Making Meaning with Machines Amy Laviers, Catherine Maguire, 2023-10-10 A rigorous primer in movement studies for designers engineers and scientists that draws on the fields of dance and robotics How should a gestural interface react to a flick versus a dab Versus a punch Should robots reach out to a human counterpart with a direct telescoping action or through a circuitous arc in space Just as different movements express the different internal states of human movers so too can the engineered systems behind robots In Making Meaning with Machines Amy LaViers and Catherine Maguire offer a refreshingly embodied approach to machine design that supports the growing need to make meaning with machines by using the field of movement studies including choreography

somatics and notation to engage in the process of designing expressive robots Drawing upon the Laban Bartenieff tradition LaViers and Maguire sharpen the movement analysis methodology expanding the material through their work with machines and putting forward new conventions such as capitalization naming and notation schemes that make the embodied work more legible for academic contexts The book includes an overview of movement studies exercises that define the presented taxonomy and principles of movement case studies in movement analysis of both humans and robots and state of the art research at the intersection of robotics and dance Making Meaning with Machines is a much needed primer for observing describing and creating a wide array of movement patterns which ultimately can help facilitate broader and better design choices for roboticists technologists and designers **Machine-shop Tools and Methods** William Samuel Leonard,1906
