

Features of Macroeconomics

- ❖ It is the study of the economy in totality.
- ❖ It uses lumping method for the purpose of economic study. Under lumping method the general price level is studied, and not prices of individual products.
- ❖ It concerns with the behavior of aggregates.
- ❖ It is a general equilibrium analysis in which everything depends on everything else. For instance, a change in income level may results in change in savings, which in turn influence investment.
- ❖ Macroeconomics is the obverse of microeconomics.
- ❖ Therefore it deals with total or aggregates national income output and employment, total consumption, saving and investment and the general price level.
- ❖ A bird's eye view to entire economy

Macroeconomics Introduction:

Macroeconomics Merton H. Miller, Charles W. Upton, 1986-10-15 Miller and Upton is by far the most cited macroeconomics text in front line academic research journals over the last ten years It has become a contemporary classic Roger C Kormendi University of Michigan The most innovative approach to introducing macroeconomics that I have seen A classic in the sense that every serious student of macroeconomics is likely to want it in his or her library John P Gould University of Chicago The task the authors set out to perform is ambitious to write a macroeconomics textbook structured around a neoclassical growth model And in this task they have succeeded Clifford W Smith Jr Journal of Finance This is a superb book As a vehicle for teaching economics I have to place it right behind Henderson and Quant Microeconomics and Dorfman Samuelson and Solow Linear Programming Moreover it is an exciting book both to read and to think about It is not just that these authors have something to say but their way of saying it is generally superior F E Banks Kyklos

Introduction to Macroeconomics Gilad James, PhD, Introduction to Macroeconomics is a fundamental course that introduces students to the basic principles and concepts of macroeconomics It provides a comprehensive understanding of the functioning and structure of the economy as a whole and how the macroeconomic variables such as gross domestic product GDP inflation unemployment and international trade affect the overall performance of the economy The course covers key macroeconomic models policies and theories that aid in analyzing and explaining the economic behavior of households businesses and governments The first paragraph of the course introduces and defines the subject matter of macroeconomics provides a brief overview of its history and highlights its significance in understanding the economy It focuses on aggregate demand aggregate supply inflation and unemployment and how they interact to determine the overall economic performance The second paragraph highlights the various macroeconomic models such as Classical Keynesian and Monetarist theories and how they relate to the economy Finally it discusses the role of economic policies including fiscal and monetary policies in regulating and stabilizing macroeconomic variables and the principles that guide policy implementation The course is essential for students pursuing economics or related fields providing a strong foundation for understanding and analyzing macroeconomic phenomena in real world situations

An Introduction to Macroeconomics Louis-Philippe Rochon, Sergio Rossi, 2016-07-27 This important new book introduces students to the fundamental ideas of heterodox economics It is written in a clear way by top heterodox scholars They offer not only a critique of the dominant approach to economics but also present a positive and constructive alternative Students interested in an explanation of the real world will find the heterodox approach not only satisfying but ultimately better able to explain a money using economy prone to periods of instability and crises

Rethinking Macroeconomics John F. McDonald, 2016-05-26 The field of macroeconomics has always played host to contesting schools of thought but the recent Global Financial Crisis has exacerbated those differences In order to fully understand macroeconomics at the introductory level students need to be aware of these controversies

Rethinking Macroeconomics introduces students to the different schools of thought equipping them with the knowledge needed for a real understanding of today's macro economy. The text guides the reader through various approaches to the analysis of the macro economy of the U.S. before presenting the data for several critical economic episodes in order to discover which analytical method provides the best explanation for each event. It covers key background information on topics such as the basics of supply and demand, macroeconomic data, international trade and the balance of payments and the creation of the money supply. Offering the context that is missing from existing introductory macroeconomics texts, John F. McDonald encourages students to think critically about received economic wisdom. This text is the ideal complement to any introductory macroeconomics textbook and is best suited for undergraduate students who have had an introductory course in economics. An Introduction to Computational Macroeconomics Anelí Bongers, Trinidad Gómez, José L. Torres, 2020-09-01

This book presents an introduction to computational macroeconomics using a new approach to the study of dynamic macroeconomic models. It solves a variety of models in discrete time numerically using a Microsoft Excel spreadsheet as a computer tool. The solved models include dynamic macroeconomic models with rational expectations, both non-microfounded and microfounded, constituting a novel approach that facilitates the learning and use of dynamic general equilibrium models which have now become the principal tool for macroeconomic analysis. Spreadsheets are widely known and relatively easy to use, meaning that the computer skills needed to work with dynamic general equilibrium models are affordable for undergraduate students in Advanced Macroeconomics courses. INTRODUCTORY MACROECONOMICS J.P. Goel, Kaushal Goel, 2020-04-30. Based on New NCERT Textbook 2019-20. According to the new examination pattern, greater emphasis on 1 mark questions than before. Questions spread over the entire chapter include Multiple Choice Questions, Fill in the Blanks, Match the Following, True and False, Very Short Answer Type Questions. All topics have been thoroughly revised and updated with the latest available data on the subject. Covers the recent schemes/programs undertaken by the Government of India in the relevant chapters. Some of the recent schemes include Make in India, Mudra Yojana, Swachh Bharat Mission, Ayushman Bharat, etc. Important facts and events/data of each chapter are summarised at one place. This will enable the students to learn only important data. Additional coverage at the end consists of Value Based Questions, Chapter-wise 1 Mark Questions.
