horse and Image this collector friendly reference includes listings for comic books from independent publishers underground publishers and more **2010 Comic Book Checklist & Price Guide** Maggie Thompson,Brent Frankenhoff,2009-10-08 No other guide on the market covers the volume of comic book listings and range of eras as Comic Book Checklist Price Guide does in an easy to use checklist format Readers can access listings for 130 000 comics issued since 1961 complete with names cover date creator information and near mint pricing With super hero art on the cover and

Curtis, 2010-07-17 Postapocalyptic Fiction and the Social Contract We'll Not Go Home Again provides a framework for our fascination with the apocalyptic events The popular appeal of the end of the world genre is clear in movies novels and television shows Even our political debates over global warming nuclear threats and pandemic disease reflect a concern about the possibility of such events This popular fascination is really a fascination with survival how can we come out alive And what would we do next The end of the world is not about species death but about beginning again This book uses postapocalyptic fiction as a terrain for thinking about the state of nature the hypothetical fiction that is the driving force behind the social contract The first half of the book examines novels that tell the story of the move from the state of nature to civil society through a Hobbesian a Lockean or a Rousseauian lens including Lucifer's Hammer by Larry Niven and Jerry Pournelle Alas Babylon by Pat Frank Malevil by Robert Merle and Into the Forest by Jean Hegland The latter half of the book examines Octavia Butler's postapocalyptic Parable series in which a new kind of social contract emerges one built on the fact of human dependence and vulnerability
