*The Politics and Economics of Park Management* Terry Lee

Anderson,Alexander James,2001 *The Politics and Economics of Park Management* examines national protected area systems in both developed and developing countries that have made a transformation from fortress parks to a sustainable use model. The contributors park management academics and members of nongovernmental organizations contend that successful institutional change in protected area systems involves not only the adoption of appropriate legal and regulatory regimes covering sustainable use but also the development of an informal culture of sustainable resource use among all of a park's stakeholders. While this latter requirement is often difficult to achieve, the contributors show how these informal attitudes may evolve over time both within the management structure of a park agency and the community of resource users. The case studies cited represent examples of successful institutional change demonstrating both financial and conservation benefits to protected area agencies that should serve as model for managing parks today.

**The Moral Austerity of Environmental Decision Making** John Martin Gillroy,Joe Bowersox,2002-06-17 A roundtable discussion on the missing ethical dimension in environmental policy.

The Global Casino: An Introduction to Environmental Issues, Fourth Edition Nick

Middleton,2013-11-26 *The Global Casino* is a compelling introduction to environmental issues which links the physical environment to its political, social, and economic contexts. Case studies from around the globe are used to illustrate key environmental issues from global warming and deforestation to natural hazards and soil erosion. The book highlights the underlying causes behind environmental problems, including human actions, and emphasises the potential for solutions. In line with contemporary international trends, emphasis is placed on the critical concept of sustainable development. This new edition has been thoroughly revised and updated with the introduction of new illustrative material and up to the minute case studies on topics such as endangered deep sea species, the global uptake of unleaded petrol, geothermal energy in Iceland, genocide in Rwanda, and the Indian Ocean tsunami of 2004. Particularly useful features for students include points for discussion at the end of each chapter, as well as a comprehensive glossary. The lists of key readings and websites, again linked specifically to the content of each chapter, have been fully updated and expanded. *The Global Casino* is the essential course companion for students of the environment, geography, earth sciences, and development studies.

Une économie plus dynamique dans un Canada fort et prospère Mike Harris,Preston Manning,Fraser Institute (Vancouver, B.C.),Institut économique de Montréal,2006

Des dépenses publiques et une imposition excessive restreignent la liberté économique des individus et des entreprises en réduisant leur revenu et en transférant le pouvoir de décisions économiques dans les mains de politiciens et de fonctionnaires.

The Economics of Ecosystems and Biodiversity in Local and Regional Policy and Management Heidi Wittmer,Haripriya Gundimeda,2012 Human well-being is dependent upon ecosystem services provided by

nature for free such as water and air purification fisheries timber and nutrient cycling These are predominantly public goods with no markets and no prices so their loss is often not detected by our current economic incentive system and therefore continues unabated A variety of pressures resulting from population growth changing diets urbanisation climate change and many other factors is causing biodiversity to decline and ecosystems to be degraded The world s

**Fractal Sustainability**

Isabel Canto de Loura, Robin Dickinson, 2016-08-12 Even though the fractal approach to sustainability and organizational change management is not new no authors so far seem to have truly attempted to use fractals as a mathematical means to map and measure organizational sustainability Several sustainability maturity models and change management models and frameworks concepts and computer generated systems came to the fore during the past two decades They provided a set of useful tools for managers academics and students to refer to or on which to base their own actions and plans However one issue remains most of those models and frameworks share a rather similar linear skeleton the main difference between them is the quantitative variety of steps within each phase stage and parameter and how in depth each of these is presented The authors work addresses a clear gap in the literature and in applied research as it emphasizes the relevance of using a complex mathematically based but user friendly fractal approach Readers are able to better understand implement map and measure change management processes leading to a sustainability focused mindset Subsequent chapters guide you through the steps towards creating committed sustainability based strategies attitudes actions and practices across all levels in the broad organizational context This text is essential reading for students researching business and management and who are interested in the Fractal Sustainability concept

*Mining, the Environment, and Indigenous Development Conflicts* Saleem H. Ali, 2021-10-19 From sun baked Black Mesa to the icy coast of Labrador native lands for decades have endured mining ventures that have only lately been subject to environmental laws and a recognition of treaty rights Yet conflicts surrounding mining development and indigenous peoples continue to challenge policy makers This book gets to the heart of resource conflicts and environmental impact assessment by asking why indigenous communities support environmental causes in some cases of mining development but not in others Saleem Ali examines environmental conflicts between mining companies and indigenous communities and with rare objectivity offers a comparative study of the factors leading to those conflicts Mining the Environment and Indigenous Development Conflicts presents four cases from the United States and Canada the Navajos and Hopis with Peabody Coal in Arizona the Chippewas with the Crandon Mine proposal in Wisconsin the Chipewyan Inuits D n and Cree with Cameco in Saskatchewan and the Innu and Inuits with Inco in Labrador These cases exemplify different historical relationships with government and industry and provide an instance of high and low levels of Native resistance in each country Through these cases Ali analyzes why and under what circumstances tribes agree to negotiated mining agreements on their lands and why some negotiations are successful and others not Ali challenges conventional theories of conflict based on economic or environmental cost benefit analysis which do not fully capture the dynamics of

resistance He proposes that the underlying issue has less to do with environmental concerns than with sovereignty which often complicates relationships between tribes and environmental organizations Activist groups he observes fail to understand such tribal concerns and often have problems working with tribes on issues where they may presume a common environmental interest This book goes beyond popular perceptions of environmentalism to provide a detailed picture of how and when the concerns of industry society and tribal governments may converge and when they conflict As demands for domestic energy exploration increase it offers clear guidance for such endeavors when native lands are involved

**Fundamentals of Integrated Design for Sustainable Building** Marian Keeler,Bill Burke,2013-05-28 Fundamentals of Integrated Design for Sustainable Building offers an introduction to green building concepts as well as design approaches that reduce and can eventually eliminate the need for fossil fuel use in buildings while also conserving materials maximizing their efficiency protecting the indoor air from chemical intrusion and reducing the introduction of toxic materials into the environment It represents a necessary road map to the future designers builders and planners of a post carbon world from the Foreword by Ed Mazria A rich sourcebook covering the breadth of environmental building Fundamentals of Integrated Design for Sustainable Building introduces the student and practitioner to the history theory and technology of green building Using an active learning approach the concepts of sustainable architecture are explained and reinforced through design problems research exercises study questions team projects and discussion topics Chapters by specialists in the green movement round out this survey of all the important issues and developments that students and professionals need to know From history and philosophy to design technologies and practice this sweeping resource is sure to be referenced until worn out

**Technology and Society: A Philosophical Guide** James Gerrie,2018-05-30 Technology and Society provides an up to date introduction to the basic issues that have come to define the philosophy of technology What is technology Does technology control our lives What is technology's relation to ethics How does technology influence us Is the widespread belief in technological progress justified Later sections of the book examine the application of philosophy of technology to social issues such as climate change urban sprawl and automation Major issues and arguments are presented in an accessible and non technical fashion giving the reader a firm foundation in the field

*Wealth, Poverty and Politics* Thomas Sowell,2016-09-06 In *Wealth Poverty and Politics* Thomas Sowell one of the foremost conservative public intellectuals in this country argues that political and ideological struggles have led to dangerous confusion about income inequality in America Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality the production of wealth We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography demography and culture Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state Refuting Thomas Piketty Paul Krugman and others on the left Sowell draws on accurate

empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe

Transcending partisanship through a careful examination of data Wealth Poverty and Politics reveals the truth about the most explosive political issue of our time     *The Great Reshuffling* Jeffrey A. McNeely,2001 While the issue of invasive alien species IAS has important biological components the human dimensions deserve much greater attention Humans with all their diversity of quirks strengths and weaknesses are at the heart of the problem of IAS and paradoxically also at the heart of the solution This compilation of papers delivered during a workshop on the human dimensions of the IAS problem held in Cape Town South Africa on 15 17 September 2000 covers some of the many causes consequences and responses to this problem     **Current Catalog** National Library of Medicine (U.S.),1979 Includes subject section name section and 1968 1970 technical reports     *Feathered Entanglements* Scott E. Simon,Frédéric Laugrand,2024-10-15 As they migrated across great distances ancient humans may have used birdsong and bird sightings to find food and water in unseen territory Today attending to birds helps scientists track not only avian migration but also environmental change Birds remain our sentinels Feathered Entanglements offers a rich tapestry of human bird relations across the Indo Pacific In this era of uncontrolled industrialization we have grown increasingly disconnected from the natural world The ways in which birds feature in the daily life symbolic systems and material culture of humans from pigeon keeping on the rooftops of Amman to the rituals of Indigenous peoples in Taiwan can teach us how to live with other species amid the challenges of the Anthropocene In a time of intensifying ecological crisis we need more than ever to protect and appreciate non human lives Feathered Entanglements embraces the connection between humans birds and our shared world     **Engineering Earth** Stanley D. Brunn,2011-03-19 This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social environmental and engineering sciences Together they document and illustrate with case studies maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical contemporary and postmodern perspectives This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local regional and global scales and from disciplinary and trans disciplinary perspectives     **Smart Solutions to Climate Change** Bjørn Lomborg,2010-09-09 The failure of the Copenhagen climate conference in December 2009 revealed major flaws in the way the world s policymakers have attempted to prevent dangerous levels of increases in global temperatures The expert authors in this specially commissioned collection focus on the likely costs and benefits of a very wide range of policy options including geo engineering mitigation of CO2 methane and black carbon expanding forest research and development of low carbon energy and encouraging green technology transfer For each policy authors outline all of the costs benefits and likely outcomes in fully referenced clearly presented chapters accompanied by shorter critical alternative perspectives To further

stimulate debate a panel of economists including three Nobel laureates evaluate and rank the attractiveness of the policies
