Mad Travelers:

Mad Travelers Ian Hacking, 1998 It all began one morning last July when we noticed a young man of twenty six crying in his bed in Dr Pitre s ward He had just come from a long journey on foot and was exhausted but that was not the cause of his tears He wept because he could not prevent himself from departing on a trip when the need took him he deserted family work and daily life to walk as fast as he could straight ahead sometimes doing 70 kilometers a day on foot until in the end he would be arrested for vagrancy and thrown in prison Dr Philippe Tissie July 1886 Thus begins the recorded case history of Albert Dadas a native of France s Bordeaux region and the first diagnosed mad traveler or fuguer An occasional employee of a local gas company Dadas suffered from a strange compulsion that led him to travel obsessively often without identification not knowing who he was or why he traveled He became notorious for his extraordinary expeditions to such far reaching spots as Algeria Moscow and Constantinople Medical reports of Dadas set off at the time of a small epidemic of compulsive mad voyagers the epicenter of which was Bordeaux but which soon spread throughout France to Italy Germany and Russia Today we are similarly besieged by mental illnesses of the moment such as chronic fatigue syndrome and attention deficit hyperactivity disorder The debate rages about which of these conditions are affectations or cultural artifacts and which are real In *Mad Travelers* Ian Hacking uses the Dadas case to weigh the legitimacy of cultural influences versus physical symptoms in the diagnosis of psychiatric disorders He argues that psychological symptoms find stable homes at a given place and time in ecological niches where transient illnesses flourish Using the records of Dadas s physician Philippe Tissie Hacking attempts to make sense of this strange epidemic While telling his fascinating tale he raises probing questions about the nature of mental disorders the cultural repercussions of their diagnosis and the relevance of this century old case study for today s overanalyzed society

Mad Travelers Dave Seminara, 2021-06-29 A brilliant young con artist offered to help the world s most traveled people reach the planet s last untouched frontiers instead they were taken for a wild ride that turned into a costly lesson on the perils of wanderlust At twenty three William Simon Baekeland was well on his way to becoming the world s best traveled person The billionaire heir to a great plastics fortune had already visited 163 countries but his real passion was finding ways to visit the world s most challenging destinations war torn cities disputed territories and remote or officially off limits islands at the margins of the map He earned rock star status in the world of extreme travel by finding ingenious ways to bring the world s most widely traveled people to difficult to reach and forbidden places But when his story began to unravel an eccentric group of hyper well traveled country collectors were left wondering how they had allowed their obsession to blind them to the warning signs that William Baekeland wasn t who they thought he was *Mad Travelers A Tale of Wanderlust Greed and the Quest to Reach the Ends of the Earth* delves deep inside the subculture of country collecting taking readers to danger zones like Mogadishu and geographical oddities like Norway s nearly impossible to reach Bouvet Island Along the way this raucous tale of adventure and international intrigue illuminates the perils and

Reconsidering Historical Epistemology Matteo Vagelli, 2024-06-27 This book explores the key conceptual stakes underpinning historical epistemology The strong Anglophone interest in historical epistemology since at least the 1990s is typically attributed to its simultaneously philosophical and historical synthetic approach to the study of science Yet this account considered by critics to be an unreflective assumption has prevented historical epistemology from developing a clear understanding and definition especially regarding how precisely historical and philosophical reflections on the sciences should be combined Thus this book uniquely analyses how the problems and tensions inherent to the contemporary phase of historical epistemology can be clarified by reference to the classical French phase The archaeological method of Michel Foucault which draws on and transforms fundamental insights by Gaston Bachelard and Georges Canguilhem is used to exert an enduring influence on the field especially through the work of Ian Hacking and his philosophical cum historical analyses of styles of scientific reasoning Though this book is of great value to academic specialists and graduate students the fact it addresses questions broad in scope ensures it is also relevant to a range of scholars in many disciplines and will provoke discussion among those interested in foundational issues in history and philosophy of science Vagelli's book provides a both unique and uniquely important window into historical epistemology and its relation to contemporary philosophy of science Unique because nowhere else can one find a single work that treats the range of topics that he covers Uniquely important because Vagelli's clear concise and comprehensive survey details key interrelationships among a range of American British and European views currently in play regarding historical epistemology and philosophy of science as well as the institutional and intellectual vectors driving their associated epistemological positions Paul Roth UC Santa Cruz USA Uneasily the history and philosophy of science have bolstered and undermined each other for all too long Would history offer nothing but potted episodes to confirm or contradict transhistorical claims about science Would philosophy dismantle uncritical historicist accounts of scientific discoveries Historical epistemology offers a more integrated path at once a history of the present and a philosophy of the past Matteo Vagelli draws together the insights of the Francophone Anglophone and Germanophone traditions to give us a sparkling lucid account of seeing our standards of scientific understanding as developing across time always asking how did we come to our standards of demonstration and argument Peter Galison Harvard University USA
