Mental Health Systems Compared R. Paul Olson, 2006 The primary objective of this book is to provide comprehensive descriptions and make comparative evaluations of each of the mental health systems of four Western industrialized countries The countries selected illustrate a continuum from a highly centralized and publicly financed national health service in Great Britain to a predominantly decentralized and more privately financed market of mental health services in the United States In between these two contrasting types are examples of national health services and insurance programs in Norway and Canada Contributing experts from each country begin their chapters with an overview of the geographic demographic political economic and cultural contexts in which their mental health systems are situated Thereafter they a present national data to estimate the need for mental health services b describe national mental health policies and programs designed to meet their population s need c indicate how mental health services are organized and delivered and d discuss how their system is financed and provided resources A common chapter outline facilitates comparisons among all four systems on relevant evaluation criteria a access and equity b quality and efficacy c cost and

efficiency d financing and fairness e protection and participation and f population relevance In the final section of each chapter the authors provide recommendations for improved performance of their mental health system In the initial chapter the editor provides an overview introduces the four countries selected and defines the evaluation criteria applied by all contributing authors The final two chapters address convergence and divergence among the four systems and provide recommendations for improvement and for future comparative studies The intended audience includes mental health policymakers program administrators and managers teachers of graduate level courses relat

Subject Guide to Books in Print, 1971 **Made in Missouri** Paul R. Ahr, 2003 Fifty years ago ordinary Americans with a serious and persistent mental illness could look forward to a life of marginally effective treatment in antiquated overcrowded and poorly staffed mental institutions Midway through the 1950s the census at these institutions exceeded 560 000 Americans a fact that alarmed mental health professionals and public officials to the highest levels of the federal government **Books in Print, 2004-2005**, 2004 An Assessment of the Community Mental Health Movement Walter E. Barton, Charlotte J. Sanborn, 1977 **Culture and the Restructuring of Community Mental Health** William Vega, John W. Murphy, 1990-06-27 Examining the issues of treatment organizational planning and research this multidimensional study offers a critique of both the theoretical and programmatic aspects of providing mental health services to traditionally underserved populations Focusing on minority groups the book uses the case of Hispanics to illustrate the largely unaddressed need for services that are relevant to social groups with diverse cultural and linguistic backgrounds Vega and Murphy maintain that the present service system is socially insensitive that mental health services in the United States were never designed to serve a multicultural population and that in general those who dominate the current mental health system from administrator clinicians to bureaucrats and politicians do not know how to direct their services to minority groups Calling for fundamental reconceptualization and change the book argues for community based planning and intervention as an enlightened and necessary alternative and provides a detailed description of such a program in terms of both philosophy and method The eight chapters offer a reassessment based on understanding not only the rationale for these necessary services but also the important philosophical and pragmatic issues that have resulted in the current inadequate system they provide the new thinking necessary to reframe the objectives of mental health services for cultural minorities The early chapters explore some of the critical junctures in the community mental health movement between 1946 and 1981 the development of theory in the movement s early days and the thrust of community based intervention the culture specific methodology that has not been well understood or implemented Chapters 4 and 5 focus on the relationship between medicalization and the degradation of culture and on the reconceptualization of knowledge order illness and intervention The last three chapters analyze an example of community based intervention in operation and citizen involvement and the political aspects of community based policies are reviewed This timely discussion of the requirements for a socially

responsible and community based services delivery program lays the theoretical foundation for a future public mental health system As such it will prove invaluable and important reading for advanced undergraduate and graduate students in the health and human services areas including social work clinical psychology and medical sociology it also has much to offer professional administrators and planners Culture and the Restructuring of Community Mental Health has been designed to meet the needs of both academics and practitioners The Beginning of the Community Mental Health Movement Nancy E. Hale,1977 *Community Mental Health* Bruce Denner,1973 *The Community Mental Health Movement* Renee Alicia Bradford,1974 **Whatever Happened to Community Mental Health?** Roger B. Burt,2010-08 Whatever Happened to Community Mental Health is the story of the beginning of the community mental health movement in the 1960s as displayed through experiences in the inner city of Baltimore in one of the first programs It portrays bold groundbreaking initiatives taken by a young staff to deliver services to the impoverished residents while fulfilling their preventive mission The story is given life in the form of a memoir by one of its earliest staff members and conveys the lessons learned the viable service model developed as well as the shortcomings of the professional community The lessons learned are outlined along with the presentation of issues of philosophy and management Although the movement as originally intended foundered as the result of professional conservatism and changes in national commitments this book brings the experiences forward in time and demonstrates the applicability of service and consultation activities today as they apply both to treatment and prevention The implications of this story also serve as the basis for a call for a fundamental re evaluation of what mental health is and to what it should be committed in the future **An Assessment of the Community Mental Health Movement** Walter E. Barton,1977 Se expone en este libro el tratamiento psiquiatrico en ee Uu Que se considera debe ser proporcionado por los poderes publicos igual que se hace con enfermedades fisicas proponiendo un programa a nivel federal y estatal para fomentar las investigaciones
