Yoder,2019-09-03 Little Learning Labs Math Games for Kids an abridged paperback edition of Math Games Lab for Kids presents 25 hands on activities that include coloring art puzzles and more that make learning about math fun Explore geometry and topology by building drawing and transforming shapes Discover how to color maps like a mathematician by using the fewest colors possible Draw graphs to learn the language of connections Create mind bending fractals with straight lines and repeat shapes Everything you need to complete the activities can either be found in the book or around the house The popular Little Learning Labs series based on the larger format Lab for Kids series features a growing list of books that share hands on activities and projects on a wide host of topics including art astronomy geology math and even bugs all authored by established experts in their fields Each lab contains a complete materials list clear step by step photographs of the process as well as finished samples The activities are open ended designed to be explored over and over often with different results Geared toward being taught or guided by adults they are enriching for a range of ages and skill levels Gain firsthand knowledge on your favorite topic with Little Learning Labs Open Little Learning Labs Math Games for Kids and start exploring the exciting world of math **Arithmetic Counts!** Paul Shoecraft,2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children s love of games songs and movement he s proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It s no lonver just their teacher s math It s their math America s children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for

the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That s acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don t You know that to be true if you ve ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like $5 \times 7 = 12$ $17 \times 8 = 96$ $X \times 7 = 42$ and $56 \times 7 = 8$ and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget
