Madness And Creativity In Literature And Culture:

Madness and Creativity in Literature and Culture Corinne Saunders, Jane Macnaughton, 2005-03-02 This collection of essays explores the relation between literature and madness from the Medieval to the Modern period The essays examine how literature represents the experience of madness and cultural responses to it and how madness may inspire creativity The volume also illuminates the history of medicine demonstrating the shifts and continuities in clinical understandings of and social attitudes to mental illness from the Middle Ages through to the enlightened notions of the Eighteenth Century to the development of psychoanalysis The Bloomsbury Handbook to Literature and Psychoanalysis Jeremy Tambling, 2023-03-09

Providing the most comprehensive examination of the two way traffic between literature and psychoanalysis to date this handbook looks at how each defines the other as well as addressing the key thinkers in psychoanalytic theory Freud Klein Lacan and the schools of thought each of these has generated It examines the debts that these psychoanalytic traditions have to literature and offers plentiful case studies of literature's influence from psychoanalysis Engaging with critical issues such as madness memory and colonialism with reference to texts from authors as diverse as Shakespeare Goethe and Virginia Woolf this collection is admirably broad in its scope and wide ranging in its geographical coverage It thinks about the impact of psychoanalysis in a wide variety of literatures as well as in film and critical and cultural theory **The Post-War British Literature Handbook** Katharine Cockin, Jago Morrison, 2010-02-10 A comprehensive accessible and lucid coverage of major issues and key figures in modern and contemporary British literature **The Oxford Handbook of Mental Health and Contemporary Western Aesthetics**, 2025-01-02

Human flourishing depends upon the mental health of the individuals Throughout history various cultural traditions have established and practiced diverse strategies to maintain their community members mental health treat their mental illness and enhance their well being They range from spiritual disciplines religious rituals and philosophical training to communal activities educational instructions and community support It is noteworthy that aesthetic objects and activities are frequently integrated into these strategies They include visual arts music dance story telling theatre and occasions and events made special by certain foods drinks decorations clothes and fragrance This long held and widely practiced integration of aesthetics into promotion of mental health testifies to the power of the aesthetic to affect the well being of humans and their communities The world's major philosophies and religious traditions have recognized this power of the aesthetic For example Plato's proposed censorship of the arts in his utopian Republic indicates his acknowledgement of and a respect for the power of the arts to mold the citizen's psyche and character Confucianism also utilizes arts and rituals to promote moral virtues Finally Buddhism teaches the cultivation of mindful practice for human flourishing by developing an alternative relationship with present moment experience such as suffering and distress Today the most dominant methods of treating mental illness in the West are psychotherapy psychology and psychiatry methodologies and practices established and developed in Europe since the nineteenth century Ever since the birth of art

and poetry its purpose has been to inspire stir and move people This handbook addresses the valuable role aesthetics plays in psychotherapy and psychiatry exploring both theory and practice **Boundaries in Medieval Romance** Neil

Cartlidge,2008 Medieval romance frequently and perhaps characteristically capitalises on the dramatic and suggestive possibilities implicit in boundaries not only the geographical political and cultural frontiers that medieval romances imagine and imply but also more metaphorical demarcations It is these boundaries as they appear in insular romances circulating in English and French which the essays in this volume address They include the boundary between reality and fictionality boundaries between different literary traditions modes and cultures and boundaries between different kinds of experience or perception especially the altered states associated with sickness magic the supernatural or the divine Mental Health

Symptoms in Literature since Modernism Nicolas Pierre Boileau,2023-09-22 Mental Health Symptoms in Literature since Modernism looks at various ways of treating symptoms of psychological disorders in the literature of the long twentieth century This book shows that literature can in its questioning of commonly accepted views of this lived experience of psychic symptoms help engender new theories about the functioning of subjective cases Modernism emerged at about the same time as Freudian psychoanalysis did and the aim of this book is to also show that to a certain extent Woolf preceded Freud in her exploration of the symptom and contributed to fashioning another approach that is now more common especially in writers from the 1990s onwards **The Body and the Arts** Corinne Saunders,2009-03-26 The Body and the Arts focuses on the dynamic relation between the body and the arts the body as inspiration subject symbol and medium Contributors from a variety of disciplines explore this relation across a range of periods and art forms spanning medicine literature from the classical period to the present and visual and performing arts The Recovery of Beauty: Arts, Culture, Medicine Corinne

Trowbridge,2015-10-06 The nineteenth century asylum was the scene of both terrible abuses and significant advancements in treatment and care The essays in this collection look at the asylum from the perspective of the place itself its architecture funding and purpose and at the experience of those who were sent there **Edinburgh Companion to the Critical**

Medical Humanities Anne Whitehead,2016-06-14 In this landmark Companion expert contributors from around the world map out the field of the critical medical humanities This is the first volume to introduce comprehensively the ways in which interdisciplinary thinking across the humanities and social sciences might contribute to critique and develop medical understanding of the human individually and collectively The thirty six newly commissioned chapters range widely within and across disciplinary fields always alert to the intersections between medicine as broadly defined and critical thinking Each chapter offers suggestions for further reading on the issues raised and each section concludes with an Afterword written by a

leading critic outlining future possibilities for cutting edge work in this area Topics covered in this volume include the affective body biomedicine blindness breath disability early modern medical practice fatness the genome language madness narrative race systems biology performance the postcolonial public health touch twins voice and wonder Together the chapters generate a body of new knowledge and make a decisive intervention into how health medicine and clinical care might address questions of individual subjective and embodied experience New Directions in Literature and Medicine Studies Stephanie M. Hilger, 2017-11-11 This book is situated in the field of medical humanities and the articles continue the dialogue between the disciplines of literature and medicine that was initiated in the 1970s and has continued with ebbs and flows since then Recently the need to renew that interdisciplinary dialogue between these two fields which are both concerned with the human condition has resurfaced in the face of institutional challenges such as shrinking resources and the disappearance of many spaces devoted to the exchange of ideas between humanists and scientists This volume presents cutting edge research by scholars keen on not only maintaining but also enlivening that dialogue They come from a variety of cultural academic and disciplinary backgrounds and their essays are organized in four thematic clusters pedagogy the mind body connection alterity and medical practice Degeneration, decadence and disease in the Russian fin de siècle Frederick White, 2015-11-01 Early in the twentieth century Russia was experiencing a decadent period of cultural degeneration just as science was developing ways to identify medical conditions which supposedly reflected the health of the entire nation Leonid Andreev the leading literary figure of his time stepped into the breach of this scientific discourse with literary works about degenerates The spirited social debates on mental illness morality and sexual deviance which resulted from these works became part of the ongoing battle over the definition and depiction of the irrational complicated by Andreev's own publicised bouts with neurasthenia This book examines the concept of pathology in Russia the influence of European medical discourse the development of Russian psychiatry and the role that it had in popular culture by investigating the life and works of Andreev It engages the emergence of psychiatry and the role that art played in the development of this objective science

Darcy,2013-06-25 This book traces the development of literary biography in the eighteenth century how writers melancholy was probed to explore the inner life Case studies of a number of significant authors reveal the 1790s as a time of biographical experimentation Reaction against philosophical biography led to a nineteenth century taste for romanticized lives *A Companion to Medieval Poetry* Corinne Saunders,2010-04-12 MEDIEVAL POETRY In a series of original essays from leading literary scholars this Companion offers a chronological sweep of medieval poetry from Old English to the great genres of romance narrative and alliterative poetry of the 15th century Beginning in the Anglo Saxon period the volume explores the Old English language and its alliterative tradition before moving on to examine the genres of heroic devotional wisdom and epic poetry culminating in a discussion of arguably the founding text of the English literary canon the great epic Beowulf In part two the Companion moves on to discuss the linguistic and social changes brought about as a result of the Norman Conquest exploring how this influenced the development of literary genres Essays probe the shifts and continuities in genres such as lyric chronicle and dream vision and the emergence of new genres such as popular and courtly romance and drama A particular focus is the continuation of the alliterative tradition from the Anglo Saxon period to the fifteenth century A series of chapters on major authors including Chaucer Gower and Langland provide fresh approaches to reading and studying key texts such as *The Canterbury Tales* *Piers Plowman* and *Sir Gawain and the Green Knight* Finally the collection examines cultural change at the close of the medieval period and the variety of literature produced in the long fifteenth century including writing by and for women Scots poetry clerical and courtly works and secular and sacred drama *The Youth of Things* Stephen Dodd,2014-01-31 When he died from tuberculosis at the age of thirty one Kajii Motojir had written only twenty short stories Yet his life and work it is argued here sheds light on a significant moment in Japanese history and ultimately adds to our understanding of how modern Japanese identity developed By the time Kajii began to write in the mid 1920s there was heated debate among his peers over legitimate forms of literary expression Japanese Romantics questioned the value of a western inspired version of modernity others were influenced by Marxist proletarian literature or modernist experimentation still others tried to create a distinctly Japanese fictional style that concentrated on first person

perspective the so called I novel There was a general sense that Japan needed to reinvent itself but writers and artists were at odds over what form this reinvention should take Throughout his career Kajii drew from these various camps but belonged to none of them making his work an invaluable indicator of a culture in crisis and transition The Youth of Things is the first full length book devoted to Kajii Motojir It brings together English translations of nearly all his completed stories with an analysis of his literature in the context of several major themes that locate him in 1920s Japan In particular Dodd links the writer s work with the physical body Kajii s subjective literary presence was grounded first and foremost in his TB stricken physical body hence one cannot be studied without the other His concerns with health and mortality drove him to play a central role in constructing a language for modern literature and to offer new insights into ideas that intrigued so many other Taish intellectuals and writers In addition Kajii s early years as a writer were strongly influenced by the cosmopolitan humanism of the White Birch Shirakaba school but by the time his final work was published in the early 1930s an environment of greater cultural introspection was beginning to take root encapsulated in the expression return to Japan nihon kaiki Only a few years separate these two moments in time but they represent a profound shift in the aspirations and expectations of a whole generation of writers Through a study of Kajii s writing this book offers some sense of the demise of one cultural moment and the creation of another
