*Madness in society: chapters in the historical sociology of mental illness* George Rosen, Benjamin Nelson, **A History of Public Health** George Rosen, 1993-07 An invaluable resource for all students of the subject facilitating access to the relevant literature on a wide range of subjects from specific diseases through the experience of individual countries to such areas of public health concern as education statistics mental health and nursing **Medical History** **Mental Illness and American Society, 1875-1940** Gerald N. Grob, 2019-01-29 Gerald N Grob's *Mental Institutions in America* Social Policy to 1875 has become a classic of American social history Here the author continues his investigations by a study of the complex interrelationships of patients psychiatrists mental hospitals and government between 1875 and World War II Challenging the now prevalent notion that mental hospitals in this period functioned as jails he finds that despite their shortcomings they provided care for people unable to survive by themselves From a rich variety of previously unexploited sources he shows how professional and political concerns rather than patient needs changed American attitudes toward mental hospitals from support to antipathy Toward the end of the 1800s psychiatrists shifted their attention toward therapy and the mental hygiene movement and away from patient care Concurrently the patient population began to include more aged people and people with severe somatic disorders whose condition recluded their caring for themselves In probing these changes this work clarifies a central issue of decent and humane health care Gerald N Grob is Professor of History at Rutgers University Among his works are *Mental Institutions in America* *Social Policy to 1875* *Free Press* *Edward Jarvis and the Medical World of Nineteenth Century America* *Tennessee and The State and the Mentality III North Carolina* Originally published in 1983 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Nature and Society in Historical Context* Mikulas Teich, Roy Porter, Bo Gustafsson, 1997-02-13 A collection of essays describing the historical connection between nature and society **History of psychology** Donald K. Freedheim, Irving B. Weiner, 2003 [Handbook of Psychology](#), [History of Psychology](#) Donald K. Freedheim, 2003-01-03 Includes established theories and cutting edge developments Presents the work of an international group of experts Presents the nature origin implications an future course of major unresolved issues in the area **The Empire of Depression** Jonathan Sadowsky, 2020-10-22 Depression has colonized the world Today more than 300 million of us have been diagnosed as depressed But 150 years ago depression referred to a mood not a sickness Does that mean people weren't sick before only sad Of course not Mental illness is a complex thing part biological part social its definition dependent on time and place But in the mid twentieth century even as European empires were crumbling new Western clinical models and treatments for

mental health spread across the world In so doing depression began to displace older ideas like melancholia the Japanese utsushu or the Punjabi sinking heart syndrome Award winning historian Jonathan Sadowsky tells this global story chronicling the path breaking work of psychiatrists and pharmacists and the intimate sufferings of patients Revealing the continuity of human distress across time and place he shows us how different cultures have experienced intense mental anguish and how they have tried to alleviate it He reaches an unflinching conclusion the devastating effects of depression are real A number of treatments do reduce suffering but a permanent cure remains elusive Throughout the history of depression there have been overzealous promoters of particular approaches but history shows us that there is no single way to get better that works for everyone Like successful psychotherapy history can liberate us from the negative patterns of the past

Literature and the English Civil War Thomas Healy, Jonathan Sawday, 1990-05-25 This book charts the relationship between literary texts and their historical context from 1640 1660 Essays in the volume focus on issues of ideology and genre the politics of the masque lyric and devotional poetry women's writings attitudes towards Ireland colonialism madness and division and individual writers such as Hobbes Marvell and Milton

**Transformations of Late Antiquity** Manolis Papoutsakis, 2016-12-05 This book focuses on a simple dynamic the taking in hand of a heritage the variety of changes induced within it and the handing on of that legacy to new generations Our contributors suggest from different standpoints that this dynamic represented the essence of late antiquity As Roman society and the societies by which it was immediately bounded continued to develop through to the late sixth and early seventh centuries the interplay between what needed to be treasured and what needed to be explored became increasingly self conscious versatile and enriched By the time formerly alien peoples had established their post classical polities and Islam began to stir in the East the novelties were more clearly seen if not always welcomed and one witnesses a stronger will to maintain the momentum of change of a forward reach At the same time those in a position to play now the role of heirs were well able to appreciate how suited to their needs the Roman past might be but how by taking it up in their turn they were more securely defined and yet more creatively advantaged Transformation is a notion apposite to essays in honour of Peter Brown The transformation of the classical heritage is a theme to which he has devoted and continues to devote much energy All the essays here in some way explore this notion of transformation the late antique ability to turn the past to new uses and to set its wealth of principle and insight to work in new settings To begin there is the very notion of what it meant to be Roman and how that notion changed Subsequent chapters suggest ways in which fundamental characteristics of Roman society were given new form not least under the impact of a Christian polity Augustine naturally finds his place and here the emphasis is on the unfettered stance that he took in the face of more broadly held convictions on miracles for example and the errors of the pagan past The discussion then moves on to

*Altering Consciousness* Etzel Cardeña, Michael J. Winkelman, 2011-05-18 This authoritative multidisciplinary overview of altered states of consciousness ASC shows how their study is necessary to gain a fundamental understanding of human culture history and

biology Altered consciousness is one of humanity's most mystical and life altering aspects. These remarkable changes in mental state have understandably been a topic of general interest and scientific inquiry across time. Beyond simply satisfying our curiosity, however, studies focused upon altered consciousness can also bring valuable insights into our experience, biology, and culture. This unprecedented two volume set will intrigue anyone interested in psychology, biology, and neurology, science, history, arts, and the humanities, and literature on consciousness, from general readers to scholars and researchers. An impressive collection of international contributors address altered states of consciousness from the perspectives of history, evolution, psychology, culture, literature, human biology, contemporary science, and society, seeking to illuminate the causes, effects, and meanings of altered consciousness. The first volume provides an introduction and centers on the importance of altered states in history, culture, and the humanities, while the second volume presents biological and psychological perspectives on altered consciousness and examines their potential for healing and pathology.

**The Early Public Lunatic Institutions of England Part I** Robert J. Wycherley, 2017-12-20. In the published literature of madness and its institutional management, the earliest English institutions for the mad have tended to be treated as part of a bad old days from which progress has been painfully made to modern knowledge and humanitarian treatment of mental illness. This book takes issue with this simplistic account and re-examines these early institutions using their own records. It suggests that the institutional governors, while somewhat distanced from day to day institutional management, were relatively well intentioned and that the institutions were far more complex in their organisation and functioning than has previously been reported.

**Intellectual Disability** James C. Harris, 2006. It is estimated that 7.2 million people in the United States have mental retardation or associated impairments, a spectrum now referred to as intellectual disability. This book provides professionals with the latest and most reliable information on these disabilities. It utilizes a developmental perspective and reviews the various types of intellectual disabilities, discusses approaches to classification, diagnosis, and appropriate interventions, and provides information on resources that may offer additional help. Case examples are included in each section to highlight specific diagnostic and treatment issues. The emphasis in this book is on the development of the person, the provision of interventions for behavioral and emotional problems associated with intellectual disability, and the positive support necessary for self-determination. It discusses the facilitation of transitions throughout the lifespan from infancy to maturity and old age. Additionally, the book reviews evaluations for behavioral and emotional problems, genetic factors, appropriate psychosocial, medical, and pharmacological interventions, and family and community support.
