**Slant Steps** Jacob Stewart-Halevy,2020-09-15 Slant Steps explores the vital role of the semi periphery artistic communities working between the provinces and the metropole Premised on the collective fascination with the found object Slant Step the book details a history of encounters among artists filmmakers critics and others operating in and out of the Bay Area during the long 1960s They revised the terms of the counterculture the appeal of consumer goods and the surfaces and materials of industrial design and contemporary sculpture Whether extending to international exchanges or shrinking to local coterie these circles helped develop process funk and conceptual art as they forged new directions for the art world and its members Yet when these groups degraded their own works alongside those of their rivals they made their political and aesthetic commitments difficult to decipher reorganizing the ties between the visual arts and the New Left Merging sociologies of art with the tradition of social art history Jacob Stewart Halevy uncovers the oblique perspectives and values of the semi periphery revealing its enduring impact upon contemporary art above all in the field of pedagogy American Book Publishing Record ,2001 California Design, 1930-1965 Wendy Kaplan,2011-09-16 The first comprehensive examination of California s mid century modern design generously illustrated In 1951 designer Greta Magnusson Grossman observed that California design was not a superimposed style but an answer to present conditions It has developed out of our own preferences for living in a modern way California design influenced the material culture of the entire country in everything from architecture to fashion This generously illustrated book which accompanies a major exhibition at the Los

Angeles County Museum of Art is the first comprehensive examination of California's mid century modern design. It begins by tracing the origins of a distinctively California modernism in the 1930s by such European migrants as Richard Neutra, Rudolph Schindler and Kem Weber. It finds other specific design influences and innovations in solid color commercial ceramics, inspirations from Mexico and Asia, new schools for design training, new concepts about leisure and the conversion of wartime technologies to peacetime use exemplified by Charles and Ray Eames's plywood and fiberglass furniture. The heart of California Design is the modern California home famously characterized by open plans conducive to outdoor living. The layouts of modernist homes by Pierre Koenig, Craig Ellwood and Raphael Soriano, for example, were intended to blur the distinction between indoors and out. Homes were furnished with products from Heath Ceramics, Van Keppel Green and Architectural Pottery as well as other previously unheralded companies and designers. Many objects were designed to be multifunctional: pool and patio furniture that was equally suitable indoors; lighting that was both task and ambient; bookshelves that served as room dividers; and bathing suits that would turn into ensembles appropriate for indoor entertainment. California Design includes 350 images, most in color, of furniture, ceramics, metalwork, architecture, graphic and industrial design, film, textiles and fashion, and ten incisive essays that trace the rise of the California design aesthetic. *Los Angeles Magazine*, 2000-11.
