The Dutch American Identity Terence Schoone-Jongen, 2008 Each year thousands of communities across the United States celebrate their ethnic heritages values and identities through the medium of festivals Drawing together elements of ethnic pride nostalgia religious values economic motives cultural memory and a spirit of celebration these festivals are performances that promote and preserve a community's unique identity and heritage while at the same time attempting to place the ethnic community within the larger American experience Although these aims are pervasive across ethnic heritage celebrations two festivals that appear similar may nevertheless serve radically different social and political aims Accordingly The Dutch American Identity examines five Dutch American festivals three of which are among the oldest ethnic heritage festivals in the United States in order to determine what such festivals mean and do for the staging communities Although Dutch Americans were historically among the first ethnic groups to stage ethnic heritage festivals designed to attract outside audiences and despite the fact that several Dutch American festivals have met with sustained success little scholarship has focused on this ethnic group's festivals Moreover studies that have considered festivals staged by communities of European descent have typically focused on a single festival The Dutch American Identity thus on the one hand seeks to call attention to the historical development and current sociocultural significance of Dutch American heritage festivals On the other hand this study aims to elucidate the ties that bind the five communities that stage these festivals together rather than studying one festival in isolation from the others Creatively combining several methodologies The Dutch American Identity describes and analyzes how the social political and ethical values of the five communities are expressed performed acted out represented costumed and displayed in their respective festivals Rather than relying on familiar even stereotypical notions of the Midwest rural America conservative America etc that often appear in contemporary political discourse Schoone Jongen shows just how complex and contradictory these festivals are in the ways they represent each community At the same time by placing these festivals within the context of American history Schoone Jongen also demonstrates how and why each festival is a microcosm of particular cultural social

and political developments in modern America The Dutch American Identity is an important book for sociology performance studies folklore immigration history anthropology and cultural history collections *Drug & Chemical Markets* ,1918

Hearing from Home Philippe Rygiel,Graham Squires,2012-06-07 We are often told that our world is a world of transnational communities and diasporas Western states confronted with massive emigration have long been trying to keep in touch and control the ones who left and nurtured networks of information and identities Having long identified migrants as immigrants we do learn a lot through these pages looking at them as emigrants Transporting concepts like diaspora or transnationalism into the past also lead us to wonder what was exactly new about such things as transnationalism and the multiplication of diasporas Is it the world we live in or the tools we use to describe it or a bit of both Dealing with different people different times from 1820 to 1990 and different places the five historians gathered here challenge some of the assumptions of contemporary discourses They use parts of a theoretical framework designed to identify and name what is new and unprecedented in our world to shed light on previous migrant experiences and it actually works **Reports of**
