Best, 2003-06-01 Although Charles Best is known for discovering insulin the story of his life neither begins nor ends with that one moment Not only did he make many other discoveries he was also one half of an extraordinary couple who during their almost sixty years together were involved in many of the significant events of the twentieth century Margaret Charley is the story of these two people from their beginnings on the east coast at the turn of the century through the years that followed Through diaries scrapbooks photograph albums and other documentation the details of their lives are shared with the reader *The Science of War* Donald Avery, 1998-01-01 The Second World War with its emphasis on innovative weapons and defence technology brought about massive changes in the role of scientists in Canada the United States and Great Britain Canadian scientists working through the auspices of the National Research Council and the Department of National Defence made important contributions to the development of alliance warfare Before 1939 Canada had only a minute military establishment and a limited industrial and academic capacity for research and development With the outbreak of war all this changed dramatically This book explains how and why Canada was able to play in the big leagues of military technology including the development of radar RDX explosives proximity fuses chemical and biological warfare and the atomic bomb It also investigates the evolution of the Canadian national security state which attempted to protect defence secrets both from the Axis powers and from Canada's wartime ally the Soviet Union The Science of War provides both a cross disciplinary overview of the scientific and military activity of this period in several countries and a fascinating analysis of what the author calls Big Science in Canada **Mechanical Engineering at the National Research Council of Canada** W.E. December 1943 Lieutenant General A G L McNaughton resigned from command of the 1st Canadian Army amidst criticism of his poor generalship and of his abrasive personality Despite McNaughton s importance to the Canadian Army during the first four years of the Second World War little has been written about the man himself or the circumstances of his resignation In The Politics of Command the first full length study of the subject since 1969 John Nelson Rickard analyses McNaughton s performance during Exercise SPARTAN in March 1943 and assesses his relationships with key figures such as Sir Alan F Brooke Bernard Paget and Harry Crerar This detailed re examination of McNaughton s command argues that the long accepted reasons for his relief of duty require extensive modification Based on a wide range of sources The Politics of Command will redefine how military historians and all Canadians look at not only Andy McNaughton but also the Canadian

Army itself     Science, Politics and the Public Good Nicolaas A. Knowles Middleton,2006-01-01 No detailed description available for Physics at the National Research Council of Canada     *Top Secret Exchange* David Zimmerman,1996 The Tizard Mission was one of the key events in the forging of the Anglo American alliance in World War II Led by Sir Henry Tizard the mission visited the United States and Canada in the summer of 1940 to make available virtually all of Britain s technical and scientific military secrets Overwhelmed by British generosity the U S reciprocated David Zimmerman tells the story of that mission and examines the importance of technology in modern war and its crucial role in the defeat of the Axis powers     **Espionage: Past, Present and Future?** Wesley K. Avery,2013-04-28 Pathogens for War explores how Canada and its allies have attempted to deal with the threat of germ warfare one of the most fearful weapons of mass destruction since the Second World War In addressing this subject distinguished historian Donald Avery investigates the relationship between bioweapons poison gas and nuclear devices as well as the connection between bioattacks and natural disease pandemics Avery emphasizes the crucially important activities of Canadian biodefence scientists beginning with Nobel Laureate Frederick Banting at both the national level and through cooperative projects within the framework of an elaborate alliance system Delving into history through a rich collection of declassified documents Pathogens for War also devotes several chapters to the contemporary challenges of bioterrorism and disease pandemics from both national and international perspectives As such readers will not only learn about Canada s secret involvement with biological warfare but will also gain new insights into current debates about the peril of bioweapons one of today s greatest threats to world peace     **A Perfect Hell** John Nadler,2007-12-18 It s 1942 and Hitler s armies stand astride Europe like a colossus Germany is winning on every front This is the story of how one of the world s first commando units put together for the invasion of Norway helped turn the tide in Italy 1942 When the British generals recommend an audacious plan to parachute a small elite commando unit into Norway in a bid to put Nazi Germany on the defensive Winston Churchill is intrigued But Britain fighting for its life can t spare the manpower to participate So William Lyon MacKenzie King is contacted and asked to commit Canadian troops to the bold plan King determined to join Roosevelt and Churchill as an equal leader in the Allied war effort agrees One of the world s first commando units the First Special Service Force or FSSF is assembled from hand picked soldiers from Canadian and American regiments Any troops sent into Norway will have to be rugged self sufficient brave and weather hardened Canada has such men in ample supply The all volunteer FSSF comprises outdoorsmen trappers rangers prospectors miners loggers Assembled at an isolated base in Helena Montana and given only five months to train before the invasion they are schooled in parachuting mountain climbing cross country skiing and cold weather survival They are taught how to handle explosives how to operate nearly every field weapon in the American and German arsenals and how to kill with their bare hands After the Norway plan is scrapped the FSSF is dispatched to Italy and given its first test to seize a key German mountain top position which had repelled the brunt of the Allied armies for over a month In a reprise of the audacity and careful planning that won Vimy Ridge for the Canadians in WWI the FSSF takes the twin peaks Monte la Difensa and Monte la Remetanea by storming the supposedly unscalable rock face at the rear of the German position and opens the way through the mountains Later the FSSF will hold one quarter of the Anzio beachhead against a vastly superior German force for ninety nine days a force of only 1 200 commandos does the work of a full division of over 17 000 troops Though badly outnumbered the FSSF takes the fight

to the Germans sending nighttime patrols behind enemy lines and taking prisoners It is here that they come to be known among the dispirited Germans as Schwartzers Teufel Black Devils for their black camouflage face paint and their terrifying tactic of appearing out of the darkness John Nadler vividly captures the savagery of the Italian campaign fought as it was at close quarters and with desperate resolve and the deeply human experiences of the individual men called upon to fight it Based on extensive archival research and interviews with veterans *A Perfect Hell* is an important contribution to Canadian military history and an indispensable account of the lives and battlefield exploits of the men who turned the tide of the Second World War

*The Neutron's Children* Sean Johnston, 2012-04-26 This account tracks the Allied atomic energy experts who emerged from the Manhattan Project to explore optimistic but distinct paths in the USA UK and Canada Characterized successively as admired atomic scientists mistrusted spies and heroic engineers their identities were ultimately shaped by nuclear accidents

*The Reader of Gentlemen's Mail* David Kahn, 2008-10-01 One of the most colorful and controversial figures in American intelligence Herbert O Yardley 1889 1958 gave America its best form of information but his fame rests more on his indiscretions than on his achievements In this highly readable biography a premier historian of military intelligence tells Yardley's story and evaluates his impact on the American intelligence community Yardley established the nation's first codebreaking agency in 1917 and his solutions helped the United States win a major diplomatic victory at the 1921 disarmament conference But when his unit was closed in 1929 because gentlemen do not read each other's mail Yardley wrote a best selling memoir that introduced and disclosed codemaking and codebreaking to the public David Kahn describes the vicissitudes of Yardley's career including his work in China and Canada offers a capsule history of American intelligence up to World War I and gives a short course in classical codes and ciphers He debunks the accusations that the publication of Yardley's book caused Japan to change its codes and ciphers and that Yardley traitorously sold his solutions to Japan And he asserts that Yardley's disclosures not only did not hurt but actually helped American codebreaking during World War II
