**Ludic Picturebooks in Early Childhood Education** Cynthia Birrer, 2003-12-01 *Early Foreign Language Learning and Teaching* Marianne Nikolov, Stela Letica Krevelj, 2024-10-15 Over the past six decades the field of teaching modern foreign languages to young learners has come a long way from the early surmises about the advantages of a young start to today's widespread integration of foreign languages into curricula in public and private schools. The chapters in this book bring together internationally renowned researchers who have been vocal in establishing early language teaching and learning as an independent area of research and novice voices who represent a new generation of devoted researchers to present a state of the art volume on the topic. The authors address key questions about young learner second foreign language L2 FL development, methodological issues when conducting research with young learners, L2 FL teaching pedagogy, language education policy, technology enhanced learning and assessment. Together the chapters capture the reality of early FL development in the context of a globalized world and will be of great interest to researchers and postgraduate students of SLA and Applied Linguistics, specifically in the field of early language development and teaching languages to young learners.

*Preschool Bilingual Education* Mila Schwartz, 2018-05-23 This volume provides an up to date collection of key aspects related to current preschool bilingual education research from a socio-linguistic perspective. The focus is on preschool bilingual education in multilingual Europe which is characterized by diverse language models and children's linguistic backgrounds. The book explores the contemporary perspectives on early bilingual education in light of the threefold theoretical framework of child's teachers and parents' agencies in interaction in preschool bilingual education. Five significant theoretical concepts are promoted in this volume: the ecology of language learning, an educational partnership for bilingualism, a notion of agency in early language development and education, language conducive contexts and language conducive strategies. The volume examines preschool bilingual education as embedded in specific socio-cultural contexts on the one hand and highlights its universal features on the other. The book is a fundamental read for scholars and students of second language teaching, preschool education and bilingual education in multilingual and multicultural societies. 40

*Innovative Programs in Early Childhood Education* Berlie J. Fallon, 1973 **Childhood by Design** Megan

Brandow-Faller, 2018-04-19 Informed by the analytical practices of the interdisciplinary material turn and social historical studies of childhood, *Childhood By Design: Toys and the Material Culture of Childhood* offers new approaches to the material world of childhood and design culture for children. This volume situates toys and design culture for children within broader narratives on history, art, design and the decorative arts, where toy design has traditionally been viewed as an aberration from more serious pursuits. The essays included treat toys not merely as unproblematic reflections of socio-cultural constructions of childhood but consider how design culture actively shaped commodified and materialized shifting discursive constellations surrounding childhood and children. Focusing on the new array of material objects designed in response to the modern

invention of childhood what we might refer to as objects for a childhood by design Childhood by Design explores dynamic tensions between theory and practice discursive constructions and lived experience as embodied in the material culture of childhood Contributions from and between a variety of disciplinary perspectives including history art history material cultural studies decorative arts design history and childhood studies are represented critically linking historical discourses of childhood with close study of material objects and design culture Chronologically the volume spans the 18th century which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children s use through the 19th century expansion of factory based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household towards the intersection of early 20th century child centered pedagogy and modernist approaches to nursery and furniture design through the changing consumption and sales practices of the postwar period marketing directly to children through television film and other digital media and into the present where the line between the material culture of childhood and adulthood is increasingly blurred Handbook of Empirical Literary Studies Donald
