**The Psychology of Screenwriting** Jason Lee, 2013-07-18

The Psychology of Screenwriting is more than an interesting book on the theory and practice of screenwriting. It is also a philosophical analysis of predetermination and freewill in the context of writing and human life in our mediated world of technology. Drawing on humanism, existentialism, Buddhism, postmodernism, and transhumanism, and diverse thinkers from Meister Eckhart to Friedrich Nietzsche, Theodor Adorno, Jacques Derrida, Jean Baudrillard, and Gilles Deleuze, *The Psychology of Screenwriting* will be of use to screenwriters, film students, philosophers, and all those interested in contemporary theory. This book combines in depth critical and cultural analysis with an elaboration on practice in an innovative fashion. It explores how people such as those in the Dogme 95 movement have tried to overcome traditional screenwriting, looking in detail at the psychology of writing and the practicalities of how to write well for the screen. This is the first book to include high theory with screenwriting practice whilst incorporating the Enneagram for character development. Numerous filmmakers and writers, including David Lynch, Jim Jarmusch, David Cronenberg, Pedro Almodóvar, Darren Aronofsky, Sally Potter, and Charlie Kaufman, are explored. *The Psychology of Screenwriting* is invaluable for those who want to delve deeper into writing for the screen.

**Machine Ethics and Robot Ethics**

Wendell Wallach, Peter Asaro, 2020-09-10

Once the stuff of science fiction, recent progress in artificial intelligence, robotics, and machine learning means that these rapidly advancing technologies are finally coming into widespread use within everyday life. Such rapid development in these areas also brings with it a host of social, political, and legal issues, as well as a rise in public concern and academic interest in the ethical challenges these new technologies pose. This volume is a collection of scholarly work from leading figures in the development of both robot ethics and machine ethics; it includes essays of historical significance which have become foundational for research in these two new areas of study, as well as important recent articles. The research articles selected focus on the control and governance of computational systems, the exploration of ethical and moral theories using software and robots as laboratories or simulations, inquiry into the necessary requirements for moral agency, and the basis and boundaries of rights and questions of how best to design systems that are both useful and morally sound. Collectively, the articles ask what the practical ethical and legal issues arising from the development of robots will be over the next twenty years, and how best to address these future considerations.

*The Mental Health of Gifted Intelligent Machines* John Senior, Éva Gyarmathy, 2024-02-13

*The Mental Health of Gifted Intelligent Machines* explores the increasingly sophisticated behaviours of developing AI and how we can ensure it will have emotional resilience, ethical strength, and an ability to think in a new and enhanced way. Its primary aim is to change how we understand the world by investigating humanity as an intelligent being, examining and contrasting human and artificial intelligence. It asks questions about our identity in a deeply uncertain and disruptive ever-changing world, how we will improve and enhance our

psychological intelligence to meet the increasing complications and demands of the future and what we need to do now to be psychologically intelligent enough to live a full meaningful life in a new world evolving around us The book argues that changes in our understanding of mental health psychology and our view of intelligence will challenge huge aspects of our fundamental beliefs and assumptions and that it is essential we explore new arenas to further understand both our own human psychological issues and mental health as we develop gifted intelligent machines It is a must read for all students researchers and professionals involved with AI gifted education consciousness and mental health Textile World ,1926
