Macroeconomics Of Transition Developments In East Central Europe:

The Macroeconomics of Transition Andrzej Kondratowicz, Jan Winiecki, 2005-08-18 How successful has the transition to market economies proved in East Central Europe The decision by the East European countries to move to market economies was accompanied by much hypothesising and expounding of economic theories However now that the initial euphoria has passed it is time for a rational assessment of this transition and the success of those theories in practice Since the more economically advanced countries are situated in East Central Europe Jan Winiecki and Andrzej Kondratowicz have focused their study on Czechoslovakia Hungary Poland and former Yugoslavia The authors present a systematic account of macroeconomic developments and institutional changes They assess progress dealing with the determinants of output macro policies wage price and employment issues and the external balance

The Privatization Process in East-Central Europe Michal Mejstřík, 2012-12-06 It is beyond any doubt that East Central European countries such as Czech Republic Hungary Poland and Slovakia has dramatically changed its shape through its radical transition from centrally planned to the market economies in last 7 years Many economists divide the process of economic transformation into areas of Stabilization Liberalization and Privatization Restructuring The traditional view is that stabilization and liberalization can be achieved rather quickly by balancing budgets balance of payments tightening money supply freeing prices and liberalizing trade but that the area of privatization is one that could be moved to the future and will require much more time Until 1991 none of the post communist nations except former East Germany which had a large decree of support from West Germany had succeeded in privatizing large numbers of enterprises even though more than two years had passed since the changes in government in these nations The privatization has been however seen as an extremely important part of reform package together with stabilization and liberalization especially in the Czech Republic from the very beginning The Czechs originally as a part of the Czechoslovak Federal Republic embarked on an unprecedented path that should have lead not only to stabilization and liberalization but also to very rapid mass privatization of its sector of large enterprises that have dominated its economy to an extreme extent

John L Campbell Slavic Review **East-Central European Economies in Transition**, 1994 Distributed to some depository libraries in microfiche *Developments in Central and East European Politics 4* Stephen White, Judy Batt, Paul G. Lewis, 2007

The face of Central and Eastern Europe has been dramatically transformed since the collapse of communism. The region faces new challenges including the need to find a balance between effective leadership and accountability and to reverse the economic decline of the late communist years. Addressing these concerns and others, *Developments in Central and East European Politics 4* brings together specially commissioned chapters by leading scholars from both sides of the Atlantic. The chapters, all of which are new to this edition, focus on key features of the political systems that have emerged following the transition to postcommunist rule and the enlargement of the European Union through 2006. Full attention is given to the pattern of events in individual nations, but the main emphasis is on the framework of politics across the region: constitutions, leadership, parliaments, parties, and electoral systems, and the process of politics as it is revealed in political participation, civil society, economic change, and the quality of democratic government within and beyond the region. Clearly written and well supported with references and suggestions for further reading, *Developments in Central and East European Politics 4* is the ideal guide to the process of change in a group of states that were formerly modeled on the Soviet Union but are now a distinctive and varied presence within a continent that has been redefining its boundaries, its values, its economic systems, and its international allegiances. Contributors: Judy Batt, Dirk Berg, Schlosser, Sarah Birch, Heather Grabbe, Tim Haughton, Krzysztof Jasiewicz, Petr Kopeck, Paul G. Lewis, Frances Millard, Cas Mudde, D. Mario Nuti, Mark Pittaway, Ray Taras, Stephen White, Andrew Wilson, Katarzyna Wolczuk.

Good Governance in Central and Eastern Europe Herman Willem Hoën, 2001-01-01 Undeniably Good Governance in Central and Eastern Europe provides many insights in the political economy of institutional reform and constitutes an important contribution to the growing literature on second generation reforms Carlos Santiso Democratization The implementation of a democratic order embedded in a market economy environment has proved immensely difficult Furthermore this process is subject to tremendous variety within Central and Eastern Europe Ten years after the collapse of communism it was apparent that only Poland and Slovenia surpassed their 1989 levels of GDP This book scrutinises the arrangements to enforce good governance in this area both by means of external help and domestic political leadership From the popular assumption that transformation is a collective good it follows that the problem of free riding has to be faced Consequently there is a danger that transformation may never be completed This book empirically tests the relationship between economic performance and good governance focusing upon voluntary coercion as a means to prevent free riding behaviour The author examines the role of international organisations and discusses elite formation as an important element of good governance something often ignored in the economic analysis of economic performance
