Macroeconomic Reform In China:

Macroeconomic Reform in China Jiwei Lou, 1997-01-01 China is in the throes of two transitions from a command economy to a market based one and from a rural agricultural society to an urban industrial one So far both transitions have been spectacularly successful China is the fastest growing economy in the world with per capita incomes more than quadrupling since 1978 achieving in two generations what took other countries centuries Although swift growth and structural change have resolved many problems they also have created new challenges employment insecurity growing inequality stubborn poverty mounting environmental pressures rising costs of food self sufficiency and periods of macroeconomic instability stemming from incomplete reforms Unmet these challenges could undermine the sustainability of growth and Chinas promise could fade China 2020 a seven volume set examines China s recent history where it is today and the path it should follow during the first two decades of the 21st century The volume in the set entitled Clear Water Blue Skies Chinas Environment in the New Century explores the relationship between economic growth and the environment Chapters review the harmful effects of all forms of pollution and discuss ways of securing higher environmental living standards Particular attention is given to urban areas and the impact of pollution on health conditions *The Logic of Economic Reform in China* Xiaojing Zhang, Xin Chang, 2015-11-19 This book provides a historical overview of Chinese economic reform over the past 30 years From the genesis of the reform to the gradual improvement of the market system and then to the re start of the critical stage of the reform this book includes not only research on the reform process but also detailed descriptions of the key areas of reform since the Third Plenary Session of the 18th CPC Central Committee On this basis the author develops six logics for Chinese economic reform Firstly reform is cyclical moving between rapid advances and deadlock this calls upon us to re examine the common view of reform Secondly reform is systematic it cannot succeed without supporting reforms in other fields Thirdly the relationship between reform development and stability should be properly handled This trinity is quite different from the perspective of western mainstream theory which puts too much emphasis on efficiency Fourthly the success of Chinese reform was not achieved by chance The reform practice is based on the theoretical logic and also goes beyond the debate between progressive and radical modes Fifthly the Top level Design should be combined with crossing the river by moving from stone to stone i e the theoretical basis of reform should be combined with reform practice Sixthly and lastly the ongoing reform in China must be understood in the contexts of global competition and reform competition **Studies on Economic Reforms and Development in China** Siwei Cheng, 2001 In Studies in Economic Reform renowned and influential Chinese scholar and politician Siwei Cheng outlines his theories for bringing economic reform to China in the context of the increasingly global economy **Economic Reform in China** Wanda Tseng, 1994-09-15 Exchange and trade system reforms Monetary policy and financial sector reforms Fiscal system reforms Investment system reform State enterprise reform **Two Decades Of Reform In China** Shangquan

from China's Forty Years of Reform and Opening-up David Daokui Li,2021-03-26 This book first shows that the past 40 years of China s economic reform and opening up represents the greatest magnitude of economic growth in history Based on field trips extensive and intensive interviews and literature surveys this book argues that there are five general lessons for a rapid growing economy from China s economic reform and opening up all in the area of the relationship between the government and the economy First the local governments need to be incentivized to help rapid entry and development of enterprises Second local governments need to be incentivized to help rapid land conversion from agricultural to non agricultural Third financial deepening is vital that is inducing households to hold more and more financial assets in local currency Financial deepening is essential to convert savings into investments This requires financial stability which is crucial Fourth the learning through opening up is the key to endogenous economic growth The fundamental benefit of opening up is learning rather than enjoying comparative advantage The fifth and final lesson from China is that the central government must proactively manage the macroeconomy The rationale is that enterprises compete with each other in games of industrial organization In order to resolve this problem proactive measures including market oriented means administrative orders and reform measures should be implemented Overall the main lesson from China s past 40 years of reform and opening up is that proper incentives and behavior of the government local and central are important for economic growth China has been conducting reforms in this regard and as a result the government more or less has been playing the role of a helping hand regarding economic growth although China s economic system is far from perfect and many reforms are still needed

China's Economic Reform Raphael Shen,2000-02-28 Both Mao Zedong and Deng Xiaoping drastically altered the course of contemporary China s economic development using opposing strategies Mao froze China s economic system in a perennial

The State Strikes Back Nicholas R. Lardy, 2019-01-01 China's extraordinarily rapid economic growth since 1978 driven by market oriented reforms has set world records and continued unabated despite predictions of an inevitable slowdown In *The State Strikes Back: The End of Economic Reform in China* renowned China scholar Nicholas R Lardy argues that China's future growth prospects could be equally bright but are shadowed by the specter of resurgent state dominance which has begun to diminish the vital role of the market and private firms in China's economy Lardy's book arrives in timely fashion as a sequel to his pathbreaking *Markets over Mao: The Rise of Private Business in China* published by PIIE in 2014 This book mobilizes new data to trace how President Xi Jinping has consistently championed state owned or controlled enterprises encouraging local political leaders and financial institutions to prop up ailing underperforming companies that are a drag on China's potential As with his previous book Lardy's perspective departs from conventional wisdom especially in its contention that China could achieve a high growth rate for the next two decades if it reverses course and returns to the path of market oriented reforms

Dorn, Wang Xi, Cato Institute, 1990-11-29 In this volume distinguished Chinese and Western scholars provide a detailed examination of the problems associated with China s transition to a market oriented system A variety of reform proposals aimed at resolving the contradictions inherent in piecemeal reform are discussed along with the chances for future liberalization These clearly written and insightful essays address the roots of China s crisis The authors focus on institutional changes necessary for a spontaneous market order and point to the close relation between economic reform and political constitutional reform Topics include the speed and degree of the transition whether ownership reform

must precede price reform how inflation can be avoided steps to depoliticize economic life how to create an environment conducive to foreign trade and investment and how to institute basic constitutional change and open China to the outside world The revolutionary changes now shaking the foundations of socialism and central planning in the Soviet Union and Eastern and Central Europe are sure to have an impact on China's future Despite their seriousness the events of Tiananmen Square may constitute only a temporary detour on the road toward a private market order The essays in this volume help lay a rational framework for understanding China's present problems and for discussing the prospects for future reform
